1.0 INTRODUCTION

Porter Consulting Engineers (PCE) was initially commissioned by the City of Kalamunda on 15 March 2019 to review cost estimates for civil infrastructure included in the Forrestfield / High Wycombe Stage 1 Light Industrial Area Development Contribution Plan Report.

The Forrestfield / High Wycombe development area is located within the City of Kalamunda (the City) and is bound by Milner Road to the north, Sultana Road West to the east, Roe Highway to the south and Berkshire Road and Dundas Road to the west as shown in **Figure 1**.

Figure 1: Forrestfield / High Wycombe Local Structure Plan area

The Forrestfield / High Wycombe Local Structure Plan (the LSP) has been prepared to facilitate industrial subdivision and development within the area. Due to the nature of fragmented land ownership, a Development Contribution Plan (DCP) has been prepared to coordinate the provision of common infrastructure required to cater for development. A copy of the Forrestfield/ High Wycombe Local Structure Plan is included in **Attachment 1**.

1.1 Background

The Scheme Amendment to include the Development Contribution Scheme (DCS) within the City's Local Planning Scheme No. 3 (LPS3) was gazetted in May 2013. This allowed the City to place on development and subdivision approvals, the obligation to pay a development contribution.

Following the gazettal of the DCS, the Council was required to adopt a DCP Report and cost apportionment schedule. The DCP Report and the associated cost apportionment schedule sets out in detail the calculation of cost contributions for development in accordance with the methodology shown in the DCP. The DCP Report is a dynamic document to maintain the currency of the cost of infrastructure, land and other DCP items.

Each DCP review includes an assessment of the cost estimates (based on current industry rates) for various items of civil infrastructure within the DCP.

The first cost contribution was adopted by the City in December 2012. The DCP Report is required by Clause 6.5.11.2 of LPS3 to be reviewed at least annually. The DCP Report is currently under review, with previous reviews having occurred in December 2013, June 2015, December 2016 and December 2018.

1.2 Summary of Preceding Revisions of this Review Document

Revision A of this document

The scope of the review as part of Revision A of this document was:

1) Review the following documents provided by the City:
   - Forrestfield/High Wycombe Industrial Area Stage 1 Development Contribution Plan Report July 2017 - June 2018 (Revised October 2018);
   - Special Council Meeting minutes for 3 December 2018;
   - DCS Mastersheet 2017-2018 for Cost Estimate Review (hereafter referred to as the Mastersheet); and
   - Relevant design drawings provided.
2) Review aerial mapping and information readily available online in the area of the subject roads.
3) Review relevant design drawings to the subject roads, the subject roads being:
   - Berkshire Road –Ashby Close to Milner Road;
   - Milner Road- Berkshire Road to Sultana Road West;
   - Nardine Close extension (Road 2A);
   - Sultana Road West-Milner Road to Roe Highway;
   - Milner Road and Nardine Close intersection;
   - Berkshire Road and Ashby Close intersection; and
   - Dundas Road, Berkshire Road and Milner Road intersection.
4) Review and comment on the rates and quantities listed in the DCS Mastersheet civil works cost estimate for the subject roads for their appropriateness to the relevant scope; and
5) Document and make comments regarding the designs (if necessary), rates and quantities of the subject roads.

At the time of preparing Revision A of this document, the engineering drawings for Bonser Road were currently being redesigned and therefore no assessments were made for Bonser Road in Revision A.

Revision B of this document

The scope of the review as part of Revision B of this document was:

1) The City at Officer level has reviewed Revision A of this document and provided comments (as Work Package 1)[1] to PCE for consideration towards adoption.

   Clarification of utilities for Milner and design work progressed to a 25% status have led the City to the belief warranting a reduction in the Contingency amount noted in the Mastersheet:

   - Reducing the Contingency amount to Milner Road from 20% to 10%.
   - Reducing the Contingency amount for Sultana Road West from 20% to 5%.

2) The Milner Road and Nardine Close intersection works had concluded in November 2019. Revision B of this document was able to publish the actual projects costs as of 22 January 2020 as reported by the City.

3) The Berkshire Road and Ashby Close intersection works were completed in October 2019. Revision B of this document was able to publish the actual projects costs as of 22 January 2020 as reported by the City.

4) Compare tender price submission received by the City for the construction of Bonser Road against the Mastersheet. Bonser Road will provide a connection between Nardine Close and Berkshire Road.

1.3 Purpose of this Version of the Report

The purpose of this report is to document the review of the DCP cost estimates prior to the DCP report being presented to the Council for adoption.

The scope of the review as part of Revision C of this document was:

1) The City has refined the design parameters (as Works Package 2)[2] to better inform designs and DCP cost assessment for the upgrade of Sultana Road West and Milner Road:

   - Sultana Road West to be widened to 9m wide.
   - Milner Road to be widened to 10m wide.
   - A pavement investigation to confirm the profile of the existing pavement to Sultana Road West and Milner Road.
   - Permeability testing of the soil to prove up the viability of the use of verge side swales for the disposal of stormwater in Sultan Road West.
   - The design vehicle for Sultana Road West being amended from a Restricted Access Vehicle category 4 (RAV4) 27.5m long to an "As of Right" 19m semi-trailer.
   - Locate and survey of services to inform the designs.
   - Prepare 85% design status drawings for Sultana Road West, Milner Road and Berkshire Road.

1 Budge. G, *FW: Porters Design & Consultancy Services - Forrestfield North,* 30 January 2020, email to Cook. M, <mcook@portereng.com.au>
2 Budge. G, *FW: Porters Design & Consultancy Services - Forrestfield North,* 30 January 2020, email to Cook. M, <mcook@portereng.com.au>

2) Incorporate the findings and cost estimate from the Western Power Feasibility Study for the relocation of the power pole at the Milner Road / Sultana Road West intersection.
3) Incorporate updated actual project costs as reported by the City to the following roads:
   - Milner Road/Nardine Close intersection;
   - Dundas Road, Berkshire Road and Milner Road intersection; and
   - Berkshire Road and Ashby Close intersection.

The comparisons provided in the cost review summaries throughout this report include reference to a "Mastersheet Amount". The estimated costs provided in this report is compared to the Mastersheet amounts utilised to complete the DCP review on 3 December 2018.

1.4 General Assumptions

a) Pavement investigation has been undertaken for Milner Road and Sultana Road West, with the findings informing the 85% designs.
b) No assessment has been made of the capacity of the existing utility services infrastructure to support the expected development within the LSP (i.e. electrical infrastructure may need zone capacity upgrades to support the anticipated development). A servicing investigation to the area could be undertaken to review the existing infrastructure and the capacity to service the future development within the LSP. Servicing upgrades are generally paid for by individual developments when required by Service Authorities to support respective development sites.
c) All costs noted are exclusive of GST.

2.0 BERKSHIRE ROAD

Berkshire Road is an existing road that borders the western portion of the LSP area and is approximately 900m long. Berkshire Road is required to be upgraded to service the future development envisaged by the LSP.

Originally, the DCP proposed funds to upgrade the northern footpath to a shared path. However, it is understood the City will be seeking grant funding[3] from the Department of Transport for a cycling shared path along the southern verge of Berkshire Road.

Therefore, the City will need to consider further whether the DCP will continue to fund improvements to the existing footpath in the northern verge. In the event that the City elects to remove improvements to the northern footpath, the costs to the DCPE for Berkshire Road would only be for undergrounding consumer aerial lines (see below).

Northern Verge Footpath

For the City's future consideration, PCE has prepared 85% design status engineering drawings for the improvement of the footpath in the northern verge (see **Attachment 2**), which seeks to provide a 2m wide continuous path between Milner Road and Roe Highway.

3 Budge. G, *RE: 19-11-135: Berkshire Road: 25% design for proposed footpath*, 5 February 2020, email to Cook.M, <mcook@portereng.com.au>

It is noted that this design represents an ultimate outcome for the future footpath on the northern verge of Berkshire Road.

Notwithstanding the above, for the purposes of providing an estimated cost, the City has requested that PCE consider and note the following short term objectives regarding the footpath in the northern verge:

- Construct a 2m wide footpath along the northern verge of Berkshire Road. Where there is currently an existing 2m wide footpath in sound condition the path will be retained, however, where the path is in disrepair or the path is less than 2m wide the path will be widened or removed and reconstructed to be 2m wide.
- Apply painted gore markings to crossovers to delineate the path crossing the crossovers.

The City has reviewed the existing condition of the footpath on the northern verge of Berkshire Road and has made the following assessment:

Section 1. From the Milner Road / Berkshire Road intersection, extending south approximately 150m the existing path is in good condition with a mix of new and old footpath.

Section 2. Older 2m wide footpath, in fair to good condition. A 30m long section of path is damaged and needs replacement with a 2m wide path.

Section 3. Relatively new section of footpath typically 1.8m wide. There is a 13m long section of path that is 1.5m wide which will be widened or removed and replaced with a 2m wide path.

Section 4. No path exists along this section of the northern verge from Lot 99 (271) to the Ashby Close / Berkshire Road intersection. Construct a 2m wide path.

Section 5. An existing 2m wide footpath is present at the Ashby Close / Berkshire Road intersection extending along Ashby Close, with a path along the southern verge of Berkshire to Roe Highway.

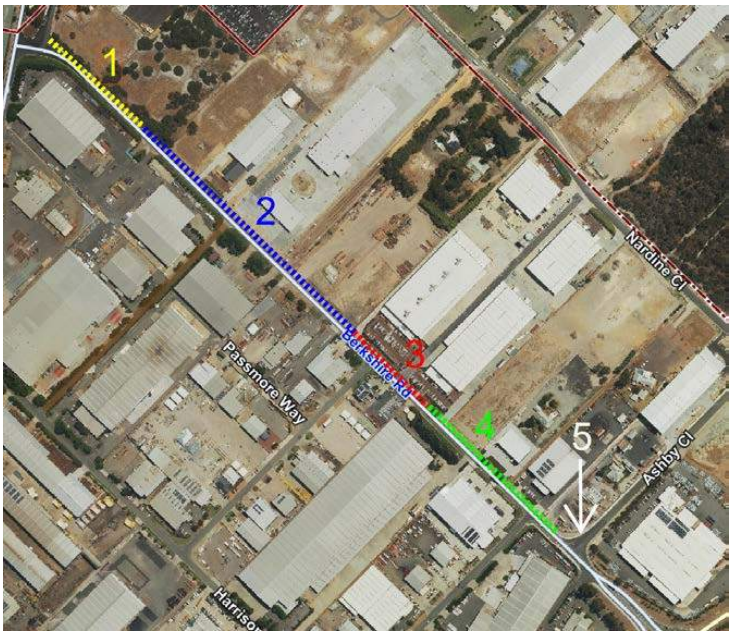

Figure 2: Condition Assessment for a 2m path along the northern verge of Berkshire Road

Overhead Consumer Line

To provide Berkshire Road with unobstructed overhead height clearance that applies for RAV routes, an overhead clearance of 4.6m is to be provided and satisfy minimum clearance requirements from the relevant authorities for services that pass over the road.

A clearance assessment has been undertaken to all overhead services that cross Berkshire Road, which consists of Western Power consumer lines. The assessment notes the following:

Western Power has indicated it would not consider the option of raising the lines and therefore the direction from Western Power was to convert these overhead lines to underground lines. An assessment has been made (see **Attachment 3**) with the following consumer aerial lines needing to be undergrounded:

- Pole S132830 – Consumer Aerials fronting the #303/307 Berkshire Road property boundary.
- Pole S122686 – Consumer Aerials fronting #291 Berkshire Road and the Bonser Road intersection.
- Pole S122688 – Consumer Aerials fronting #287 Berkshire Road.
- Pole S122689 – Consumer Aerials fronting #281Berkshire Road.
- Pole S122696 – Consumer Aerials fronting #247 Berkshire Road.

The assessment report notes the probable cost estimate to underground the 5 overhead consumer lines to be in the order of $75,000 (no GST payable). A further allowance of $12,500 plus GST should there be a need to any internal electrical re-cabling works within the respective properties as part of the change over from an overhead supply to an underground supply.

PCE's comments in review of the Mastersheet is noted **Table A**, with **Table 1** presenting a summary of the amounts and the variances between the Mastersheet and PCE's review. The full Mastersheet listing quantities and rates for the Berkshire Road construction cost estimate are noted in **Attachment 14**.

Table 1: Berkshire Road Cost Review Summary

Description	Mastersheet Amount	PCE Review Amount	Variance
Preliminaries	3,877	7,743	*(3,867)*
Survey Control and Testing	3,230	6,453	*(3,222)*
Clearing and Demolition	0	1,590	*(1,590)*
Earthworks	1,890	2,004	*(114)*
Roadworks	32,220	25,459	*(6,761)*
Miscellaneous	24,500	$12,500	*(12,000)*
Conversion of overhead consumer lines to underground lines	0	$87,500	*(87,500)*
Construction Sub Total excl. GST (including preliminaries & survey)	**$71,717**	**$143,248**	***($71,532)***
Allowances and Charges	$19,148	$31,085	*($11,937)*
CONSTRUCTION TOTAL excl. GST	**$90,865**	**$174,333**	***($83,468)***

The project cost estimate variance for Berkshire Road between the Mastersheet amount of $90,865 and PCE's review amount of $174,333, is $83,468 which is 92% of the Mastersheet amount mainly due to conversion of the overhead consumer lines to underground. The Mastersheet did not initially allow for the conversion of the overhead consumer lines to underground, but rather the lifting of overhead consumer lines. As outlined above this option would not be supported by Western Power.

2.1 Other Considerations

In relation to the scope of works discussed above the City may wish to consider:

- Make an application to Western Power to design and quote for the conversion of the overhead lines to underground that cross Berkshire Road.
- Investigate and prepare designs for any internal electrical works to the respective properties that may be required as part of the change over from an overhead supply to an underground supply.
- Preparing 100% design documentation for the installation of the 2m wide footpath along the northern verge.
- Preparing designs for the shared path along the southern verge of Berkshire Road, and secure construction funding from the Department of Transport.

Table A: Mastersheet Commentary Summary to Berkshire Road

Mastersheet							Porter Consulting Engineers Reviews			
Item	**Description**	**Qty**	**Unit**	**Rate**	**Amount**	**Notes**	**Qty**	**Rate**	**Amount**	**Comments**
3.4	Demolish and dispose redundant footpaths					Existing footpath to be retained and widened. No allowance noted in Mastersheet for removal of portions of the existing path.	80	$20.00	$1,590.00	Removed 30m of damaged path from Section 2, and removed 13m of 1.5m wide path from Section 3.
4.1	Remove 100mm Topsoil to spoil for footpath widening	630	m^2	$3.00	$1,890.00	Calculated based on 0.7m stripping for footpath widening for 900m assumed length. 0.7x900=630	364	$3.00	$1,093.00	Mainly topsoil stripping will be needed for Section 4 where there is no existing path.
4.2	Cut to spoil for footpath widening		m^3			No allowance noted in Mastersheet	36	$25.00	$911.00	From path boxout.
5.1	Widen existing concrete footpaths (from 1.8m wide to 2.5m wide)	630	m^2	$47.65	$30,019.50	Assumed existing footpath to be retained and widened to 2.5m. New footpath widening of 0.7 m for 900m assumed length. 0.7x900=630				
5.2	Install new 100mm thick concrete footpath, 2m wide		m^2	$5.20			424	$47.65	$20,218.00	Remove and replace 30m of damaged path from Section 2 and 13m of 1.5m wide path from Section 3.
5.3	Supply and Install Pram Ramps	4	ea	$550.00		Allowed for 2 road crossings. 2x2=4	6	$550.00	$3,300.00	Pram ramps only needed where crossovers have edge kerbing.
5.4	Install diagonal pavement markings to crossovers		Width of crossover				194	$10.00	$1,941.00	The City specified diagonal pavement markings to delineate path through crossovers.
6.2	Adjust Telstra Pit	1	Item	$3,000.00	$3,000.00	Quantity based on aerial imagery.	-	$3,000.00	$-	Assessed as not required.
6.3	Adjust stay poles	1	Item	$5,000.00	$5,000.00	Quantity based on aerial imagery.	-	$5,000.00	$-	Assessed as not required.
6.4	Adjust hydrant	1	Item	$3,000.00	$3,000.00	Quantity based on data from Water Corporation.	-	$3,000.00	$-	Assessed as not required.
6.5	Provision for miscellaneous/unidentified service relocations	1	Item	$10,000.00	$10,000.00	A conservative allowance for minor works to existing services	1	$3,000.00	$3,000.00	Reduce the allowance from $10k to $3k for provision for unidentified services relocation.
6.6	Crossover adjustments and reinstatements - allow $1,500 per crossover	4	Item	$1,500.00	$6,000.00	Although the original Mastersheet notes this $6,000 amount, it is not included in the summation amount of $24,500	4	$1,500.00	$6,000.00	Although crossover adjustments are likely to be minimal, consideration has been had for crossovers needing adjustment where a pram ramp is installed.
7.1	Convert overhead electrical lines (5 consumer lines) that conflict with RAV clearance requirements to underground lines						5	$15,000.00	$75,000.00	Refer to 3E's review of the overhead lines to Berkshire Road. (Drawing No. 3E19102-R01)
7.2	Ancillary works in relation to conversion to overhead to underground within the private property						5	$2,500.00	$12,500.00	Private cabling from the new pillar to the customer switchboard may be required.
9.5	Contingency			10%	$7,172.00			5%	$7,162.42	The percentage for contingency has been reduced from 10% to 5% as the scope has been well defined.

3.0 MILNER ROAD

Milner Road is an existing road that borders the northern boundary of the LSP area. Milner Road is required to be upgraded to service the future industrial development envisaged by the LSP.

The following items are noted in the DCP report for the Milner Road scope:

- Widen the carriageway from 7.4m to achieve a 10m wide pavement from kerb to kerb.
- Remove existing pedestrian paths and reinstate the verge area.
- Construction of a 2.5m shared path to provide a connection between Berkshire Road and Sultana Road West.
- Install street lighting between Berkshire Road and Sultana Road West to comply with Lighting standards.
- Road upgrades to accommodate category RAV7 36.5m long vehicles between Berkshire Road and Nardine Close including the Berkshire Road / Nardine Close intersection.
- Road upgrades to accommodate category "As of Right" (19m semi-trailer) vehicles between Nardine Close and Sultana Road West including the Milner Road / Sultana Road West intersection.

PCE has prepared 85% design status engineering drawings for the upgrade of Milner Road which is included in **Attachment 4.**

PCE's comments in review of the Mastersheet are noted in **Table B**, with **Table 2** presenting a summary of the amounts and the variances between the Mastersheet and PCE's review. The full Mastersheet for Berkshire Road is noted in **Attachment 14.**

Table 2: Milner Road Cost Review Summary

Description	Mastersheet Amount	PCE Review Amount	Variance
Preliminaries	29,040	42,400	*(13,361)*
Survey Control and Testing	24,200	35,334	*(11,134)*
Clearing and Demolition	57,911	135,809	*(77,898)*
Earthworks	51,944	41,592	*(10,352)*
Roadworks	237,038	398,523	*(161,485)*
Drainage	41,000	27,500	*(13,500)*
Miscellaneous	96,100	103,250	*(7,150)*
Construction Sub Total excl. GST (including prelims, survey)	**$537,233**	**$784,407**	***($247,175)***
Allowances and Charges	197,164	$130,996	*($66,168)*
CONSTRUCTION TOTAL excl. GST	**$734,397**	**$915,403**	***($181,007)***

The construction cost estimate variance for Milner Road between the Mastersheet amount of $734,397 and PCE's review amount of $915,403, is $181,007, 25% greater than the Mastersheet amount. This is mainly due to the items listed in **Table B**.

3.1 Particulars and Assumptions

a) The Milner Road / Sultana Road West (heading south) intersection has been upgraded to accommodate 'As of Right (19m semi-trailer)' vehicles with lane correct turning movements.

b) The cost of the pavement works to construct Milner Road / Sultana Road West (heading south) intersection upgrades is included within the Milner Road works costs. However, due to historic reasons the cost to relocate the power pole at the intersection is allocated within the Sultana Road West costs.

c) A pavement investigation[4] has been undertaken that has informed the required pavement works:

   i. Existing pavement areas shall have the asphalt wearing course removed and the existing base course ripped and reworked to a minimum 150mm thick. A 30mm AC14 dense grade asphalt wearing course (black) and 7mm primer sealed shall be laid.

   ii. For areas of pavement widening, the pavement shall consist of a compacted subgrade, 200mm thick limestone subbase, 150mm thick base course, 7mm primer seal and 30mm AC14 dense grade asphalt wearing course (black).

   iii. For the Eureka Street / Milner Road intersection and Milner Road / Sultana Road West intersection, the pavement shall be fully reconstructed to a 200mm thick limestone subbase, 150mm thick base course, 7mm primer seal and 40mm AC14 dense grade asphalt wearing course (black).

d) A preliminary lighting design has been prepared that specifies luminaires and outreaches installed on existing poles in the southern verge.

e) There is an existing ATCO Gas high pressure gas main along the northern verge of Milner Road which has been located and surveyed to inform the designs. ATCO gas has stringent design and construction requirements typically within 15m of high pressure assets with the following allowance made:

   i. Generally, for any works within 15m of high pressure assets, ATCO will require a full time approved onsite spotter to supervise the works at the developers/constructors expense. PCE has made a nominal $50,000 provisional allowance for spotter supervision and associated costs.

   ii. ATCO will require analysis of the coating to the high pressure gas main (a DCVG survey), to ensure the integrity of the coating to the pipe is still suitable ahead of the proposed works. PCE has made a nominal $5,000 provisional allowance for this.

f) There is an underground Western Power 132kV transmission cable under the north boundary lane. The cable has been located and surveyed to inform the designs.

g) Crossovers will be reinstated to match the material of the existing crossovers.

h) Having undertaken 85% designs for Milner Road, the Contingency percentage has been further reduced to 5% due to the greater confidence in the designs and project risks.

4 Brown Geotechnical, *Geotechnical Investigation (Factual Report) – Milner, Sultana Rd West - Pavement Cores and CBR Testing*, 20 December 2019 <ref: 19051>

Table B: Mastersheet Commentary Summary to Milner Road

Mastersheet								Porter Consulting Engineers Review			
Item	**Description**	**Qty**	**Unit**	**Rate**	**Amount**	**Notes**		**Qty**	**Rate**	**Amount**	**Comments**
3.1	Clear large trees including grubbing	9	ea	$246.00	$2,214.00	Quantity based on aerial imagery.					
3.2	Clear small trees inc grubbing	6	ea	$179.00	$1,074.00	Quantity based on aerial imagery.		19	$500.00	$9,500.00	PCE has adopted for a higher rate due to existing services near trees to be removed & grubbed. All trees for removal considered small trees.
3.3	Clear shrubs	5,040	m^2	$1.82	$9,172.80	Allowed for clearing from edge of footpath to road reserve boundary. Clearing required is approximately 4.5m on both sides for 560m assumed length. (4.5x2)x560=5040		111	$3.00	$333.00	Based on 85% status drawings
3.5	Demolish and dispose redundant kerbing	1,120	m	$2.73	$3,057.60	Adopted road length 560m, estimated kerb length is double this and excludes intersection upgrades at Dundas, Nardine and Sultana. 560x2=1,120		1,220	$9.00	$10,981.80	Based on 85% status drawings
3.6	Remove and Dispose redundant drainage pits	0	ea	$460.00	$0.00			8	$460.00	$3,680.00	Based on 85% status drawings
3.7	Remove and dispose redundant pavements	112	m^2	$35.65	$3,992.80	100mm allowed on both sides of the widening for the cut line. (0.1x2)x560=112		-	$20.00	$-	See item 3.8
3.8	Remove and Dispose existing asphalt offsite. Excavate exiting base and subbase for possible reuse as part of pavement reconstruction, basecourse as documented.							4,072	$20.00	$81,440.00	For pavements designated "Full depth pavement reconstruction with asphalt intersection mix" & "to be resurfaced"
4.1	Remove 100mm Topsoil to spoil	5,040	m^2	$3.00	$15,120.00	Allowed for topsoil stripping from edge of footpath to road reserve boundary. Area is approximately 4.5m on both sides for 560m assumed length. (4.5x2)x560=5040		2,280	$3.00	$6,840.00	Based on 85% drawings
4.2	Form, Shape, Compact Subgrade	1,680	m^2	$4.00	$6,720.00	Existing 8m wide pavement. Widening to 10m with equal 1m widening on both side. An additional 500mm of widening has been allowed for on both sides to allow for kerbing. Total of 3m widening has been allowed for roadbase construction for estimated length of 560m. 3x560=1680		2,915	$4.00	$11,660.16	Based on 85% drawings
4.5	Cut to spoil	1,100	m^3	$24.64	$27,104.00	Removal of unsuitable materials based on Portion B rate. Excavate to prepare subgrade to say 600-700mm depth			$24.64	$-	The pavement investigation did not encounter any clay or unsuitable material. That is not to say unsuitable material won't be encountered.
4.6	Cut to spoil for box out formation of widening.		m^3			Nil noted.		815.40	$24.64	$20,091.46	Spoils to be removed & disposed offsite for the widening box out.
5.1	Rip and rework the existing base course to minimum 150mm		m^2					2,312	$4.00	$9,248.00	For pavements designated "To be Resurfaced"
5.2	Supply and Install 220mm limestone sub-base	370	m^3	$50.00	$18,480.00	Sub-base has been calculated for the 3m widening for estimated length of 560m for a depth of 220mm. (3x560)x0.22=370		-	$50.00	$0	PCE has adopted a higher rate for 100mm road base of $85/$m^3$ compared to the Mastersheet of $65/$m^3$.
5.3	Supply and Install 200mm limestone sub-base		m^2					2,915	$12.00	$34,980.48	For pavements designated "Full depth pavement reconstruction with asphalt intersection mix" & "pavement widening"
5.4	Supply and Install 100mm road base	168	m^3	$65.00	$10,920.00	Basecourse has been calculated for the 3m widening for estimated length of 560m for a depth of 100mm. (3x560)x0.1=168		-		$-	

5.5	Supply and Install 150mm road base		m^3					2,915	$12.00	$34,980.48	For pavements designated "Full depth pavement reconstruction with asphalt intersection mix" & "pavement widening"
5.7	Supply and Install 7mm Primer Seal	1,680	m^2	$2.60	$4,368.00	Primer seal has been calculated for the 3m widening for estimated length of 560m. 3x560=1680		5,227.04	$2.60	$13,590.30	Porter's design will result in the existing pavement and new pavement areas needing sealing.
5.8	Supply and Install 30mm AC10 (black)	5,600	m^2	$12.19	$68,264.00	Allows for full resheet of 10m wide pavement for estimated 560m length. 10x560=5600		3,715	$12.19	$45,285.12	
5.9	Supply and Install 40mm AC10 (intersection mix)							1,704	$18.00	$30,673.80	
5.13	Supply and Install SMK (refer note 8)	1,120	m	$20.48	$22,937.60	Semi Mountable Kerb assumed for entire job. Estimated road length of 560m. 2x560=1120		1,133	$20.48	$23,203.84	
5.14	Key kerbs		m					265	$17.00	$4,511.80	
5.15	Remove existing crossover		m^2					795	$20.00	$15,906.00	
5.16	Reinstate existing Crossovers	640	m^2	$90.00	$57,600.00	Allowing 40m2 reinstated for 16 crossovers. 16x40=640			$90.00	$-	See below for crossovers being reinstated in varying materials
5.17	Reinstated Concrete Crossovers for commercial/industrial properties to be: 150mm thick N32MPa concrete with SL62 mesh centrally located with a 100mm limestone basecourse.		m^2					430	$110.00	$47,267.00	Based on 85% designs
5.18	Reinstate Asphalt crossovers for commercial/industrial properties to be: 150mm thick rock roadbase, 7mm primer seal with 30mm asphalt wearing course.		m^2					126	$18.79	$2,373.18	Based on 85% designs
5.19	Reinstate concrete crossovers to residential properties to be: 100mm thick N32MPa with 150mm limestone base.		m^2					93	$100.00	$9,320.00	Based on 85% designs
5.20	Reinstate Asphalt crossovers to residential properties to be: 100mm thick rock roadbase, primer seal with 30mm asphalt wearing course.		m^2					35	$18.79	$661.41	Based on 85% designs
5.21	Reinstate Existing block paving crossovers is to have the existing bricks retained for reuse towards reinstating the crossover on a 150mm limestone base.		m^2					30	$54.00	$1,614.60	Based on 85% designs
5.22	Reinstate industrial and commercial laterite gravel crossover 150mm thick		m^2					93	$16.00	$1,494.40	Based on 85% designs
5.23	Supply and Install new concrete footpaths (2.5m wide)	1,400	m^2	$38.12	$53,368.00	Assumed only reinstating footpath on one side of the road with a width of 2.5m for estimated length of 560m. 2.5x560=1400		1,565	$38.12	$59,648.27	Based on 85% designs
5.24	Supply and Install new concrete footpaths (1.8m wide)							1,185	$38.12	$45,163.05	Based on 85% designs
5.25	Supply and Install Pram Ramps	2	ea	$550.00	$1,100.00			7	$550.00	$3,850.00	
6.6	Supply and Install new SEP or Gully pit.	0	ea	$3,000.00	$0.00			7	$500.00	$3,500.00	Based on 85% designs
6.6	Supply and Install 375 dia. RCP	15	m	$400.00	$6,000.00			8	$3,000.00	$24,000.00	Based on 85% designs
7.2	Supply and Install street lighting	560	m	$110.00	$61,600.00	Based on adopted road length of 560m and Portion A & B pricing.					
7.3	Supply and install street lighting including cabling		ea pole					5	$3,000.00	$15,000.00	
7.4	Remove light poles		ea pole					2	$2,500.00	$5,000.00	

7.11	Adjust access chamber (sewer manhole) in road	1	ea	$7,000.00	$7,000.00	Estimate based on data from Water Corporation. 1 Manhole observed.		1	$3,000.00	$3,000.00	The Mastersheet amount of $7k seems high.
7.13	Provision for miscellaneous /unidentified service relocations	1	Item	$20,000.00	$20,000.00			1	$10,000.00	$10,000.00	Provisional allowance should it arise other services need adjusting
7.14	High Pressure gas spotter (Provisional)		Item			No specific allowance noted in the Mastersheet.		1	$50,000.00	$50,000.00	Atco Gas will require a spotter on-site when there is works occurring in the vicinity of the HP gas which is in the northern verge.
7.15	DCVG coating survey on HP gas main (Provisional)		Item			No specific allowance noted in the Mastersheet.		1	$5,000.00	$5,000.00	When working near HP Gas, ATCO Gas has in the past required testing of the surface coating on HP gas mains. A provisional allowance has been made.
7.16	Western Power quote for interfacing works (Provisional)							1	$5,000.00	$5,000.00	The design development has progressed to an 85% status, supporting the contingency can be further reduced from 10% (Rev B of DCP) to 5%.

4.0 NARDINE CLOSE EXTENSION (ROAD 2A)

The Nardine Close extension (Road 2A) is the extension to provide access to lots currently serviced by a series of battle-axe legs. The extension is required to service the future development envisaged by the LSP.

The following items are noted in the DCP report for the Nardine Close extension (Road 2A) scope:

- Construction of a new 10m wide pavement to service current battle-axe configuration lots.
- Construction of a drainage swale along the road verge sections in accordance with the Drainage Strategy.
- Roads will only be constructed to service current battle-axe configured lots if land assembly and consolidation processes do not provide the affected lands with access from gazetted and constructed public roads.
- Creation of a new 20m road reservation.
- Associated service installation and relocation.

The City of Kalamunda provided engineering drawings prepared by Porter Consulting Engineers for the Nardine Close extension (Road 2A), with the extension drawings documented over two stages (i.e. Stages 1 and 2). The drawings are included in **Attachment 5** and **Attachment 6**.

PCE was the Superintendent and undertook contract administration duties during the Stage 1 works constructed by RJV. Stage 1 was a 280m extension of Nardine Close from Ashby Close to a constructed cul-de-sac by the lot 308 /lot 51 property boundary. The original intention for the cul-de-sac was to be temporary until the Stage 2 works occurred.

The Stage 1 works achieved practical completion on 5 July 2019. PCE has utilised the Adjusted Contract Amount of $496,278 for Stage 1 costs plus GST which includes approved variations that arose during the works which is noted in **Attachment 7**.

The Stage 2 works as shown on the engineering drawings seeks to extend Nardine Close approximately 130m northwards to establish a permanent cul-de-sac by the boundary of lot 50 and lot 51.

PCE has reviewed both the Stage 2 engineering drawings and Mastersheet in relation to quantity and rates.

During the preparation of the cost estimate for Stage 2, a number of comments were noted as presented in **Table C**.

As the actual construction amount for Stage 1 has been utilised to reflect the true construction cost, it is not possible to make a direct like for like comparison to the Mastersheet cost headings. However, PCE has endeavoured to group costs from the Stage 1 contract to be appropriate to the Mastersheet headings and prepared a cost estimate for the construction of Stage 2, as presented in **Table 3.**

For both Stages 1 and 2 of the Nardine Close extension (Road 2A), the variance between the Mastersheet value of $1,108,188 excluding GST and PCE's value of $1,103,349 excluding GST is $4,839, which is 0.5% of the Mastersheet value and is within the typical expected range of cost estimates of this nature.

Table 3: Nardine Close Extension (Road 2A) Cost Review Summary

Description	PCE Stage1 Adjusted Contract Amount	PCE Stage 2 Estimate Amount	PCE Stage 1 & 2 Summation Total	Mastersheet Amount	Variance
Preliminaries	97,326	$30,022	$127,348	39,399	*$87,949*
Survey Control and Testing	Included in Preliminaries	$30,022	$30,022	32,832	*($2,810)*
Clearing and Demolition	25,462	$128,080	$153,542	125,000	*$28,542*
Earthworks & Retaining	29,048	$47,729	$76,777	86,016	*($9,239)*
Roadworks	193,864	$120,870	$314,734	269,032	*$45,702*
Drainage	3,246	$3,720	$6,966	3,000	*$3,966*
Miscellaneous	48,213	$29,150	$77,363	75,400	*$1,963*
Services	99,119	$45,720	$144,839	98,200	*$46,639*
Construction Sub total	**$496,278**	**$435,312**	**$931,591**	**$728,879**	*$202,712*
Allowances and Charges Western Power costs Water Corporation costs Design and Superintendence	66,413	$105,346	$171,759	194,611	*($22,852)*
Total excl. GST	**$562,691**	**$540,658**	**$1,103,349**	**$923,490**	*$179,859*
Staging Contingency	included	included	included	184,698	
Total with Staging excl. GST	**$562,691**	**$540,658**	**$1,103,349**	**$1,108,188**	*($4,839)*

The City is also considering an option to not undertake the Stage 2 works, such that the existing cul-de-sac at the lot 308 / lot 51 boundary is to be converted to permanently cul-de-sac. Due to a recent Development Application for a place of worship to lot 50 Sultana Road, Stage 2 extension works of Nardine Close may no longer be required. It is possible to provide a cul-de-sac by the lot 308 / lot 51 boundary and service these lots for future industrial development.

An engineering assessment and development cost has been prepared that reviews the options available should the Stage 2 works not occur and a permanent cul-de-sac is provided by the lot 308 / lot 51 boundary. The assessment considered retaining the existing cul-de-sac and an alternative arrangement such that the cul-de-sac is relocated approximately 35m northwards so that it straddles the lot 308 / lot 51 property boundary. The consideration of an alternative arrangement is due to concerns being raised that the exiting cul-de-sac arrangement may not provide adequate access to lot 51.

A summary of the indicative development costs for the cul-de-sac is presented in with the full assessment in **Attachment 8**.

Table 4: Summary of costs for a cul-de-sac by the lot 308 / lot 51 boundary

Item	Costs to Accommodate the Existing Cul-de-sac	Costs to Relocate the Cul-de-sac to the lot 308/lot 51 boundary
Construction costs	132,200	223,200
Extra over costs for works from the interim to permanent reservation boundary	28,000	Nil
Development Fees and Charges	29,100	23,400
Sub total	**$189,300**	**$246,600**
GST	$18,930	$24,660
Total including GST	**$208,230**	**$271,260**
Costs for Emergency Accessway works	67,100	61,100
Development Fees and Charges for the Emergency Accessway works	8,000	7,500
Sub total	**$75,100**	**$68,600**
GST	$7,510	$6,860
Total including GST	**$82,610**	**$75,460**
Sub total for cul-de-sac and emergency way works	**$264,400**	**$315,200**
GST	$26,440	$31,520
Total including GST for cul-de-sac and emergency accessway works	**$290,840**	**$346,720**

Table C: Mastersheet Nardine Close Extension (Road 2A) Commentary

Mastersheet								Porter Consulting Engineers Review (Stage 2)			
Item	**Description**	**Qty**	**Unit**	**Rate**	**Amount**	**Notes**		**Stage 2 Qty**	**Rate**	**Amount**	**Comments**
3.6	Remove and dispose redundant pavements		m^2	$35.65	0	It appears the Mastersheet did not note allowance for removal of the temporary turnaround constructed in Stage 1.		654	$20.00	$13,080.00	Removal of existing temporary turnaround constructed in Stage 1. The Mastersheet notes a rate of $35.65/$m^2$ which is towards the higher end of the range. PCE has noted a rate of $20/$m^2$ for this item.
4.5	Cut to spoil (cart offsite)	0 (for Stages 1 & 2)	m^3	$24.64	0	It appears the Mastersheet did not allow for cut to spoil.		530	$25.00	$13,250.00	PCE assesses there is likely to be excess spoil material, based on cut/fill/balance DTM calculation available to PCE being the design consultant.
4.6	Cut to fill	1,000 (for Stages 1 & 2)	m^3	$5.00	$5,000.00			265 (for Stage 2)	$5.00	$1,325.00	PCE assesses there is likely to be excess spoil material, based on cut/fill/balance DTM calculation available to PCE being the design consultant.

5.0 SULTANA ROAD WEST

Sultana Road West is an existing road that borders the western boundary of the LSP area. Sultana Road West from Milner Road to Lot 222 (#128) Sultana Road West is to be upgraded to service the future development envisaged by the LSP.

PCE has prepared 85% design status engineering drawings for the upgrade of Sultana Road West which is included in **Attachment 9.**

The following items are noted for the Sultana Road West scope:

- Carriageway widening between Milner Road and Lot 222 (#128) Sultana Road West to provide a 9-metre-wide carriageway between kerbs. The existing carriageway width is 6m.
- Construction of drainage swales along the road verge sections for stormwater disposal.
- Construction of a footpath along the west side to provide a connection between Milner Road and Lot 222 (#128) Sultana Road West. The original Mastersheet had provision for a 2.5m wide path, however, the City has advised[5] that the path does not form part of the City's overarching Bicycle Plan and therefore does not require a path wider than 1.8m. Therefore, allowance has now been made for a 1.8m wide path.
- Install street lighting to comply with lighting standards.

PCE's comments in review of the Mastersheet as noted in **Table D,** with **Attachment 9**.

Table 5 presenting a summary of the amounts and variances between the Mastersheet and PCE's review. The full Mastersheet for Sultana Road West is noted in **Attachment 14.**

Table 5: Sultana Road West Cost Review Summary

Description	Mastersheet Amount	PCE Review Amount	Variance
Preliminaries	59,631	$74,414	*$14,784*
Survey Control and Testing	49,692	$62,012	*$12,320*
Clearing and Demolition	18,941	$80,862	*$61,921*
Earthworks	47,856	$107,465	*$59,609*
Roadworks	388,849	$519,139	*$130,291*
Drainage	12,000	$176,853	*$164,853*
Miscellaneous	526,198	$355,921	*($170,277)*
Construction Sub total	**$1,103,167**	**$1,376,668**	***$273,501***
Allowances and Charges	404,862	$236,787	*($168,075)*
Sub Total entire width, approx 800m length	**$1,508,028**	**$1,613,454**	***$105,426***
Total to Scheme (50%) excl. GST	**$754,014**	**$806,727**	***$52,713***

The construction cost estimate variance for Sultana Road West between the Mastersheet amount of $1,508,028 excluding GST and PCE's review amount of $1,613,454 excluding GST, is $105,426, which is approximately 7% of the Mastersheet amount mainly due to the items listed in **Table D**. The DCP report indicates that 50% of the construction costs will be borne by the DCP.

5 Budge. G, *FW: 19-03-043:: Forrestfield North DCA with Porter's comments*, email to Cook. M, 31 January 2020, <,mcook@portereng.com.au>

5.1 Particulars and Other Considerations

a) The Milner Road / Sultana Road West (heading south) intersection has been upgraded to accommodate 'As of Right (19m semi-trailer)' vehicles with lane correct turning movements.

b) Western Power has undertaken a feasibility study[6] and estimate of costs for the removal of existing power pole #132866 to facilitate the proposed intersection widening works at Milner Road / Sultana Road West. The study notes the cost for the works being $270,920.99 (GST not applicable). This amount does not allow for any costs associated with land acquisitions.

c) The design drawings (MP190326) that accompanied the Western Power feasibility study for the removal of pole #132866 notes a need for a new electrical substation and LV kiosk in lot 90 north of the intersection. The required land areas are:

   i. Kiosk: 1.9m deep by 2.4m wide.

   ii. Substation: 3m deep by 4.5m wide.

   The City should allow sufficient time to liaise with the landowner of lot 90 for the acquisition of the required land for the kiosk and substation. Lot owner approvals would also need to be sought where new stay poles front respective properties.

d) A pavement investigation[7] has been undertaken that has informed the required pavement works:

   - As the existing pavement ranges from a 150mm to 225mm thick base course, it shall be fully reconstructed to consist of a compacted subgrade, 125mm thick limestone subbase, 125mm thick base course, 7mm primer seal and 30mm AC14 dense grade asphalt wearing course (black).
   - For areas of pavement widening, the pavement shall consider of a compacted subgrade, 125mm thick limestone subbase, 125mm thick base course, 7mm primer seal and 30mm AC14 dense grade asphalt wearing course (black).
   - A 40mm AC15 MRWA intersection mix asphalt shall be applied to the cul-de-sac head.

e) Permeability testing[8] of the insitu sands in the verge was undertaken to assess the suitability of stormwater disposal via roadside swales. The testing indicated good drainage characteristic soils with 47.5m/day permeability.

f) A preliminary lighting design has been prepared to comply with Standards that specifies luminaires and outreaches installed on existing poles.

g) An allowance has been made for the adjustment of communication pit lids and Water Corporation valve and hydrant lids.

h) No allowance has been made for street trees or landscaping[9] given insufficient space is available due to the swales drainage requirements.

---

6 Western Power, *Feasibility Study Milner Road (MF011894/GFVSVU),* 22 May 2020
7 Brown Geotechnical, *Geotechnical Investigation (Factual Report) – Milner, Sultana Rd West - Pavement Cores and CBR Testing*, 20 December 2019 <ref: 19051>
8 Brown Geotechnical, *Geotechnical Investigation – (Permeability Testing) – Sultana Road West, Forrestfield.,* 14 April 2020, <ref: 20034>
9 Lodge. C, *Re: 19-11-135: Sultana Road West: Street trees*, 15 June 2020, email to Cook. M, <mcook@portereng.com.au>

i) Land acquisitions of approximately 350m^2 in area from 4 Brand Road, High Wycombe will be required to facilitate the cul-de-sac. It is noted that this will not be a land acquisition cost of the DCP.

j) No land acquisitions are expected to be required to facilitate the intersection upgrades to Milner Road / Sultana Road West (heading south). However, the City will need to obtain approval from the owner of lot 1563 (H85) Milner Road, High Wycombe to allow for a batter approximately 1m in height and extending 3m into the property as part of works to the Milner Road / Sultana Road West intersection. If the owner does not grant approval for the batter, consideration could be had for a panel and post retaining wall, or land acquisition.

   For the costings, it has been assumed that the lot owner of 1563 will grant approval for the battering works to extend into the property.

k) The DCP report indicates that 50% of the roadwork upgrade costs will be borne by the DCP, with the remaining 50% assumed to be borne by future developers undertaking development on the eastern side of Sultana Road West. There is a risk that the City may encounter a funds shortfall to undertake the roadworks as the timeframe for securing funds from future developers is uncertain. Development to the east side of Sultana Road West will develop over time and is not likely to coincide with the City's timeframe to undertake the roadworks. Therefore, the City may need to consider prefunding the infrastructure for the other 50% of the roadworks costs with a portion of the costs being repaid by a future DCP in Forrestfield North.

Table D: Mastersheet commentary summary to Sultana Road West works

Mastersheet								Porter Consulting Engineers Review			
Item	**Description**	**Qty**	**Unit**	**Rate**	**Amount**	**Notes**		**Qty**	**Rate**	**Amount**	**Comments**
3.1	Clear large trees inc grubbing	10	ea	$246.00	$2,460.00	approximate only based on aerial imagery		10	$500.00	$5,000.00	PCE has adopted for a higher rate due to likely presence of existing services near trees to be removed & grubbed.
3.2	Clear small trees inc grubbing	27	ea	$179.00	$4,833.00	approximate only based on aerial imagery		8	$250.00	$2,000.00	PCE has adopted for a higher rate due to likely presence of existing services near trees to be removed & grubbed.
3.3	Clear shrubs/grass	4,000	m^2	$1.82	$7,280.00	Length of road taken as 800m with 4m road widening (2x 0.5m extra for topsoil stripping). 800x5=4000		0	$1.82	$-	There are very few scrubs along this length. Topsoil removal accounted for in item 4.1
3.4	Trim / lop branches to shrubs.		Item					1	$2,000.00	$2,000.00	From a site visit, there is likely to be a need for some overhanging branches to be trimmed/lopped to facilitate the works.
3.5	Demolish and dispose redundant footpaths	0	m^2	$20.00	$0	No allowance in the Mastersheet.		0	$20.00	$-	The Milner Road costings accounts for any paths that need removal by the Sultana Road intersection.
3.6	Demolish and dispose redundant kerbing	1,600	m	$2.73	$4,368.00	Quantity based on assumed length. Removal on both sides of road. 800x2=1600		1,565	$9.00	$14,085.00	Remove existing flush kerbing along full length.
3.8	Remove and Dispose existing asphalt offsite.		m^2					5,100	$9.50	$48,450.00	For works to existing pavement areas
3.9	Remove and Dispose redundant pavements	0	m^2	$97.37	$0.00			480	$24.64	$11,827.00	Redundant pavement between cul-de-sac to Brand St.
4.1	Remove 100mm topsoil to spoil	4,000	m^2	$3.00	$12,000.00	Length of road taken as 800m with 4m road widening (2x 0.5m extra for topsoil stripping). 800x5=4000		993.9	$3.00	$2,982.00	Based on 85% designs
4.2	Form, Shape, Compact Subgrade	4,000	m^2	$4.00	$16,000.00	Length of road taken as 800m with 4m road widening (2x 0.5m extra for topsoil stripping). 800x5=4000		8096	$4.00	$32,384	Length of road taken as 800m with2m wide pavement extension to both sides, plus a further 0.5m extension beyond the edge of pavement, as shown on the drawings. And the existing pavement being reconstructed.
4.3	Import Fill, Shape, Compact	0	m^3	$30.00	$0.00			60	$30.00	$1,800.00	Minor fill batter into lot 1563 by Milner Road/Sultana Road West intersection.
4.4	Cut to spoil	400	m^3	$24.64	$9,856.00	Allowed for 100mm of cut for topsoil area. (5x800)x 0.1=400.		1,107	$24.64	$27,287.00	Includes disposal of topsoil and boxout material.
5.1	Rip and rework the existing base course to minimum 150mm		m^2					4,620	$4.00	$18,480.00	For works to existing pavement areas
5.2	Supply and install 220mm limestone sub-base	880	m^3	$50.00	$44,000.00	Road area with 220mm depth. (5x800)x0.22= 880				$-	
5.3	Supply and install 125mm limestone sub-base		m^2					8096	$10.50	$85,008	Based on 85% designs.
5.4	Supply and install 100mm road base	400	m^3	$65.00	$26,000.00	Road area with 100mm depth. (5x800)x0.1=400		0		$-	
5.5	Supply and install 125mm road base		m^2					8096	$11.25	$91,080	Based on 85% designs

5.18	Reinstate Existing block paving crossovers is to have the existing bricks retained for reuse towards reinstating the crossover on a 150mm limestone base.		m^2					20	$54.00	$1,080.00	Based on 85% designs
5.19	Reinstate gravel crossover 150mm thick		m^2					177	$16.00	$2,832.00	Based on 85% designs
5.20	Supply and Install new concrete footpaths	2,000	m^2	$38.12	$76,240.00	800x2.5 = 2000m2		1,621	$38.12	$61,796.00	As part of Revision B to the DCA report (R34.19), the City has instructed that the path in Sultana Road West is to be reduced from 2.5m to 1.8m. Quantity based on 85% designs.
5.21	Supply and Install Pram Ramps	8	ea	$550.00	$4,400.00	6 @ Milner, 2x @ Brae		2	$550.00	$1,100.00	
6.1	Supply and install new 300dia culverts	0	ea	$2,000.00	$0	No allowance in the Mastersheet.		361.4	$85.00	$30,719.00	drainage pipe under crossovers
6.2	Remove and Replace existing culverts OR extend existing culvert	1	ea	$5,000.00	$5,000.00	Brae Road			$5,000.00	$-	See item below
6.3	Remove existing drainage pipework		m					29	$30.00	$870.00	Remove the pipework at the intersection with Brae Road. This is at a local high point so no need to have the drainage pipe in place.
6.4	Convert Existing SEP's to Gully's	0	ea	$2,500.00	$0.00			1	$2,500.00	$2,500.00	
6.5	Covert Existing SEP's to Manholes	1	ea	$2,000.00	$2,000.00	Quantity based on aerial imagery.		0	$2,000.00	$-	
6.6	Supply and Install new SEP's	1	ea	$3,000.00	$3,000.00	Quantity based on aerial imagery.		0	$3,000.00	$-	
6.7	Supply and install bubble in/out soakwell pits							41	$3,000.00	$123,000.00	Pits in swales by crossovers
6.8	Supply and Install 375 dia. RCP	5	m	$400.00	$2,000.00	Quantity based on aerial imagery.		0	$400.00	$-	
6.10	Form roadside swales		m					1098	$18.00	$19,764.00	Based on 85% designs
7.1	Supply and Install misc linemarking and Signage	1	Item	$5,000.00	$5,000.00	7.1		1	$1,000.00	$1,000.00	Chevrons by Brand Rd
7.3	Supply and install street lightng including cabling		ea pole					9	$3,000.00	$27,000.00	Based on 85% designs
7.4	Supply and Install trees	54	ea	$450.00	$24,300.00	Allowed for trees at 15m spacing for the entire road length. 800/15=53.33 rounded up.		0	$450.00	$-	City confirms that having street trees located in the proposed swales would be suboptimal, and therefore exclude street trees from the design and costs.
7.5	Maintenance of trees and verges for a 2 year period	2	year	$16,948.86	$33,897.72			0	$16,948.86	$-	City confirms that having street trees located in the proposed swales would be suboptimal, and therefore exclude street trees from the design and costs.
7.11	Adjustment of Telstra or NBN lids to suit finished levels (Provisional)							1	$10,000.00	$10,000.00	Although it is expected that most of the existing communication pit lids currently match proposed levels, an allowance has been made for some lids needing adjusting.
7.12	Adjustment of Water Corp lids (valves, hydrants) to suit finished levels (Provisional)							11	$2,000.00	$22,000.00	As the verge level of Sultana Road will be adjusted slightly, lids and spindles will need to be raised.
9.5	Contingency	20%			$220,633.26			5%		$56,606.00	Contingency reduced from 20% to 5% as part of preparing Revision B of the DCA report (R34.19), as instructed by the City, and is reflective the investigations and designs undertaken to date.

6.0 MILNER ROAD AND NARDINE CLOSE INTERSECTION

The widening works at the intersection of Milner Road and Nardine Close have been designed to accommodate a 36.5m B-triple truck turning movement, with the relevant drawings included in **Attachment 10**.

The Milner Road and Nardine Close intersection works were completed in November 2019, and is currently within the 12 months defect liability period. **Table 6** notes the project costs[10] as of 11 June 2020 for the intersection works including investigations, construction, professional fees and charges. The City has noted there are outstanding minor works for the adjustment of services for an estimated $5000.

Due to the complexity of cost allocations across the whole project, a lump sum amount is noted within **Table 6**.

Table 6: Milner Road and Nardine Close Intersection Cost Review Summary

Description	Mastersheet Amount	Actual Project Amount to 11 June 2020	Outstanding costs	Project Costs to completion	Variance
Total project costs excl. GST	**$450,019**	$295,076	$5,000	$300,076	*$149,943*

The project cost variance between the Mastersheet value of $450,019 and the project costs to completion of $300,076 is $149,943 which is 66% less than the Mastersheet value.

Future reviews of the DCP costs should include any costs that may arise during the defects liability period which concludes on 15 July 2020.

7.0 BERKSHIRE ROAD AND ASHBY CLOSE INTERSECTION

The widening works for the Berkshire Road and Ashby Close intersection have been designed to accommodate a 36.5m B-Triple truck turning movement with the relevant drawings included in **Attachment 11.**

The intersection construction works were completed in October 2019 and are currently within the 12 months defects liability period.

Table 7 notes the actual project costs as of 11 June 2020 including investigations, construction and professional fees and charges. The City has noted there are outstanding minor works for the adjustment of sewer manholes for an amount of $8,729.

Due to the complexity of cost allocation across the whole project, a lump sum amount is noted in **Table 7**.

10 Lodge.C, *RE: 19-03-043: Forrestfield DCP: Any further adjustments to costs to the Berkshire /Ashby intersection*, 11 June 2020, email to Cook. M, <mcook@portereng.com.au>

Table 7: Berkshire Road and Ashby Close Intersection Cost Review Summary

Description	Mastersheet Amount	Actual Project Amount to 11 June 2020	Outstanding costs	Project Costs to completion	Variance
Total project costs exc GST	**$210,614**	$268,042	$8,729	$276,771	*($66,157)*

The project cost variance between the Mastersheet estimated value of $210,614 and the project costs to completion of $276,771, is $66,157, 31% greater than the Mastersheet value.

Future reviews of the DCP costs should include any further costs that may arise during the defects liability period which concludes on November 2020.

8.0 DUNDAS ROAD, BERKSHIRE ROAD AND MILNER ROAD INTERSECTION

The works at the intersection of Dundas Road, Berkshire Road, and Milner Road have been designed for a 19m long semi-trailer turning movement, with relevant drawings included in **Attachment 12**.

The intersection construction works were completed in December 2019, and is currently within the 12 months defects liability period. **Table 8** notes the project costs as of 11 June 2020 for including investigations, construction, professional fees and charges. The City has noted a $5000 allowance towards any works that may be required during the defect liability period.

Due to the complexity of cost allocations across the whole project, a lump sum amount is noted in **Table 8**.

Table 8: Dundas Road, Berkshire Road and Milner Road Cost Review Summary

Description	Mastersheet Amount	Actual Project Amount to 11 June 2020	Outstanding costs	Project Costs to completion	Variance
Total project costs exc GST	**$1,159,269**	$955,233	$5,000	$960,233	*$199,036*

The project cost variance between the Mastersheet amount of $1,159,268 and the project costs to completion of $960,233, is $199,036, being 83% less than the Mastersheet amount.

Future reviews of the DCP costs should include any further costs that may arise during the defects liability period which concludes on December 2020.

9.0 BONSER ROAD

Bonser Road will be a newly constructed road providing a connection between Nardine Close and Berkshire Road. The following items are noted in the DCP report for the Bonser Road scope:

- A 10m wide carriageway kerb to kerb,
- Drainage swales within the road verges,

- A 1.8m wide footpath in the northern verge,
- Intersections to accommodate a category RAV7 vehicle,
- Supply and installation of street trees.

The City of Kalamunda has provided engineering drawings prepared by RSA Consulting Engineers for Bonser Road, which are included in **Attachment 13.** The drawings have been approved by the City and utilised for tendering purposes as reported by the City[11].

Bonser Road construction will be divided into two stages:

1) The construction of Bonser Road with the exception of road works (truncations) impacting Lots 16 and 17 Berkshire Road. This first stage would result in a road that is not to a standard suitable for a category RAV7 vehicle. The acquisition of truncations for Lots 16 and 17 Berkshire Road is required in order to facilitate the full construction of an intersection for RAV 7 vehicles.
2) Following the acquisition of truncations from Lots 16 and 17 Berkshire Road, upgrades to bring the intersections up to a standard suitable for category RAV7 vehicles will be undertaken.

The first stage of construction works commenced in January 2020 and achieved Practical Completion in June 2020. The second stage will follow the acquisition of truncations from Lots 16 and 17 Berkshire Road.

The City has provided costs to Bonser Road based on received tender prices presented in the Mastersheet included in **Attachment 14**. Attempts have been made to group cost headings to be appropriate to the Mastersheet headings as presented in **Table 9**.

The amounts do not make allowance for land acquisition costs related to lot 16 and lot 17 Berkshire Road.

Table 9: Bonser Road Cost Review Summary

Description	Mastersheet Amount	Amounts based on tender prices (provided by the City)	Variance
Preliminaries	20,706	44,974	*5,167*
Survey Control & Testing	17,255		
Clearing and Demolition	12,180		
Earthworks	52,456	312,248	*(67,772)*
Roadworks	192,020		
Stormwater Drainage	0	30,792	*(30,792)*
Miscellaneous	88,452	$42,823	*45,629*
Stage 2: For construction of truncations once land is acquired from Lots 16 and 17 Berkshire Road	0	70,038	*(70,038)*
Sub Total excl. GST	**$383,069**	**$500,874**	*(117,805)*
Allowances and Charges	$102,280	$86,783	*15,497*
Total excl. GST	**$485,350**	**$587,657**	*(102,307)*

11 Lodge. C, RE: *19-03-043:: Forrestfield North DCA with Porter's comments*, email to Cook.M, 30 January 2020, <mcook@portereng.com.au>

The cost estimate variance between the Mastersheet value of $485,350 and the amount based on tender prices of $587,657, is $102,307 being 21% greater than the Mastersheet value.

Subsequent DCA reviews of Bonser Road should include the final construction costs along with any changes to fees or charges, and consideration for land acquisition costs.

10.0 CONCLUSION

The body of this document outlines in greater detail the assumptions, considerations and differences noted in a review of estimated costs of infrastructure included in the DCP. However, in brief, the following conclusions are noted below and should be reviewed further for addressing in future review of the DCP and design development of the respective road.

10.1 Berkshire Road

In relation to the scope of works discussed above the City may wish to consider:

- Make an application to Western Power to design and quote for the conversion of the overhead lines to underground that cross Berkshire Road for a RAV route.
- Investigate and prepare designs for any internal electrical works (if required) from the new Western Power pillar to the consumer switchboard.
- Preparing 100% design documentation for the installation of the 2m wide footpath along the northern verge.
- Prepare designs for the shared path along the southern verge of Berkshire Road, and secure funding from the Department of Transport.

10.2 Bonser Road

Future reviews of the DCP costs should include the final construction costs and any costs that may arise during the defects liability period.

10.3 Milner Road

Prepare 100% design status drawings and seek approvals from Authorities. Due to the high pressure gas main and underground transmission cables, approvals should be expedited early with ATCO Gas and Western Power due to typically long approval times.

10.4 Nardine Close

The City is to make a determination on whether Stage 2 works are to occur, or if the establishment of a permanent cul-de-sac by the lot 308/lot 51 boundary is to take pace. And incorporate the outcome in future reviews of the DCP.

10.5 Sultana Road West

a) Prepare 100% status design drawings and seek approvals from Authorities.

b) Allow sufficient time for Western Power to prepare the detailed design for the removal of the existing power pole #132866. Western Power also require 12 weeks advance notice to schedule the works once the construction quote has been paid by the proponent. The pole will need to be removed in advance of the intersection works.

c) Undertake early liaison with the land owners of lot 90 Milner Road, High Wycombe for the acquisition of the required land for the kiosk (1.9m deep by 2.4m wide) and substation (3m deep by 4.5m wide) to facilitate the removal of the existing power pole #132866.

d) Undertake early liaison with lot owners for approval for the installation of stay poles that front the respective properties to facilitate the removal of the existing power pole #132866.

e) Undertake early liaison with the owner of 4 Brand Road for the acquisition of approximately 350m^2 to facilitate the cul-de-sac.

f) Undertake early liaison with the owner of lot 1563 (H85) Milner Road to allow for a batter approximately 1m in height and extending 3m into the property as part of works to the Milner Road / Sultana Road West intersection. If the owner does not grant approval for the batter, consideration could be had for a panel and post retaining wall, or land acquisitions.

g) As part of ongoing design development for Sultana Road West, early discussions should be had with Telstra and NBN to provide quotes:

   i. Adjustment of pit lids along the length of road to suit finished levels.

h) Obtain quotes from the Water Corporation for the relocation of existing valves by the intersection, and adjustment of valve and hydrant lids along the road to suit finished levels.

i) The DCP report indicates that 50% of the roadwork upgrade costs will be borne by the DCP. The City should review how the remaining funding is secured as this is not clear in the DCP report.

10.6 Milner Road and Nardine Close intersection

Future reviews of the DCP costs should include any costs that may arise during the defects liability period which would be expected to be negligible.

10.7 Berkshire Road and Ashby Close intersection

Future reviews of the DCP costs should include any costs that may arise during the defects liability period which would be expected to be negligible.

10.8 Dundas Road, Berkshire Road and Milner Road intersection

Future reviews of the DCP costs should include any costs that may arise during the defects liability period which would be expected to be negligible.

Attachment 1:
Local Structure Plan

Structure Plan Notes
Subdivision and Strata Titling Requirements

General

1. Berkshire Road / Milner Road / Dundas Road is a full movement intersection.

Lot Size

2. Industrial subdivision is to meet the requirements of the Scheme and WAPC Policy DC4.1 – Industrial Subdivision unless otherwise specified.
3. The following minimum lot sizes apply to any subdivision within the Structure Plan area:
   a. Lot 50 Sultana Road West - 3,000m², subject to:
      i. The construction of Road 2A;
      ii. Minimum lot frontage of 30m; and
      iii. Compliance with all development requirements of this Structure Plan.
   b. All other lots within the Structure Plan area - approximately one (1) hectare.

Battleaxe Development

4. No battleaxe subdivision will be supported unless otherwise depicted on the Structure Plan Map.
5. Single or shared battleaxe legs are not permitted to service industrial development on existing Lots 50, 51 and 308 Sultana Road West and Lots 305, 306 and 307 Ashby Close. Approval to non-residential development is contingent on securing direct access to a constructed public road.
6. No further subdivision will be permitted on Lots 50, 51 and 308 Sultana Road West and Lots 305, 306 and 307 Ashby Close based on a shared battleaxe leg access arrangement.

Industrial Strata Titling

7. Industrial unit strata titling will only be supported in circumstances where a management statement is imposed as a condition of strata approval to the satisfaction of the City that ensures appropriate management arrangements and ongoing compliance with all development criteria as contained with the Scheme, this Structure Plan, any supporting planning policy or design guidelines, or any other requirements specified by the City.

Development Criteria and Requirements

Land Use Permissibility

8. Although the permissibility of uses is as set out in Table 1 in the Scheme, the Structure Plan intent is to facilitate land uses that take advantage of the lands strategic location in respect to major transport infrastructure, including Perth Airport, Roe Highway and Tonkin Highway. On this basis, logistics and other transport based industries are preferred land uses to take advantage of the lands locational attributes.
9. When considering development applications for 'D' and 'A' uses under the Scheme, due regard will be given to the extent that the proposed use supports the Structure Plan intent in accordance with 8 above and the requirements relating to Lot 50 Sultana Road West as specified below.

Built Form

10. In addition to the requirements of the Scheme, any applicable planning policy and design guidelines, any wall or building facing any street is to be painted or otherwise treated to ensure an appropriate standard of visual amenity to the satisfaction of the City.
11. In addition to the requirements of the Scheme, any applicable planning policy and design guidelines, service areas, bin and storage areas and services such as air conditioners and other machinery are to be screened such that they are not visible from the street.

Vehicle Access and Movement

12. Vehicular access for non-residential development is not permitted via existing battleaxe legs.
13. Vehicular access for all non-residential development is to be taken directly from a gazetted and constructed public road.
14. In addition to the requirements of the Scheme, any applicable planning policy and design guidelines, internal driveways and car parks are to be designed to ensure slow speeds. Lengths of driveway or car parks exceeding 50 metres are to incorporate speed control devices including minor level changes.
15. In regard to Lot 50 Sultana Road West, vehicle access from Sultana Road West shall be permitted for residential purposes only. All other vehicle access shall be from Road 2A (Nardine Close Extension).
16. Vehicle access at the intersection of Ashby Close and Berkshire Road will be restricted to left in, left out only.

Pedestrian Movement and Amenity

17. In addition to the requirements of the Scheme, any applicable planning policy and design guidelines, footpaths are to be provided connecting car parking areas to buildings to the satisfaction of the City.

Landscaping

18. In addition to the requirements of the Scheme, any applicable planning policy and design guidelines, landscaping is to be provided within any development site of a sufficient quality to ensure an attractive well-landscaped environment.
19. Landscaping within car parks throughout the Structure Plan area is to be in accordance with the requirements of the Scheme, any applicable planning policy and design guidelines.
20. In addition to the requirements of the Scheme, any applicable planning policy and design guidelines, the tree species implemented, when not used for screening purposes, shall be of a type having high branch free stems to facilitate surveillance and visibility of building fronts and with a large canopy to achieve adequate shading of car parking areas.

Signage

21. In addition to the requirements of the Scheme, any applicable planning policy and design guidelines, signage is to relate directly to the building containing the use or service and any associated products for advertising purposes, and is not to be excessive or unnecessary. Third party signage is not permitted.

Energy Efficiency

22. In addition to the requirements of the Scheme, any applicable planning policy and design guidelines, building openings should be orientated to benefit from passive climatic heating and cooling opportunities to reduce fixed energy consumption.
23. In addition to the requirements of the Scheme, any applicable planning policy and design guidelines, all new buildings should incorporate energy saving design and technology where practical to do so.

Design Guidelines

24. For additional development criteria and requirements applicable in the Structure Plan area, refer to the Forrestfield/High Wycombe Industrial Area Design Guidelines.

Development Requirements for Lot 50 Sultana Road West, High Wycombe

25. Any development on lots created under the provisions of 3 above is required to demonstrate compliance with the following composite Residential / Light Industry provisions:
   a. The land within 30 metres of the front lot boundary, taken from Sultana Road West, shall be used for residential purposes only.
   b. Notwithstanding the provisions contained within the Structure Plan, any development for residential purposes, shall be subject to those provisions of the Scheme relating to the Residential Zone and State Planning Policy 3.1 – Residential Design Codes (R5).
   c. Any development for the light industrial component of the composite land uses shall be subject to those provisions of the Scheme relating to the Light Industry Zone.
   d. Any development for light industrial purposes shall be subject to the provisions of the Forrestfield / High Wycombe Industrial Area Design Guidelines Local Planning Policy.
   e. The lot shall not be developed or used for light industry purposes unless a dwelling is built to plate height first.
   f. Vehicle access from Sultana Road West shall be permitted for residential purposes only. All other vehicle access shall be from Road 2A (Nardine Close Extension).

26. Any light industrial development which does not form part of a composite residential/light Industrial subdivision and development in 3(a)(i) and 25 above, shall be subject to those provisions of the Scheme relating to the Light Industry Zone and the Forrestfield / High Wycombe Industrial Area Design Guidelines Local Planning Policy.

Bushfire

27. Any development requires assessment in accordance with State Planning Policy 3.7 – Planning in Bushfire Prone Areas, which may take the form of a bushfire management plan.

Noise Attenuation for Residential Land Uses

28. Any residential land uses are required to noise attenuation in accordance with State Planning Policy 5.4 – Road and Rail Transport Noise and Freight Considerations in Land Use Planning.

Developer Contributions

29. Developer contributions within this Structure Plan are as set out in Schedule 12 – Development Contribution Areas of the City of Kalamunda Local Planning Scheme No. 3.

Structure Plan

Forrestfield/High Wycombe Industrial Area

LEGEND

- Structure Plan Boundary
- Metropolitan Region Scheme Reserve - Parks and Recreation
- Local Planning Scheme No. 3 - Industrial Development Zone
- Local Planning Scheme No. 3 - Special Use Zone - Composite
- Existing Road

SECTION 1 INTRODUCTION

1.1 SCOPE AND ASSUMPTIONS

We understand that the City of Kalamunda is considering the use of Berkshire Road as a RAV7 vehicle thoroughfare between Milner Road and Roe Highway.

This report shall provide information on the existing electrical networks within this road reserve and inform of any likely vehicle traffic obstructions. Lastly, it will provide an order of cost estimates for the required works to remove these obstructions to provide unrestricted clearance for RAV7 vehicles.

In accordance with Main Roads WA's Standard Restricted Access Vehicle Route Assessment Guidelines, RAV routes must provide adequate overhead clearance for a load/vehicle height of 4.6m:

- With 300mm clearances to overhead obstructions (except power lines)
- Power lines – at least the minimum clearance required by telecommunications and electrical transmission cable providers

The vehicle clearance to overhead aerials assessment in the below sections have been completed on this basis.

SECTION 2 ELECTRICAL SERVICES

2.1 EXISTING POWER DISTRIBUTION NETWORK

The existing Western Power (WP) distribution infrastructure in the vicinity of the site comprises of a 22kV three phase High Voltage (HV) and three phase Low Voltage (LV) aerial and underground network.

HV and LV aerials primarily exist along the western side of Berkshire Road running in a southeast to northwest direction. The aerial network supplies power to several commercial/light industrial premises located on the eastern side via aerial consumer cables. Existing stay wires supporting the current pole arrangements also cross over Berkshire Road. Possible clearances issues for RAV7 vehicles travelling through Berkshire Road are identified below.

2.2 POSSIBLE OVERHEAD CLEARANCE ISSUES

The following electrical infrastructure crossing over Berkshire Road has been identified:

Electrical Asset
Pole S132830 – Consumer Aerials
Pole S122686 – Consumer Aerials
Pole S122688 – Consumer Aerials
Pole S122689 – Consumer Aerials
Pole S122696 – Consumer Aerials
Pole S122698 – Stay Wire

Refer to Figure 1 in the Appendix for the location of the aforementioned electrical assets.

With conductors/wire crossing over Berkshire Road, a possible hazard exists for RAV7 vehicles in terms of vehicle clearance to aerials and therefore unrestricted access may not be provided.

2.3 OVERHEAD AERIAL VEHICLE CLEARANCE ASSESSMENT

A power line survey in accordance to Western Power's Survey Brief has been conducted by BCE Spatial. From the data collected, a preliminary assessment of vehicle to aerial conductor clearance can be completed. The following conclusion can be deducted from the survey points gathered.

Electrical Asset	Asset Survey Point ¾ Span (AHD)	Ground Survey Point (AHD)	Asset to Ground Clearance
Pole S132830 – Consumer Aerials	34.739	29.404	5.33m
Pole S122686 – Consumer Aerials	34.390	29.056	5.33m
Pole S122688 – Consumer Aerials	34.734	29.405	5.32m
Pole S122689 – Consumer Aerials	34.974	29.665	5.30m
Pole S122696 – Consumer Aerials	37.874	32.878	4.99m
Pole S122698 – Stay Wire	41.149	33.8210	7.32m

The ¾ span survey point produces the lowest clearance over the roadway and has therefore been used in this assessment.

Danger zones for live electrical apparatus are prescribed in Section 3.64 of the Occupational Safety and Health Regulations 1996. No person, plant or materials shall enter the danger zone of any electrical network asset. With consumer aerials insulated and less than 1000 volts, a danger zone of 0.5m is applicable. Western Power policies however inform of a greater danger zone of 1m for overhead powerlines up to 1000 volts. No clarifications were provided during discussion with Western Power and therefore the more stringent requirement of 1m is to be applied.

Overhead line clearance calculations involve a more complex process than reviewing surveyed points. Special situations such as sag and blowout are to be considered and are to be based off the Service Authority's design parameters. For Western Power, such design parameters are of their intellectual property and therefore calculations can only be completed by Western Power however it has been advised that they do not assess clearances on consumer aerial conductors.

Based on the above, the following conclusions can be made:

Electrical Asset	Asset to Ground Clearance	Load/Vehicle Height	Vehicle to Asset Clearance	Within Danger Zone
Pole S132830 – Consumer Aerials	5.33m	4.6m	0.73m	Yes
Pole S122686 – Consumer Aerials	5.33m	4.6m	0.73m	Yes
Pole S122688 – Consumer Aerials	5.32m	4.6m	0.72m	Yes
Pole S122689 – Consumer Aerials	5.30m	4.6m	0.70m	Yes
Pole S122696 – Consumer Aerials	4.99m	4.6m	0.33m	Yes
Pole S122698 – Stay Wire	7.32m	4.6m	2.72m	No

All consumer aerial conductors need to be undergrounded to provide unrestricted access for RAV7 vehicles.

With the tension of stay wires, sag and blowout does not play a factor and therefore this asset should pose no obstruction to vehicles of 4.6m height.

2.4 LIKELY POWER SUPPLY SCENARIO AND OPTIONS

Western Power has confirmed that they will not consider the use of taller consumer poles to raise the height of consumer aerials as they do not own the poles and therefore an underground conversion solution will only be presented. In an Industrial/commercial lot, this is implemented by WP owned and maintained URD 3-phase direct buried underground cabling from Western Power's LV network to uni-pillars serving each lot on the general basis of one uni-pillar per industrial/commercial lot.

The following options are available to the City:

1.) For temporary arrangement: Oversize Load Movement Application
    a. Submit application to WP in advance of planned vehicle movement
    b. Western Power to assess if the load can travel safely and advise what special conditions are required.
    c. Where possible, Western Power will consider the temporary disconnection and reconnection of consumer aerials as the vehicle passes through. This will require approval from affected consumers.
    d. In some cases, substantial planning and/or construction works are required (e.g. undergrounding powerlines). In these cases, Western Power will quote on the work required and therefore there are potential delays to allow for design and construction.

2.) For a permanent arrangement: Overhead to Underground Power Conversion Application
    a. Submit application to Western Power for the undergrounding conversion of consumer mains to provide unrestricted vehicle movement in the future
    b. With this type of application, WP to design and construct
    c. Note: MRWA & Western Power's Transporting Oversize Loads processes will still need to be followed.

SECTION 3 BUDGET ESTIMATES

3.1 ELECTRICAL SERVICES

For Option 2, we understand that the Network Augmented Costs for the overhead to underground supply conversion will be charged at Western Power's full cost method.

Our very early pre-design, pre-feasibility study order of probable cost estimates for the underground conversion of five overheard consumer supplies is in the order of $75k.

WP scope to include the following:

- Western Power to design and complete overhead to underground conversion as per consultant's site plan
- WP to design to include:
    - Removal of existing consumer aerials
    - Installation of new underground cable from pole to new pillar supply
    - Installation of new pillar supply

3.2 QUALIFICATIONS AND EXCLUSIONS

The above preliminary cost estimate excludes surveyor costs (pegging of lot boundaries and proposed pillar locations), switchboard upgrades/replacement, private cabling from customer switchboard to new pillar supply, design fees and consultant costs.

An electrical contractor is to be engaged for the new internal private wiring from the existing switchboard to the new pillar supply. A site audit may be required to determine if any additional works are required for the reconnection works to comply with current standards. For these reasons, an estimate for the reconnection works have been excluded in the above cost estimate.

Existing Western Power distribution poles appears to be in good order and suitable for new cable terminations, therefore the assumption has been made that no existing poles will require replacing. This cost has been excluded from the estimate.

We confirm that the budgets presented are indicative only. If the reader intends to use these costs for financial purposes they should be satisfied that they are adequate. 3E Consulting Engineers does not accept liability or responsibility for their interpretation or use.

HIGH PRESSURE GAS NOTES

HIGH PRESSURE GAS MAIN IN VICINITY. CONTRACTOR SHALL ALLOW FOR ALL WORKS ASSOCIATED IN PROTECTING THE HIGH PRESSURE MAIN INCLUDING ALL SUPERVISION ALLOWANCES. CONTRACTOR SHALL LIAISE DIRECT WITH RELEVANT GAS AUTHORITY PRIOR TO COMMENCING ANY WORKS.

NO WORK OF ANY TYPE WITHIN 15m OF ANY HIGH PRESSURE GAS INFRASTRUCTURE WITHOUT PRIOR APPROVAL FROM ATCO GAS AUSTRALIA.

DURING THE PERIOD OF THE WORKS, ANY EXCAVATION WORKS WITHIN 5m OF THE HP MAIN WILL REQUIRE SUPERVISION FROM AN APPROVED LOCATOR. PLEASE CONTACT HP ENQUIRIES hpenquiries@atco.com / 1300 926 755

NO MACHINERY IS PERMITTED TO BE USED TO EXCAVATE WITHIN 1m OF THE HP MAIN - ONLY NON-DESTRUCTIVE METHODS SUCH AS HAND-DIGGING OR VACUUM EXCAVATION ARE PERMITTED.

A MINIMUM CLEARANCE OF 300mm IS NECESSARY FOR SERVICES CROSSING PARALLEL TO THE HP MAIN. THE MINIMUM CLEARANCE FOR CONCRETE MAINS IS 500mm.

ALL COMPACTION OF THE AFFECTED AREA MUST BE IN ACCORDANCE WITH SECTION 5.8.2 OF THE 'ADDITIONAL INFORMATION FOR WORKING AROUND GAS INFRASTRUCTURE (REVISION 11, 26-09-2018)' WITHIN THE TECHNICAL SPECIFICATION.

NOTE

ALL EXCAVATIONS CLOSER THAN 3000mm TO THE CABLE/TRENCH FOUNDATION (OR CONDUIT) SHALL BE CARRIED OUT BY HAND DIGGING OR VACUUM EXCAVATION. SPECIAL CARE TO BE UNDERTAKEN DUE TO THE COMMUNICATION CABLE, WHICH MAY BE INSTALLED ABOVE THE TRANSMISSION CABLE CONCRETE SLAB.

CROSSING UNDER THE CABLES ENSURE THAT THERE IS NO DISTURBANCE TO TRENCH FOUNDATION AND MAINTAIN A MINIMUM OF 500mm FROM THE BOTTOM MOST EDGE OF THE CEMENTITIOUS MATERIAL.

MECHANICAL EXCAVATION SHALL ONLY BE PERMITTED FOR EXCAVATION DOWN TO A MAXIMUM OF 250mm REMOVING THE BITUMEN AND ROAD BASE

PARALLEL TRENCHING - MAINTAIN A MINIMUM OF 1m FROM THE OUTER EDGE OF THE CABLE, ENSURING THAT THERE IS NO DISTURBANCE TO THE CABLE OR ITS FOUNDATION. SHORING MAY BE REQUIRED.

3. **THE CONTRACTOR SHALL CO-ORDINATE THE LOCATION OF ALL EXISTING AND PROPOSED SERVICES PRIOR TO COMMENCEMENT OF WORK. ANY CONFLICTS SHALL BE REPORTED TO THE ENGINEER IMMEDIATELY.**
4. ALL WORKS SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE PROJECT SPECIFICATION, BUT WHERE NO DETAIL PROVIDED, TO THE REQUIREMENTS OF THE LOCAL AUTHORITY.
5. CONTRACTOR SHALL PROVIDE ALL SIGNING, LIGHTING AND FLAGMEN NECESSARY TO ENSURE SAFETY OF THE PUBLIC AND OF THE WORKS.
6. LOCATE ALL LEVELS FROM EXISTING SURVEY MARKS. ALL SURVEY MARKS SHALL BE PROTECTED.
7. EXISTING VERGES SHALL NOT BE DISTURBED BEYOND THE EXTENT OF WORK.
8. ALL FILL SHALL BE CLEAN NON-PLASTIC MATERIAL FREE FROM VEGETATION AND OTHER DELETERIOUS MATERIAL AND CERTIFIED AS SUITABLE FOR RESIDENTIAL LAND USE.
9. ALL FILL SHALL BE PLACED IN UNIFORM LAYERS NOT EXCEEDING 300mm THICKNESS AND COMPACTED TO A DENSITY NOT LESS THAN 95% MAXIMUM DRY DENSITY.
10. CONTRACTOR SHALL TIE IN NEW SURFACE TO FINISH FLUSH WITH EXISTING SURFACE.
11. ALL EDGE KERBING SHALL BE SEMI-MOUNTABLE (SMK) UNLESS OTHERWISE NOTED. TRANSITIONS BETWEEN DIFFERENT KERBS SHALL BE OVER 2m.
12. SIGN POSTS AND STREET NAME PLATES SHALL BE SUPPLIED AND INSTALLED TO LOCAL AUTHORITY REQUIREMENTS. CONTRACTOR SHALL FIT STREET NAME PLATES TO ADJACENT LIGHT POLES WHERE APPROPRIATE.
13. THE CONTRACTOR SHALL SPOT OUT THE LINE MARKING. THE CONTRACTOR SHALL ADVISE MAIN ROADS WHEN THE SITE IS READY FOR LINE MARKING AND SIGNAGE INSTALLATION. LINE MARKING AND SIGNAGE SHALL BE UNDERTAKEN BY MAIN ROADS.
14. THE CONTRACTOR SHALL PREPARE AS-CONSTRUCTED ROADS AND PATH DRAWINGS (INCLUDING SURVEY) TO THE SATISFACTION OF THE LOCAL AUTHORITY. AS-CONSTRUCTED PLANS SHALL BE ISSUED TO THE ENGINEER FOR SIGNING AND PRESENTATION TO THE LOCAL AUTHORITY.
15. THE CONTRACTOR SHALL PREPARE AND PROVIDE ROAD AND PATH AS-CONSTRUCTED DOCUMENTS IN 'R' SPEC FORMAT AS PER LOCAL AUTHORITY REQUIREMENTS.
16. IT IS DEEMED THAT THE AS-CONSTRUCTED DOCUMENTS FORM PART OF THE WORKS. PRACTICAL COMPLETION CAN NOT BE AWARDED IF ACCEPTABLE AS-CONSTRUCTED DOCUMENTS HAVE NOT BEEN PROVIDED TO THE ENGINEER.
17. THE CONTRACTOR SHALL LIAISE WITH PTA (Transperth.ServiceDisruptions@pta.wa.gov.au) AT LEAST 14 DAYS PRIOR TO WORKS COMMENCING SO THAT PTA CAN ARRANGE DEVIATIONS OF SERVICES (IF NECESSARY), TEMPORARY STOP LOCATIONS, AND RE-INSTALL THE BUS STOP POST. THE CONTRACTOR SHALL COORDINATE THE WORKS WITH PTA.

PATH NOTES

1. ALL FOOTPATHS AND PEDESTRIAN RAMPS SHALL BE CONSTRUCTED TO LOCAL AUTHORITY STANDARDS. ALL MATERIAL USED SHALL BE IN ACCORDANCE WITH LOCAL AUTHORITY SPECIFICATION.
2. THE CONTRACTOR SHALL PROTECT ALL EXISTING WORKS, AND SUPPLY AND MAINTAIN ALL SAFETY DEVICES TO PROTECT VEHICLES, PEDESTRIANS AND THE WORKS.
3. UNLESS OTHERWISE SHOWN, ALL FOOTPATHS SHALL BE 1.8m WIDE LOCATED AGAINST BACK OF KERB.
4. UNLESS OTHERWISE SHOWN, ALL SHARED USE PATHS SHALL BE 2.5m WIDE LOCATED AGAINST BACK OF KERB.
5. UNLESS OTHERWISE SHOWN, ALL JOINTS SHALL BE SPACED IN ACCORDANCE WITH THE LOCAL AUTHORITY REQUIREMENTS. IF NOT AVAILABLE , THEY SHALL BE AS PER THE IPWEA REQUIREMENTS. JOINTS SHALL TIE IN WITH KERB JOINTS.
6. EXPANSION JOINT TO BE PROVIDED AT ANY SIGNIFICANT CHANGE IN WIDTH AND DIRECTION OR WHERE ADJACENT TO SOLID OBJECT, OTHERWISE AT MAX SPACING OF 4.0m.
7. PRIOR TO PLACING CONCRETE THE BASE SHALL BE FREE FROM DELETERIOUS MATERIAL, UNIFORMLY COMPACTED TO 95% MAXIMUM DRY DENSITY AND LIGHTLY DAMPENED.
8. ALL CONCRETE WORK SHALL DEVELOP A MINIMUM COMPRESSIVE STRENGTH OF 32 MPa AT 28 DAYS, UNLESS OTHERWISE NOTED.
9. THE FINAL SURFACE SHALL BE BROOM FINISHED AND ALL EDGES AND JOINTS TOOL FINISHED.
10. CONTRACTOR SHALL PROTECT THE FINISHED WORK FOR 24 HOURS AFTER THE CONCRETE HAS BEEN LAID, ANY DAMAGE SHALL BE MADE GOOD AT THE CONTRACTORS EXPENSE.

HIGH PRESSURE GAS NOTES

HIGH PRESSURE GAS MAIN IN VICINITY. CONTRACTOR SHALL ALLOW FOR ALL WORKS ASSOCIATED IN PROTECTING THE HIGH PRESSURE MAIN INCLUDING ALL SUPERVISION ALLOWANCES. CONTRACTOR SHALL LIAISE DIRECT WITH RELEVANT GAS AUTHORITY PRIOR TO COMMENCING ANY WORKS.

NO WORK OF ANY TYPE WITHIN 15m OF ANY HIGH PRESSURE GAS INFRASTRUCTURE WITHOUT PRIOR APPROVAL FROM ATCO GAS AUSTRALIA.

DURING THE PERIOD OF THE WORKS, ANY EXCAVATION WORKS WITHIN 5m OF THE HP MAIN WILL REQUIRE SUPERVISION FROM AN APPROVED LOCATOR. PLEASE CONTACT HP ENQUIRIES hpenquiries@atco.com / 1300 926 755

NO MACHINERY IS PERMITTED TO BE USED TO EXCAVATE WITHIN 1m OF THE HP MAIN - ONLY NON-DESTRUCTIVE METHODS SUCH AS HAND-DIGGING OR VACUUM EXCAVATION ARE PERMITTED.

A MINIMUM CLEARANCE OF 300mm IS NECESSARY FOR SERVICES CROSSING PARALLEL TO THE HP MAIN. THE MINIMUM CLEARANCE FOR CONCRETE MAINS IS 500mm.

ALL COMPACTION OF THE AFFECTED AREA MUST BE IN ACCORDANCE WITH SECTION 5.8.2 OF THE 'ADDITIONAL INFORMATION FOR WORKING AROUND GAS INFRASTRUCTURE (REVISION 11, 26-09-2018)' WITHIN THE TECHNICAL SPECIFICATION.

NOTE

OPTIC FIBRE CABLE IN VICINITY OF WORKS. CONTRACTOR SHALL CONTACT THE RELEVANT AUTHORITY AT LEAST TWO (2) BUSINESS DAYS BEFORE STARTING ACTIVITY.

NOTE

ALL EXCAVATIONS CLOSER THAN 3000mm TO THE CABLE/TRENCH FOUNDATION (OR CONDUIT) SHALL BE CARRIED OUT BY HAND DIGGING OR VACUUM EXCAVATION. SPECIAL CARE TO BE UNDERTAKEN DUE TO THE COMMUNICATION CABLE, WHICH MAY BE INSTALLED ABOVE THE TRANSMISSION CABLE CONCRETE SLAB.

CROSSING UNDER THE CABLES ENSURE THAT THERE IS NO DISTURBANCE TO TRENCH FOUNDATION AND MAINTAIN A MINIMUM OF 500mm FROM THE BOTTOM MOST EDGE OF THE CEMENTITIOUS MATERIAL.

MECHANICAL EXCAVATION SHALL ONLY BE PERMITTED FOR EXCAVATION DOWN TO A MAXIMUM OF 250mm REMOVING THE BITUMEN AND ROAD BASE

PARALLEL TRENCHING - MAINTAIN A MINIMUM OF 1m FROM THE OUTER EDGE OF THE CABLE, ENSURING THAT THERE IS NO DISTURBANCE TO THE CABLE OR ITS FOUNDATION. SHORING MAY BE REQUIRED.

NOTE

CONTRACTOR SHALL LOCALLY ADJUST PATH CROSSFALL TO TIE IN NEATLY TO EXISTING SERVICE PIT LIDS. ENSURE PATH GRADES TOWARDS ROAD SO THAT NO PONDING OCCURS.

- GP — GRATED GULLY PIT

NOTE

ALL DRAINAGE PITS WITHIN THE AREA OF WORK ARE TO BE CLEANED AND FREE OF DEBRIS.

DRAINAGE NOTES

1. **THE CONTRACTOR SHALL CO-ORDINATE THE LOCATION OF ALL EXISTING AND PROPOSED SERVICES PRIOR TO COMMENCEMENT OF WORK. ANY CONFLICTS ARE TO BE REPORTED TO THE ENGINEER IMMEDIATELY.**
2. **SERVICES, SUCH AS SEWER, WATER, GAS, TELEPHONE, ELECTRICITY, AND DRAINAGE MAY BE ENCOUNTERED DURING CONSTRUCTION OF THE WORKS. SERVICES INFORMATION SHOWN ON DRAWINGS IS INDICATIVE ONLY AND MAY NOT BE COMPLETE. BEFORE EXCAVATION COMMENCES THE LOCATION OF ALL SUCH SERVICES SHALL BE OBTAINED FROM THE RELEVANT AUTHORITIES.**
3. THE CONTRACTOR SHALL CHECK INVERT LEVELS OF ALL EXISTING STORMWATER PRIOR TO COMMENCEMENT OF WORK. THE CONTRACTOR SHALL NOTIFY THE ENGINEER ON ANY DISCREPANCIES.
4. ALL WORKS SHALL BE TO THE PROJECT SPECIFICATION, BUT WHERE NO DETAIL IS PROVIDED, TO THE REQUIREMENTS OF THE LOCAL AUTHORITY.
5. DRAINAGE PIPE LENGTHS ARE INDICATIVE ONLY, MANHOLES & GULLIES SHALL BE LOCATED AS SHOWN AND SETOUT IN ACCORDANCE WITH THE STANDARD DETAILS.
6. EXCAVATION SHALL BE KEPT TO A MINIMUM AND TRENCHES SUPPORTED.
7. PIPES SHALL BE LAID ON THE PREPARED BASE OF THE TRENCH, TO A UNIFORM GRADE AT DESIGN LEVELS.
8. THE CONTRACTOR SHALL PILE AND KEEL IN SOFT GROUND AND WHERE DRAINS CROSS EXISTING SERVICES.
9. ALL PIPES SHALL BE CLASS (2) UNLESS OTHERWISE NOTED. THE CONTRACTOR SHALL NOTIFY THE ENGINEER WHERE MIN. COVER CAN NOT BE ACHIEVED. MINIMUM COVER ON DRAINAGE TO BE 900mm UNDER ROAD AND 600mm IN VERGE UNLESS OTHERWISE NOTED.
10. PIPES SHALL BE LAID OBVERT TO OBVERT TAKEN FROM THE CENTRE OF THE PITS UNLESS OTHERWISE NOTED.
11. FILLING SHALL BE CLEAN NONPLASTIC MATERIAL FREE FROM STONES OR CLAY LUMPS. EXCAVATED MATERIAL SHOULD BE USED WHERE POSSIBLE. FILLING SHALL BE PLACED IN HORIZONTAL LAYERS NOT EXCEEDING 150mm IN THICKNESS AND COMPACTED TO ACHIEVE A DENSITY NOT LESS THAN 95% MAXIMUM DRY DENSITY.
12. THE CONTRACTOR SHALL PREPARE AS-CONSTRUCTED DRAINAGE DRAWINGS (INCLUDING SURVEY) TO THE SATISFACTION OF THE LOCAL AUTHORITY. AS CONSTRUCTED PLANS TO BE ISSUED TO THE ENGINEER FOR SIGNING AND PRESENTATION TO THE LOCAL AUTHORITY.
13. THE CONTRACTOR SHALL PREPARE AND PROVIDE DRAINAGE AS CONSTRUCTED DOCUMENTS IN 'D' SPEC FORMAT AS PER LOCAL AUTHORITY REQUIREMENTS
14. IT IS DEEMED THAT THE AS-CONSTRUCTED DOCUMENTS FORM PART OF THE WORKS. PRACTICAL COMPLETION CAN NOT BE AWARDED IF ACCEPTABLE AS-CONSTRUCTED DOCUMENTS HAVE NOT BEEN PROVIDED TO THE ENGINEER.
15. AS NOTED IN THE FORRESTFIELD NORTH RESIDENTIAL PRECINCT LWMS (STRATEGEN-JBS&G, MAY 2020), TO SUPPORT THE FUTURE RESIDENTIAL PRECINCT (EAST OF SULTANA ROAD WEST), A 600mm DIA. DRAINAGE PIPE IS NOTED TO BE REQUIRED FROM THE CORNER OF SULTANA ROAD WEST / MILNER ROAD INTERSECTION THROUGH TO THE BASIN BY MILNER ROAD / DUNDAS ST, AS IS SUBJECT TO FURTHER INVESTIGATION.

SITEWORKS NOTES

1. VERTICAL DATUM : AUSTRALIAN HEIGHT DATUM.
   HORIZONTAL DATUM : PERTH COASTAL GRID 1994 PCG94
2. EXISTING SURVEY/CONTOURS FROM SITE SURVEY BY BROOK AND MARSH
3. **SERVICES, SUCH AS SEWER, WATER, GAS, TELEPHONE, ELECTRICITY, AND DRAINAGE MAY BE ENCOUNTERED DURING CONSTRUCTION OF THE WORKS. SERVICES INFORMATION SHOWN ON DRAWINGS IS INDICATIVE ONLY AND MAY NOT BE COMPLETE. BEFORE EXCAVATION COMMENCES THE LOCATION OF ALL SUCH SERVICES SHALL BE OBTAINED FROM THE RELEVANT AUTHORITIES BY THE CONTRACTOR.**
4. **THE CONTRACTOR SHALL CO-ORDINATE THE LOCATION OF ALL EXISTING AND PROPOSED SERVICES PRIOR TO COMMENCEMENT OF WORK. ANY CONFLICTS ARE TO BE REPORTED TO THE ENGINEER IMMEDIATELY.**
5. THE CONTRACTOR SHALL PROVIDE A SAFE WORKING ENVIRONMENT FOR THE DURATION OF THE WORKS. CONTRACTOR SHALL HAVE IN PLACE A PROJECT SAFETY AND RISK MANAGEMENT SYSTEM WHICH COMPLIES WITH THE OCCUPATIONAL SAFETY AND HEALTH ACT AND WORK SAFE WA REQUIREMENTS
6. THE CONTRACTOR SHALL LIMIT ACCESS TO THE WORKS TO THE SITEWORKS BOUNDARY. EXISTING VEGETATION OUTSIDE OF BOUNDARY TO BE PROTECTED.
7. THE CONTRACTOR SHALL PREPARE AND IMPLEMENT A DUST MANAGEMENT PLAN IN ACCORDANCE WITH THE DEPARTMENT OF ENVIRONMENT AND CONSERVATIONS GUIDELINES. THE CONTRACTOR SHALL PAY ALL FEES AND OBTAIN ALL APPROVALS FROM THE LOCAL AUTHORITY FOR THIS DUST MANAGEMENT PLAN PRIOR TO ANY WORKS STARTING ON SITE.
8. THE CONTRACTOR SHALL INSTALL TEMPORARY SITE FENCING WITH DUST CONTROL FABRIC AND MAINTAIN FOR DURATION OF WORKS.
9. DUST SUPPRESSION METHODS SHALL BE APPLIED BY THE CONTRACTOR IN ACCORDANCE WITH THE SPECIFICATION.
10. ALL TREES SHALL REMAIN UNDISTURBED SPECIFICALLY NOTED ON THE PLANS OR ADVISED BY THE ENGINEER
11. THE CONTRACTOR SHALL REMOVE FROM SITE ALL RUBBISH (ie: CAR BODIES, DRUMS, ETC.) WITHIN SITEWORKS BOUNDARY TO AN APPROVED DISPOSAL SITE.
12. ALL SHEDS, INTERNAL FENCES, HARDSTAND AREAS, IRRIGATION PIPES AND SIMILAR STRUCTURES ON-SITE SHALL BE REMOVED BY THE CONTRACTOR AND DISPOSED OFFSITE UNLESS OTHERWISE NOTED.
13. THE CONTRACTOR SHALL COMPLETE ALL WORKS AS REQUIRED IN THE GEOTECHNICAL REPORT IN ACCORDANCE WITH THE REQUIREMENTS OF THE GEOTECHNICAL REPORT.

CONTRACTOR TO LAY 403m OF 150P-12

CONNECTION

CONNECTIONS (1) TO BE MADE BY WATER CORPORATION

GENERAL NOTES

1. ALL WORKS SHALL BE CONSTRUCTED IN ACCORDANCE WITH WATER CORPORATION MANUALS AND STANDARDS.
2. **SERVICES, SUCH AS SEWER, WATER, GAS, TELEPHONE, ELECTRICITY, AND DRAINAGE MAY BE ENCOUNTERED DURING CONSTRUCTION OF THE WORKS. SERVICES INFORMATION SHOWN ON DRAWINGS IS INDICATIVE ONLY AND MAY NOT BE COMPLETE. BEFORE EXCAVATION COMMENCES THE LOCATION OF ALL SUCH SERVICES SHALL BE OBTAINED FROM THE RELEVANT AUTHORITIES.**
3. **CO-ORDINATE THE LOCATION OF ALL EXISTING AND PROPOSED SERVICES PRIOR TO COMMENCEMENT OF WORK. ANY CONFLICTS ARE TO BE REPORTED TO THE ENGINEER IMMEDIATELY.**
4. UNLESS OTHERWISE SHOWN ALL DIMENSIONS ARE IN METRES.
5. ALL PIPES SHALL BE INSTALLED TO WITHIN 3.5m OF EXISTING MAIN. CONNECTION TO EXISTING BY WATER CORPORATION TO BE ORGANISED BY CONTRACTOR.
6. UNLESS OTHERWISE DIRECTED BY THE ENGINEER, COVER REQUIREMENTS SHALL COMPLY WITH THE WATER CORPORATION STANDARDS.
7. MINIMUM CLEARANCE TO GAS = 300mm, MINIMUM CLEARANCE TO OTHER SERVICES = 150mm.
8. ALL WORKS SHALL BE IN DRY GROUND. GROUND WATER SHALL NOT BE PERMITTED TO ENTER PIPES.
9. UNLESS OTHERWISE SHOWN ON THIS DRAWING OR VARIED BY THE ENGINEER ALL PIPES AND FITTINGS SHALL BE LAID ON AN ALIGNMENT OF 2.1m FROM THE CENTRE OF THE PIPE TO THE ROAD RESERVE BOUNDARY.
10. FLUSHING POINTS SHALL BE INSTALLED ON ALL MAINS AT CONNECTION POINTS TO EXISTING MAINS OR WHERE SPECIFIED.
11. CONTRACTOR SHALL INSTALL FLUSHING POINTS AT ALL DEAD ENDS.
12. UNLESS DIMENSIONED OTHERWISE, MAINS SHALL EXTEND AT LEAST 8m ALONG THE FRONT OF LAST LOT SERVED.
13. ALL VALVES SHALL BE OPPOSITE BOUNDARY PEGS UNLESS DIMENSIONED OTHERWISE, ALL HYDRANTS SHALL BE POSITIONED IN THE MIDDLE OF LOTS OR OPPOSITE BOUNDARY PEGS AS SHOWN.
14. SERVICE CROSSINGS SHALL BE LOCATED AT RIGHT ANGLES TO BOUNDARY AND INSTALLED IN ACCORDANCE WITH THE REQUIREMENTS OF THE WATER CORPORATION.
15. THE CONTRACTOR SHALL ALLOW FOR ALL AS CONSTRUCTED INFORMATION (INCLUDING SURVEY) TO BE PLOTTED IN ACCORDANCE WITH THE WATER CORPORATIONS CURRENT PRACTICE AND DELIVERED TO THE ENGINEER FOR SIGNING AND PRESENTATION TO THE WATER CORPORATION.
16. IT IS DEEMED THAT THE AS CONSTRUCTED DOCUMENTS FORM PART OF THE WORKS. PRACTICAL COMPLETION CAN NOT BE AWARDED IF ACCEPTABLE AS CONSTRUCTED DOCUMENTS HAVE NOT BEEN PROVIDED TO THE ENGINEER.

ROAD NOTES

1. VERTICAL DATUM : AUSTRALIAN HEIGHT DATUM (AHD)
   HORIZONTAL DATUM : PERTH COASTAL GRID 1994 (PCG94)
2. **SERVICES, SUCH AS SEWER, WATER, GAS, TELEPHONE, ELECTRICITY, AND DRAINAGE MAY BE ENCOUNTERED DURING CONSTRUCTION OF THE WORKS. SERVICES INFORMATION SHOWN ON DRAWINGS IS INDICATIVE ONLY AND MAY NOT BE COMPLETE. BEFORE EXCAVATION COMMENCES THE LOCATION OF ALL SUCH SERVICES SHALL BE OBTAINED FROM THE RELEVANT AUTHORITIES.**
3. **THE CONTRACTOR SHALL CO-ORDINATE THE LOCATION OF ALL EXISTING AND PROPOSED SERVICES PRIOR TO COMMENCEMENT OF WORK. ANY CONFLICTS ARE TO BE REPORTED TO THE ENGINEER IMMEDIATELY.**
4. ALL WORKS TO BE CONSTRUCTED IN ACCORDANCE WITH THE PROJECT SPECIFICATION, BUT WHERE NO DETAIL PROVIDED, TO THE REQUIREMENTS OF THE LOCAL AUTHORITY.
5. CONTRACTOR SHALL PROVIDE ALL SIGNING, LIGHTING AND FLAGMEN NECESSARY TO ENSURE SAFETY OF THE PUBLIC AND OF THE WORKS.
6. LOCATE ALL LEVELS FROM EXISTING SURVEY MARKS. ALL SURVEY MARKS ARE TO BE PROTECTED.
7. EXISTING VERGES SHALL NOT BE DISTURBED BEYOND THE EXTENT OF WORK.
8. ALL FILL SHALL BE CLEAN NON PLASTIC MATERIAL FREE FROM VEGETATION AND OTHER DELETERIOUS MATERIAL AND CERTIFIED AS SUITABLE FOR RESIDENTIAL LANDUSE.
9. ALL FILL SHALL BE PLACED IN UNIFORM LAYERS NOT EXCEEDING 300mm THICKNESS AND COMPACTED TO A DENSITY NOT LESS THAN 95% MAXIMUM DRY DENSITY.
10. CONTRACTOR SHALL TIE IN OF NEW SURFACE TO FINISH FLUSH WITH EXISTING SURFACE.
11. ALL EDGE KERBING SHALL BE MOUNTABLE UNLESS OTHERWISE NOTED.
12. SIGN POSTS AND STREET NAME PLATES TO BE SUPPLIED AND INSTALLED TO LOCAL AUTHORITY REQUIREMENTS. CONTRACTOR SHALL FIT STREET NAME PLATES TO ADJACENT LIGHT POLES WHERE APPROPRIATE.
13. THE CONTRACTOR SHALL SPOT OUT THE LINE MARKING. THE CONTRACTOR SHALL ADVISE MAIN ROADS WHEN THE SITE IS READY FOR LINEMARKING AND SIGNAGE INSTALLATION. LINE MARKING AND SIGNING TO BE UNDERTAKEN BY MAIN ROADS.
14. THE CONTRACTOR SHALL PREPARE AS-CONSTRUCTED ROADS AND PATH DRAWINGS (INCLUDING SURVEY) TO THE SATISFACTION OF THE LOCAL AUTHORITY. AS CONSTRUCTED PLANS TO BE ISSUED TO THE ENGINEER FOR SIGNING AND PRESENTATION TO THE LOCAL AUTHORITY.
15. THE CONTRACTOR SHALL PREPARE AND PROVIDE ROAD AND PATH AS CONSTRUCTED DOCUMENTS IN 'R' SPEC FORMAT AS PER LOCAL AUTHORITY REQUIREMENTS
16. IT IS DEEMED THAT THE AS CONSTRUCTED DOCUMENTS FORM PART OF THE WORKS. PRACTICAL COMPLETION CAN NOT BE AWARDED IF ACCEPTABLE AS CONSTRUCTED DOCUMENTS HAVE NOT BEEN PROVIDED TO THE ENGINEER.

PATH NOTES

1. ALL FOOTPATHS AND PEDESTRIAN RAMPS SHALL BE CONSTRUCTED TO LOCAL AUTHORITY STANDARD. ALL MATERIAL USED SHALL BE IN ACCORDANCE WITH LOCAL AUTHORITY STANDARD SPECIFICATION
2. THE CONTRACTOR SHALL PROTECT ALL EXISTING WORKS, AND SUPPLY AND MAINTAIN ALL SAFETY DEVICES TO PROTECT VEHICLES, PEDESTRIANS AND THE WORKS
3. UNLESS OTHERWISE SHOWN, ALL FOOTPATHS SHALL BE 1.5m WIDE WITH A 0.3m OFFSET FROM THE ROAD RESERVE BOUNDARY. FOOTPATHS ADJACENT TO RETAINING WALLS TO BE 1.8m WIDE AND LOCATED ON THE ROAD RESERVE BOUNDARY.
4. UNLESS OTHERWISE SHOWN, ALL DUAL USE PATHS TO BE 2.1m WIDE WITH A 0.3m OFFSET FROM THE ROAD RESERVE BOUNDARY. DUAL USE PATHS ADJACENT TO RETAINING WALLS TO BE 2.4m WIDE AND LOCATED ON THE ROAD RESERVE BOUNDARY.
5. UNLESS OTHERWISE SHOWN, ALL JOINTS SHALL BE SPACED IN ACCORDANCE WITH THE LOCAL AUTHORITY REQUIREMENTS. IF NOT AVAILABLE , THEY SHALL BE AS PER THE IPWEA REQUIREMENTS. JOINTS TO TIE IN WITH KERB JOINTS.
6. PRIOR TO PLACING CONCRETE THE BASE SHALL BE FREE FROM DELTERIOUS MATERIAL, UNIFORMLY COMPACTED TO 95% MAXIMUM DRY DENSITY AND LIGHTLY DAMPENED.
7. ALL CONCRETE WORK SHALL DEVELOP A MINIMUM COMPRESSIVE STRENGTH OF 32 MPa AT 28 DAYS.
8. THE FINAL SURFACE SHALL BE BROOM FINISHED AND ALL EDGES AND JOINTS TOOL FINISHED.
9. CONTRACTOR SHALL PROTECT THE FINISHED WORK FOR 24 HOURS AFTER THE CONCRETE HAS BEEN LAID, ANY DAMAGE SHALL BE MADE GOOD AT THE CONTRACTORS EXPENSE.

CLIENT: **CITY OF KALAMUNDA**

DRAWING: **STANDARD DETAILS PLAN**

STATUS: **FOR TENDER**

SCALE	AS ABOVE
DATE	OCT 2016
DESIGN	BIH
DRAWN	MJV
CHECK	
DRAWING No.	16-9-116/600
REV No.	0
ORIGINAL DRAWING SIZE	A1
FILE NAME	S:\ACTIVE PROJECTS\16-09-116\ACAD\169116-600.dwg

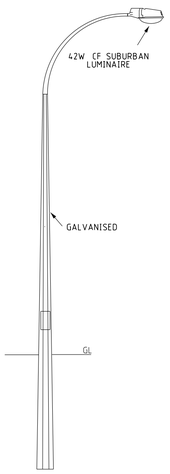
CONTRACTOR NOTES:

1. DRAWING TO BE READ IN CONJUNCTION WITH CONTRACT DRAWINGS AND SPECIFICATIONS.
2. ALL WORKS TO BE COMPLETED IN LINE WITH WESTERN POWER POLICIES, INCLUDING THE UDS, WADCM, DDC, DSM, DCSH, UCIM AND EARTHING FAQ.
3. VERIFY ALL MATERIAL QUANTITIES AGAINST SITE CONDITIONS PRIOR TO QUOTATION AND ADVISE ELECTRICAL CONSULTANTS OF ANY VARIATIONS.
4. SHOW CAUTION IN PROXIMITY TO EXISTING ASSETS. ALWAYS REFER TO CURRENT DBYD DRAWINGS.POTHOLE TO LOCATE IF NECESSARY.PROTECT SERVICES AS REQUIRED.APPLY FOR NECESSARY VICINITY ACCESS PERMITS AND OUTAGES WHERE REQUIRED.DO NOT ENCROACH MINIMUM APPROACH DISTANCES FOR UNDERGROUND OR OVERHEAD ASSETS.
5. LIAISE WITH WESTERN POWER AS REQUIRED.ORGANISE PRE-HANDOVER INSPECTION AND ENERGISATION SCHEDULE WITH WESTERN POWER PRIOR TO COMPLETION OF WORKS. WHERE REQUIRED FOR COMPLEX INTERFACE PROJECTS, ORGANISE A PRE-START SITE MEETING WITH WESTERN POWER.
6. ARRANGE WITH 3E FOR ELECTRONIC AS CONSTRUCTED DRAWING COMPLETION AND SUBMISSION TO WESTERN POWER.
7. MAKE ALLOWANCE FOR TERRACING OF CABLES WHERE REQUIRED, INCLUDING FOR ROAD CROSSINGS.
8. CLEAN BEDDING SAND TO BE IMPORTED FOR CABLE TRENCHES WHERE EXISTING MATERIALS DO NOT MEET WP REQUIREMENTS.
9. PLAN CABLE RUNS TO LIMIT THE NUMBER OF STRAIGHT JOINTS.
10. COMMENCE LAYING CABLES FROM THE TRANSFORMER, SWITCHGEAR OR UNIVERSAL PILLAR.
11. ALL CABLES LAID NEXT TO RETAINING WALLS TO BE IN CONDUIT.
12. INSTALL HEATSHRINK "END CAP" AT ALL CABLE ENDS.
13. INSTALL HEATSHRINK GLOVES ON ALL LV CABLE TERMINATION ENDS.
14. STREETLIGHT POLES MUST NOT BE INSTALLED IN FOOTPATHS,PEG POLES LOCATIONS PRIOR TO INSTALL AND NOTIFY 3E OF CLASHES IN ADVANCE.
15. ERECT LIGHT POLES ONLY AFTER NEARBY EXISTING OVERHEAD POWERLINES ARE REMOVED, WHERE NOTED.
16. BORE UNDER EXISTING ROADS.
17. CONTRACTOR TO LEAVE SUFFICIENT CABLE COILED AT ALL INTERFACE POINTS (INCLUDING JOINTS,PILLAR TERMINATIONS & POLE TERMINATIONS) TO ALLOW WP TO COMPLETE INTERFACE WORKS. INSTALL END CAPS TO PROTECT CABLE.
18. HV FEEDER CABLES TO BE INSTALLED AT MINIMUM COVER OF 1120mm, TO ALLOW REQUIRED SEPARATIONS TO BE ACHIEVED TO FUTURE LV CABLES.

WESTERN POWER SCOPE OF WORKS

(A) WP TO COST TO CARRY OUT TERMINATION OF NEW 240LV CABLE TO UNI PILLAR LOT 4 AND CONFIGURE AS SHOWN. WP TO SUPPLY ALL MATERIALS AND CARRY OUT ALL ASSOCIATED WORKS.

(B) WP TO COST TO CARRY OUT TERMINATION OF NEW 16SL CABLE TO UNI PILLAR LOT 4. WP TO SUPPLY ALL TERMINATION AND CARRY OUT ALL ASSOCIATED WORKS.



WP STANDARD 6.5m SINGLE OUTREACH POLE
NOT TO SCALE

NOTE:
6.5m STANDARD SINGLE OUTREACH POLE WITH SUBURBAN 42W CF LAMP TO BE GALVANISED

ALL STREETLIGHT CABLE TO BE IN CONDUIT IF OUTSIDE WP ALIGNMENT.

WP STREETLIGHTS TO BE LOCATED IN-LINE WITH COMMON LOT BOUNDARY ON 2.7m ALIGNMENT, UNLESS NOTED OTHERWISE.

STREETLIGHT POLE LOCATION

WP STREETLIGHTS ON STREET CORNERS TO BE LOCATED EQUIDISTANT FROM TRUNC POINTS, 2.7m FROM LOT BOUNDARY, UNLESS NOTED OTHERWISE.

STREETLIGHT POLE LOCATION - CORNERS

ARROW DENOTES DIRECTION TO PEG WITH WHICH DUCTS ARE TO BE ALIGNED

DUCTS TO BE LAID TO WP SPECIFICATION AS OUTLINED IN UNDERGROUND DISTRIBUTION SCHEMES MANUAL - POLICY AND INSTALLATION OPTIONS

DENOTES PREVIOUSLY REQUESTED DUCTS

Dimensions and scales to be checked prior to measuring cable lengths

DRAWING TITLE:
ASHBY CLOSE & SULTANA ROAD
HIGH WYCOMBE, STAGE 1
NBN PIT AND PIPE LAYOUT
ROAD WAY EXTENSION

DESIGN DATE: 07-12-2016	STATE: WA	REGION: PCG94	
BASE FILE DATE: 09-03-2017	FSA: N/A	SAM: N/A	ADA: N/A
WAPC No(s): "vvvvvv"	PROJECT No: AYCA-4A7VBV		
LOCAL AUTHORITY: SHIRE OF KALAMUNDA	CADREF No: 3E16144-11		
CIVIL CONSULTANT: PORTER CONSULTING ENGINEERS	SCALE 1:500	SHEET No. 1 OF 3	REV. B

GENERAL NOTES

1. REFER TO CIVIL ENGINEERS DRAWINGS FOR SERVICES TRENCH ALIGNMENT DETAILS
2. ALL COMMUNICATION WORKS TO BE UNDERTAKEN IN ACCORDANCE WITH NBN CO. DOCUMENT NBN-TE-CTO-194 "NEW DEVELOPMENTS: DEPLOYMENT OF THE NBN CO. CONDUIT AND PIT NETWORK – GUIDELINES FOR DEVELOPERS". NBN CO. GUIDELINES ARE AVAILABLE AT http://www.nbnco.com.au » Industry » Property Developers » Technical Guidelines
3. ON GAZETTED ROAD RESERVES NBN NETWORK CONDUIT TO BE INSTALLED ON THE 900mm ALIGNMENT WITH ALL NBN PLANT WITHIN THE 500-1300mm ALIGNMENT. IN SITUATIONS WHERE THERE ARE DUAL NETWORKS (NEW OR EXISTING, e.g. TELSTRA) THE NBN CONDUIT IS TO BE INSTALLED ON THE 1100mm ALIGNMENT. WHERE THE PRESCRIBED ALIGNMENT IS UNAVAILABLE, LIAISE WITH CIVIL CONSULTANT
4. ALL CONDUITS PIPES & LEAD-INS TO BE SEALED AND FITTED WITH DRAW ROPE
5. INSTALLATION OF AN IDENTIFICATION TAPE IS NOT REQUIRED
6. MINIMUM DEPTH OF COVER FOR CONDUITS SHOULD BE IN ACCORDANCE WITH NBN-TE-CTO-194, AS FOLLOWS
   - 450mm MINIMUM COVER IN ROAD VERGE
   - 600mm MINIMUM COVER FOR LATERAL ROAD CROSSINGS
   - 650mm MINIMUM COVER ON PRIVATE PROPERTY FOR LEAD-IN/SERVICE DROP PIPE
7. CONDUIT AND PIPE SIZES ARE TO CONFORM TO AS1477 TABLE 4.2(A):
   - P20 NOMINAL = 23.7mm MEAN ID, 26.8mm MEAN OD
   - P50 NOMINAL = 53.7mm MEAN ID, 60.4mm MEAN OD
   - P100 NOMINAL = 104.6mm MEAN ID, 114.3mm MEAN OD
8. LEAD IN/SERVICE DROP P23 NOMINAL FOR SINGLE RESIDENTIAL PROPERTIES, P50 NOMINAL FOR SMALL MDUs OR COMMERCIAL AND P100 NOMINAL FOR LARGE MDUs AND MEDIUM RISE BUILDINGS
9. CONDUIT BENDS SHOULD COMPLY WITH NBN-TE-CTO-194 BUT RADII SHOULD NOT BE LESS THAN
   - P20 (P23) LEAD-IN 300mm
   - P50 LEAD-IN 300mm
   - P50 ROAD CROSSING 500mm
   - P100 TRUNCATION/ROAD CROSSING 800mm (NO 90° BENDS PERMITTED ON P100 CONDUITS)
10. MINIMUM RADIAL CLEARANCES SHOULD BE MAINTAINED BETWEEN CONDUIT & OTHER PUBLIC UTILITIES, IN ACCORDANCE WITH NBN-TE-CTO-194 - SEE TRENCH CROSS SECTION DETAIL
11. FDH STARTER CONDUIT TO BE LOCATED SUCH THAT FDH IS SET BACK 5m FROM ANY INTERSECTION AND 1.2m FROM ANY BACK OF KERB. TYPE 9 PIT & STARTER PIPE TO BE INSTALLED BY CONTRACTOR. FDH & CONCRETE PLINTH TO BE INSTALLED BY OTHERS
12. PITS TO BE SET BACK
    - 5m FROM ANY INTERSECTION BACK OF KERB (BOK)
    - 1m FROM BOK ON ROAD VERGE WHERE PRACTICAL
    - 1m FROM STREETLIGHTS AND POWER POLES
    - 200mm FROM DRIVEWAYS MINIMUM, WITH 500mm OR GREATER SETBACK PREFERRED
    - 500mm FROM PARKING BAY BOK
    - BARRIER KERBS REQUIRED WHERE LESS THAN 1m SET BACKS FROM BOK UTILISED
13. ALL READILY ACCESSIBLE PLANT, SUCH AS PITS AND FDH'S, TO BE INSTALLED OUTSIDE EPR ZONES, TO COMPLY WITH NBN-TE-CTO-194, COMMUNICATIONS ALLIANCE GUIDELINES G645:2011, C524-2013 AND AS 3835.1
14. NBN CO DO NOT REQUIRE SERVICE EASEMENTS OVER ABOVE OR BELOW GROUND EQUIPMENT ON POS. SOME SHIRES OR TOWN COUNCILS MAY REQUIRE SERVICE EASEMENTS
15. PIT TO PIT DISTANCES SHOWN ARE APPROXIMATE ONLY
16. PITS ARE NOT TO BE INSTALLED ON DRIVEWAYS OR IN ROADWAYS
17. NO RISERS/COLLARS TO BE UTILISED ON PITS (e.g. A RISER CAN NOT BE USED IN CONJUCTION WITH A TYPE 6 PIT TO CREATE A TYPE 8 PIT)
18. PIT LIDS ARE TO BE LABELLED "NBN" WITH INDIVIDUAL LIDS WEIGHING NO MORE THAN 38kg AND WITH THE WEIGHT SHOWN ON THE LID IN ACCORDANCE WITH AS3996-2006 6.1.
19. THE INTEGRITY OF ALL CONDUIT/PIPE TO BE TESTED WITH AN 80% MANDREL

POP — PRIVATELY OPERATED PAYPHONES

APS — ASSISTANCE TELEPHONES (EG ELEVATOR AND ROADSIDE PHONES)

MET — APPLY TO OTHER TYPE OF METERING POINT (any service)

ATM — ATM

PRK — BANDSTAND / ROTUNDA / SPORTS FIELD STANDS / OTHER PARK BUILDING

PSD — POINT OF SALE DEVICE (vending machine, ticket machine)

TRF — Traffic Lights / Traffic Light Controller / Variable Speed Sign / Traffic Signal

PBT — Public Transport (bus stop, tram stop, railway station, taxi rank, ferry wharf)

SWT — Links / Link Pole / MV / HV Links / ABC Links / Dynamic Switch / Airbrake Switch / Isolator

WAT — Water Infrastructure (storage, pumps, valves water supply, waste water, sewerage stations)

GAS — Natural Gas Infrastructure

CAM — Camera (security / traffic)

CTL — Bridge control, swing bridge, traffic control gates, railway boom gates)

MOB — Mobile Phone Tower / radio antenna

LIT — Street Lighting Pole / street light controller

CAR — Unmanned (council) car park

PWR — Transformer / Kiosk / Pad Mount Sub-station / Pole Mount Transformer

NAP-ID N — Network Access Point (NAP)

MPT-ID N — Multiport (MPT)
n is the number of ports (eg 4,6,8,12)

TJL-ID — Splice Joint on a Transit Cable (TJL)

DJL-ID — Splice Joint on a Distribution Cable (DJL)

LJL-ID — Splice Joint on a Local Cable (LJL)

MJL-ID — Splice Joint on a Tether Cable (MJL)

AJL-ID — Zone Terminal / Splice Joint (AJL)

FDH-ID — Fibre Distribution Hub-FDH Cabinet with Cabinet ID shown

PIT-ID 2 — Service Drop Access Pit (650mmX280mmX565mm)

PIT-ID 5 — Network Boundary/Local Network Pit (Single Lid) (700mmX450mmX650mm)

PIT-ID 6 — Distribution/Local Network Connection Pit (Dual Lid) (1360mmX555mmX650mm)

PIT-ID 8 — Distribution/Local Network Connection Pit (1360mmX555mmX860mm)

PIT-ID 9 — Fibre Distribution Hub (FDH) Pit (2000mmX555mmX900mm)

Existing Telstra manhole

5 — Existing Telstra Pit (2,3,4,5,6,7,8,9)

Telstra exchange

Example of Telstra Major Conduit Layout with Proposed duct marked to be used by NBN

M < _ > — NBN MARKER POST
MARKER POST TO BE NUMBERED

DES / QTY — Example of descriptor box that will show the type of work and the quantity involved

PCD — Premise Connection Device (PCD)

POLE-ID — Pole (showing pole identity)

FAN AAAA — Fan Access Node site (FAN)

138A RX CX — Multi Dwelling Unit (MDU)

DEPTH —
ALIGN — DEPTH OVER ALIGNMENT SYMBOL TO BE USED WITH EVERY MARKER POST

Symbol to be used when replacing/removing existing network

CABLE TRAY:

CONDUIT CONFIGURATION

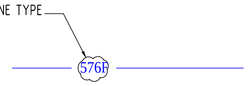
CONDUITS AND DUCTS ARE IN LAYER :
< L460 NBN Support - Underground >
AND TERMINOLOGY CATEGORIZED INTO TWO GROUPS IN THE DRAWING AS PER BELOW:
1- DUCT — USED WITH LOCAL NETWORK
2-CONDUIT — USED WITH LEAD-IN DROPS
ATTRIBUTES ATTACHED ARE AS SHOWN

CABLE CONFIGURATION

CABLE TYPE:
CABLES DIVIDE INTO FOLLOWING CATEGORIES AND ARE COLOUR CODED:

TRANSIT CABLES	COLOUR NO: 1	312F
DISTRIBUTION CABLES	COLOUR NO: 190	288F
LOCAL CABLES	COLOUR NO: 4	144F
TETHER CABLES	COLOUR NO: 3	12F
LEAD IN (DROP) CABLES	COLOUR NO: 5	1F

CABLE SIZE:
CABLE SIZE IS THE TOTAL NUMBER OF OPTIC FIBRES IN THE CABLE AND IS DETERMINED BY A NUMBER FOLLOWED BY F (FIBRE) OR R (RIBBON) IN THE MIDDLE OF THE LINE TYPE



CABLE LOCATION:
CABLE LOCATIONS DETERMINES WHERE THE CABLE IS USED AS PER BELOW:

IN-CONDUIT	288F
AERIAL	144F
BURIED	96F

LINE TYPES ARE CATEGORIZED INTO 3 TYPES:
1- IN-CONDUIT: DXXXF1 312F _ ...
2- AERIAL: DXXXF_A1 144_A _ ...
3- BURIED: DXXXF_B1 12_B _ ...

EXAMPLE:

144 FIBRE AERIAL LOCAL CABLE	144F
1 FIBRE BURIED DROP CABLE	1F 1F
432 FIBRE IN-CONDUIT TRANSIT CABLE	48F

1. VERTICAL DATUM : AUSTRALIAN HEIGHT DATUM.
   HORIZONTAL DATUM : PERTH COASTAL GRID 1994 PCG94
2. EXISTING SURVEY/CONTOURS FROM SITE SURVEY BY BROOK AND MARSH
3. **SERVICES, SUCH AS SEWER, WATER, GAS, TELEPHONE, ELECTRICITY, AND DRAINAGE MAY BE ENCOUNTERED DURING CONSTRUCTION OF THE WORKS. SERVICES INFORMATION SHOWN ON DRAWINGS IS INDICATIVE ONLY AND MAY NOT BE COMPLETE. BEFORE EXCAVATION COMMENCES THE LOCATION OF ALL SUCH SERVICES SHALL BE OBTAINED FROM THE RELEVANT AUTHORITIES BY THE CONTRACTOR.**
4. **THE CONTRACTOR SHALL CO-ORDINATE THE LOCATION OF ALL EXISTING AND PROPOSED SERVICES PRIOR TO COMMENCEMENT OF WORK. ANY CONFLICTS ARE TO BE REPORTED TO THE ENGINEER IMMEDIATELY.**
5. THE CONTRACTOR SHALL PROVIDE A SAFE WORKING ENVIRONMENT FOR THE DURATION OF THE WORKS. CONTRACTOR SHALL HAVE IN PLACE A PROJECT SAFETY AND RISK MANAGEMENT SYSTEM WHICH COMPLIES WITH THE OCCUPATIONAL SAFETY AND HEALTH ACT AND WORK SAFE WA REQUIREMENTS
6. THE CONTRACTOR SHALL LIMIT ACCESS TO THE WORKS TO THE SITEWORKS BOUNDARY. EXISTING VEGETATION OUTSIDE OF BOUNDARY TO BE PROTECTED.
7. THE CONTRACTOR SHALL PREPARE AND IMPLEMENT A DUST MANAGEMENT PLAN IN ACCORDANCE WITH THE DEPARTMENT OF ENVIRONMENT AND CONSERVATIONS GUIDELINES. THE CONTRACTOR SHALL PAY ALL FEES AND OBTAIN ALL APPROVALS FROM THE LOCAL AUTHORITY FOR THIS DUST MANAGEMENT PLAN PRIOR TO ANY WORKS STARTING ON SITE.
8. THE CONTRACTOR SHALL INSTALL TEMPORARY SITE FENCING WITH DUST CONTROL FABRIC AND MAINTAIN FOR DURATION OF WORKS.
9. DUST SUPPRESSION METHODS SHALL BE APPLIED BY THE CONTRACTOR IN ACCORDANCE WITH THE SPECIFICATION.
10. ALL TREES SHALL REMAIN UNDISTURBED SPECIFICALLY NOTED ON THE PLANS OR ADVISED BY THE ENGINEER
11. THE CONTRACTOR SHALL REMOVE FROM SITE ALL RUBBISH (ie: CAR BODIES, DRUMS, ETC.) WITHIN SITEWORKS BOUNDARY TO AN APPROVED DISPOSAL SITE.
12. ALL SHEDS, INTERNAL FENCES, HARDSTAND AREAS, IRRIGATION PIPES AND SIMILAR STRUCTURES ON-SITE SHALL BE REMOVED BY THE CONTRACTOR AND DISPOSED OFFSITE UNLESS OTHERWISE NOTED.
13. THE CONTRACTOR SHALL COMPLETE ALL WORKS AS REQUIRED IN THE GEOTECHNICAL REPORT IN ACCORDANCE WITH THE REQUIREMENTS OF THE GEOTECHNICAL REPORT.
14. THE CONTRACTOR SHALL REMOVE REDUNDANT CROSSOVERS AND CONSTRUCT KERB TO MATCH EXISTING, VERGE TO BE MADE GOOD.

CONNECTION

CONNECTIONS (1) TO BE MADE BY WATER CORPORATION

GENERAL NOTES

1. ALL WORKS SHALL BE CONSTRUCTED IN ACCORDANCE WITH WATER CORPORATION MANUALS AND STANDARDS.
2. **SERVICES, SUCH AS SEWER, WATER, GAS, TELEPHONE, ELECTRICITY, AND DRAINAGE MAY BE ENCOUNTERED DURING CONSTRUCTION OF THE WORKS. SERVICES INFORMATION SHOWN ON DRAWINGS IS INDICATIVE ONLY AND MAY NOT BE COMPLETE. BEFORE EXCAVATION COMMENCES THE LOCATION OF ALL SUCH SERVICES SHALL BE OBTAINED FROM THE RELEVANT AUTHORITIES.**
3. **CO-ORDINATE THE LOCATION OF ALL EXISTING AND PROPOSED SERVICES PRIOR TO COMMENCEMENT OF WORK. ANY CONFLICTS ARE TO BE REPORTED TO THE ENGINEER IMMEDIATELY.**
4. UNLESS OTHERWISE SHOWN ALL DIMENSIONS ARE IN METRES.
5. ALL PIPES SHALL BE INSTALLED TO WITHIN 3.5m OF EXISTING MAIN. CONNECTION TO EXISTING BY WATER CORPORATION TO BE ORGANISED BY CONTRACTOR.
6. UNLESS OTHERWISE DIRECTED BY THE ENGINEER, COVER REQUIREMENTS SHALL COMPLY WITH THE WATER CORPORATION STANDARDS.
7. MINIMUM CLEARANCE TO GAS = 300mm, MINIMUM CLEARANCE TO OTHER SERVICES = 150mm.
8. ALL WORKS SHALL BE IN DRY GROUND. GROUND WATER SHALL NOT BE PERMITTED TO ENTER PIPES.
9. UNLESS OTHERWISE SHOWN ON THIS DRAWING OR VARIED BY THE ENGINEER ALL PIPES AND FITTINGS SHALL BE LAID ON AN ALIGNMENT OF 2.1m FROM THE CENTRE OF THE PIPE TO THE ROAD RESERVE BOUNDARY.
10. FLUSHING POINTS SHALL BE INSTALLED ON ALL MAINS AT CONNECTION POINTS TO EXISTING MAINS OR WHERE SPECIFIED.
11. CONTRACTOR SHALL INSTALL FLUSHING POINTS AT ALL DEAD ENDS.
12. UNLESS DIMENSIONED OTHERWISE, MAINS SHALL EXTEND AT LEAST 8m ALONG THE FRONT OF LAST LOT SERVED.
13. ALL VALVES SHALL BE OPPOSITE BOUNDARY PEGS UNLESS DIMENSIONED OTHERWISE, ALL HYDRANTS SHALL BE POSITIONED IN THE MIDDLE OF LOTS OR OPPOSITE BOUNDARY PEGS AS SHOWN.
14. SERVICE CROSSINGS SHALL BE LOCATED AT RIGHT ANGLES TO BOUNDARY AND INSTALLED IN ACCORDANCE WITH THE REQUIREMENTS OF THE WATER CORPORATION.
15. THE CONTRACTOR SHALL ALLOW FOR ALL AS CONSTRUCTED INFORMATION (INCLUDING SURVEY) TO BE PLOTTED IN ACCORDANCE WITH THE WATER CORPORATIONS CURRENT PRACTICE AND DELIVERED TO THE ENGINEER FOR SIGNING AND PRESENTATION TO THE WATER CORPORATION.
16. IT IS DEEMED THAT THE AS CONSTRUCTED DOCUMENTS FORM PART OF THE WORKS. PRACTICAL COMPLETION CAN NOT BE AWARDED IF ACCEPTABLE AS CONSTRUCTED DOCUMENTS HAVE NOT BEEN PROVIDED TO THE ENGINEER.

P.E. NOTES

1. IN CUL-DE-SACS WHERE P.E. MAINS ARE DEFLECTED TO SUIT CADASTRAL BOUNDARY CHANGES IN DIRECTION, THE ALIGNMENT OF MAINS SHALL BE 2.1m +/- 0.3m THIS TOLERANCE SHALL ONLY APPLY IN THE VICINITY OF TRUNCATION POINTS AT ALL OTHER LOCATIONS THE MAINS SHALL BE LAID ON THE 2.1m ALIGNMENT.
2. POLYETHYLENE PIPE SHALL BE M.D.P.E.
3. WHERE A P.E. MAIN IS CONNECTED TO A PVC MAIN THE TAPPING BAND SHALL BE MANUFACTURED FROM GUN METAL AND BE OF THE SPLIT BAND TYPE AND HAVE AN INTERNAL DIAMETER CORRESPONDING TO THE PIPE OUTSIDE DIAMETER.
4. P.E. PIPES SHALL WHERE NECESSARY BE DEFLECTED DOWN FROM MAIN TAPPING TO ACHIEVE CORRECT DEPTH.
5. TAPPING BAND NOT TO BE CLOSER THAN 150mm TO JOINT ON LARGE PIPE.
6. ALL SLUICE VALVES ON P.E. MAIN SHALL BE 50mm DIAMETER GATE VALVES WITH CAST IRON HANDLES.
7. FLUSHING POINTS SHALL BE PROVIDED AT THE END OF ALL P.E. PIPES.

PATH NOTES

1. ALL FOOTPATHS AND PEDESTRIAN RAMPS SHALL BE CONSTRUCTED TO LOCAL AUTHORITY STANDARD. ALL MATERIAL USED SHALL BE IN ACCORDANCE WITH LOCAL AUTHORITY STANDARD SPECIFICATION
2. THE CONTRACTOR SHALL PROTECT ALL EXISTING WORKS, AND SUPPLY AND MAINTAIN ALL SAFETY DEVICES TO PROTECT VEHICLES, PEDESTRIANS AND THE WORKS
3. UNLESS OTHERWISE SHOWN, ALL FOOTPATHS SHALL BE 1.5m WIDE WITH A 0.3m OFFSET FROM THE ROAD RESERVE BOUNDARY. FOOTPATHS ADJACENT TO RETAINING WALLS TO BE 1.8m WIDE AND LOCATED ON THE ROAD RESERVE BOUNDARY.
4. UNLESS OTHERWISE SHOWN, ALL DUAL USE PATHS TO BE 2.1m WIDE WITH A 0.3m OFFSET FROM THE ROAD RESERVE BOUNDARY. DUAL USE PATHS ADJACENT TO RETAINING WALLS TO BE 2.4m WIDE AND LOCATED ON THE ROAD RESERVE BOUNDARY.
5. UNLESS OTHERWISE SHOWN, ALL JOINTS SHALL BE SPACED IN ACCORDANCE WITH THE LOCAL AUTHORITY REQUIREMENTS. IF NOT AVAILABLE , THEY SHALL BE AS PER THE IPWEA REQUIREMENTS. JOINTS TO TIE IN WITH KERB JOINTS.
6. PRIOR TO PLACING CONCRETE THE BASE SHALL BE FREE FROM DELTERIOUS MATERIAL, UNIFORMLY COMPACTED TO 95% MAXIMUM DRY DENSITY AND LIGHTLY DAMPENED.
7. ALL CONCRETE WORK SHALL DEVELOP A MINIMUM COMPRESSIVE STRENGTH OF 32 MPa AT 28 DAYS.
8. THE FINAL SURFACE SHALL BE BROOM FINISHED AND ALL EDGES AND JOINTS TOOL FINISHED.
9. CONTRACTOR SHALL PROTECT THE FINISHED WORK FOR 24 HOURS AFTER THE CONCRETE HAS BEEN LAID, ANY DAMAGE SHALL BE MADE GOOD AT THE CONTRACTORS EXPENSE.

KALAMUNDA, WA 6926

Attention: Graeme Budge

Dear Graeme

FORRESTFIELD INDUSTRIAL AREA – ROAD 2A – STAGE 1
PAYMENT CERTIFICATE 4

We enclose Valuation of Works Certificate No. 4 in favour of RJ Vincent for work completed to 13 August 2019, for the above project.

We have assessed the claim for the work completed and recommend payment of $62,415.23 inclusive of GST, direct to RJ Vincent in accordance with the requirements of the contract.

We also enclose Variation Order No.3 for your records.

RJ Vincent has provided a bank guarantee in lieu of cash retention. The original copy of the guarantee is held at the offices of the City of Kalamunda, and can be released at the expiry of the 12 month defect liability period, once a Final Certificate is issued.

RJ Vincent has also provided a Statutory Declaration. A copy of the declaration is enclosed for your records.

RJ Vincent has been requested to forward an invoice to you direct for payment.

Yours faithfully

BRAD HARRIS
MANAGING DIRECTOR

Enc.

4. Indicative Costs for retention of the existing cul-de-sac (T092.20)
5. Indicative Costs for Emergency Accessway to tie into existing cul-de-sac (T095.20)
6. Relocating the cul-de-sac layout
7. Indicative Costs for relocating the cul-de-sac layout (T093.20)
8. Indicative Costs for Emergency Accessway to tie into relocated cul-de-sac (T096.20)

1.0 INTRODUCTION

The City of Kalamunda is seeking an assessment of the existing cul-de-sac on Nardine Close in High Wycombe that currently terminates at the boundary line of lot 308 and lot 51. The cul-de-sac was constructed in July 2019 as part of road upgrade works to Nardine Close (Road 2A-Stage 1) to service the Forrestfield industrial area. The cul-de-sac has been designed to accommodate a 27.5m long Restricted Access Vehicle (RAV) category 2 to 4 (inclusive).

The cul-de-sac was intended to be temporary and was to be removed as part of a future extension of Nardine Close (Stage 2) to the boundary of lot 50 and lot 51 as shown in **Figure 1**.

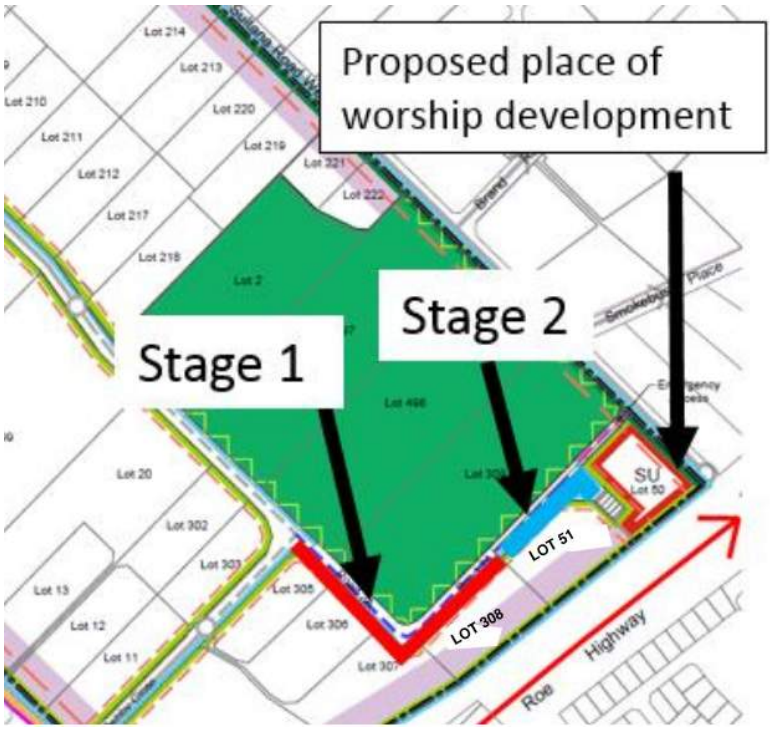

Figure 1: Stage 1 and 2 extents for Nardine Close (Road 2A)

The City has recently approved a Development Application for a place of worship to lot 50. The place of worship will be primarily serviced by light vehicles, with all access via Sultana Road West. Therefore, the Stage 2 extension works of Nardine Close to the boundary of lot 50/lot 51 may no longer be required if the place of worship development progresses as planned.

The City has requested the consideration of the existing cul-de-sac arrangement but also wishes to consider an alternative arrangement with the cul-de-sac being centrally located on the boundary dividing lots 308 and 51. The consideration of an alternative arrangement is due to concerns being raised that the exiting cul-de-sac arrangement will not provide adequate access to lot 51.

The City of Kalamunda has engaged Porter Consulting Engineers to provide an assessment, advice and costs towards:

- The cul-de-sac remaining in its current location.
- Relocate the cul-de-sac.

It is noted the original scheme had a cul-de-sac at the end of Nardine Close, with no access through to Sultana Road West except for the emergency accessway. In industrial areas it would be preferable not to create cul-de-sacs due to turning requirements for larger vehicles. However, industrial traffic was not seen as desirable to Sultana Road West and therefore both assessments have a cul-de-sac at the end of Nardine Close.

2.0 RETAIN THE CUL-DE-SAC IN ITS CURRENT LOCATION

2.1 27.5m long Restricted Access Vehicle access

The existing cul-de-sac will not detrimentally impact access for 27.5m long RAV vehicles entering and exiting lot 51 and lot 308. The current setout of the cul-de-sac allows for the installation of crossovers to lot 51 and lot 308 consistent with industrial sites in the area.

2.2 Road Reservation to the cul-de-sac

The existing cul-de-sac is partially located within the Nardine Close road reservation and partially within private land ownership of lot 308. The City has established an agreement with the owners of lot 308 that allows part of the cul-de-sac to be within lot 308 due to its temporary nature. Should the existing cul-de-sac be retained in its current location on a permanent basis, the City will acquire the necessary land from the owners of lot 308 as part of establishing a permanent cul-de-sac.

Towards establishing the existing cul-de-sac as permanent, consideration should be had to providing an adequate verge width from the face to kerb to reservation boundary around the cul-de-sac.

Although lot 308 is zoned industrial, it accommodates a residential home which immediately abuts Nardine Close. An interim reservation boundary may need to be established whilst this residential home remains. The interim reservation boundary would need to be setout such that the boundary retains the residential home within lot 308.

When lot 308 is developed into an industrial development, a permanent reservation boundary should be established to provide nominal 3m wide verges.

Attachment 1, illustrates the interim and permanent reservation setouts.

2.3 Works Required

As the cul-de-sac was intended to be temporary, the services installed finished before the cul-de-sac and did not extend to the lot 308/lot 51 boundary as per typical requirements of the relevant utility authorities.

Should the cul-de-sac become permanent, the utility authorities will require the services to be extended to the lot 308/lot 51 boundary.

Electrical

The existing electrical cables terminate immediately south of the existing cul-de-sac as shown in **Attachment 2**.

These electrical cables will need to be extended by following the interim reservation boundary to the lot 308/lot 51 boundary. A light pole is expected to be required by the cul-de-sac head towards establishing the cul-de-sac as permanent.

It is likely that the electrical cables will need to be relocated to suit the permanent reservation boundary when this is established.

Due to the proximity of the existing residential home to the boundary line, it is expected that trenchless technique installation will be required for electrical conduits.

Communications

The existing NBN conduits terminate immediately south of the existing cul-de-sac as shown in **Attachment 2**. NBN Co. will require new conduit/cabling to be installed that follows the interim road reservation boundary line to extend to lot 51.

It is likely that the NBN conduits/cables will need to be relocated to suit the permanent reservation boundary when this is established.

Due to the proximity of the existing residential home to the boundary line, it is expected that trenchless technique installation will be required for communication conduits.

Gas

Lot 308 is serviced with a gas supply via a private supply line within the emergency accessway. It is expected that ATCO Gas will require new mains to be installed from the emergency accessway that follows the interim reservation boundary.

It is unlikely that ATCO Gas will allow this gas supply to be retained for use when lot 308 is developed into an industrial development. However, this would need to be confirmed with ATCO at the time of development.

Water

The existing DN150 water main currently terminates immediately south of the existing cul-de-sac as in **Attachment 2**. The water main will need to be extended by following the interim reservation boundary to the lot 308/lot 51 boundary.

The Water Corporation has previously advised that the water main will need to be extended to Sultana Road West (via the emergency accessway) to reinforce the water supply network in this area.

It is likely that the water mains will need to be relocated to suit the permanent reservation boundary when this is established.

Fencing

Existing fencing and gates will need to be relocated to the new reservation boundary.

At present, there is an existing 1.8m high chain mesh fence between the existing cul-de-sac kerb line and the residential home (see **Figure 2**). This fencing is within the road reservation and will need to be relocated to the boundary line. By relocating the fence to the boundary line, access to the western side of the residential home will be severely limited due to the building to effect having an near nil setback.

Consideration should be had to defer relocating the fencing until the demolition of the residential home so not to impact the resident's access around the home. For the purpose of this advice, it has been assumed that the chain mesh fence will not relocated to the boundary line until the home is demolished as part of industrial development to lot 308.

A provisional allowance has been included for the possible relocation of the private internal service (i.e. drainage from downpipes) by the western side of the home to avoid clashes with proposed extension of services.

Figure 2: Existing mesh fencing by the existing residential property of lot 308

Footpath

The existing 2.1m wide footpath currently terminates immediately south of the existing cul-de-sac. Typically it would be expected that this footpath is extended to lot 51. However, with the existing chain mesh fence assumed to remain in its current position, it will not be possible to extend the footpath. Therefore, it has been assumed that the extension of the footpath will be deferred until the home is demolished.

Crash Barrier

Whilst the existing residential home is still in place within lot 308, consideration should be had to installing a crash safety barrier (i.e. W-Beam) due to the proximity of the home to the kerb line of the cul-de-sac. The home has to affect a nil setback offset to the south-west corner of the

building. The crash barrier would be installed immediately behind the kerb line and existing chain mesh fencing.

The barrier would be removed once the residential home is demolished and the permanent reservation boundary is established.

Emergency Accessway

Although there is currently an emergency accessway from the existing cul-de-sac to Sultana Road West, the City is seeking to formalise this accessway to 6m wide 'Right of Way' with a 6m wide gravel basecourse. Although the emergency accessway concept drawing shown in **Attachment 3** notes a 5m wide basecourse, allowance has been made for a 6m wide basecourse which is the minimum trafficable surface width in accordance with the 'Guidelines for Planning in Bushfire Prone Areas'[1].

The existing width of the access is currently 5m wide and the City would need to acquire a 1m width from lot 51 to establish a 6m wide Right of Way.

The existing 3m wide asphalt surfacing will be removed for the installation of the water main from Sultana Road West. Clearing of existing vegetation to establish a 6m width will be required. The 6m wide gravel basecourse will be constructed to achieve the noted design levels.

By Sultana Road West there is an existing distribution board and an electrical meter box that straddles the current boundary line for the existing 5m accessway boundary line which would need to be relocated (See **Figure 3**).

Figure 3: Existing distribution board and an electrical meter box by Sultana Road West will need relocating

[1] Department of Planning, Lands and Heritage, *Guidelines for Planning in Bushfire Prone Areas*, viewed 19 June 2020, </getmedia/0364136f-bf61-41ed-a68f-e77f165d6e3c/GD-BF-Bushfire_Guidelines_Version_1-3_Dec2017-Appendices>

2.4 Opinion of Probable Cost

The table below is a summary of the indicative costs to facilitate the interim reservation to accommodate the existing cul-de-sac. A more detailed breakdown is included in **Attachment 4**.

Item	Costs to Accommodate the Existing Cul-de-sac
Construction costs to accommodate the interim reservation boundary	$132,200
Extra over costs for works from the interim to permanent reservation boundary.	$28,000
Development Fees and Charges	$29,100
Subtotal	$189,300
GST	$18,930
Total including GST	$208,230

The table below is a summary of the indicative costs for the emergency access way to tie into the existing cul-de-sac. A more detailed breakdown is included in **Attachment 5**.

Item	Costs for Emergency Accessway works
Construction costs to accommodate the interim reservation boundary	$67,100
Development Fees and Charges	$8,000
Subtotal	$75,100
GST	$7,510
Total including GST	$82,610

The amounts noted exclude any costs associated with land acquisitions.

3.0 RELOCATE THE CUL-DE-SAC

By relocating the cul-de-sac as shown in **Attachment 6**, it provides lot 308 with increased road frontage allowing for greater flexibility to crossovers and access as part of future industrial development to the lot. Whilst this greater flexibility is desirable, it is not necessary to provide this additional frontage to facilitate industrial development to lot 308, as the existing cul-de-sac setout provides adequate access to lot 308 and 51

By relocating the cul-de-sac, it eliminates the issue of the existing residential home in lot 308 being too close to the kerb and the need for an interim reservation boundary. The City will acquire the necessary land from the owners of lot 308 and lot 51 as part of establishing a cul-de-sac.

A 3.5m wide verge should be established as part of establishing the relocated cul-de-sac.

3.1 27.5m long Restricted Access Vehicle access to lot 51

A relocated cul-de-sac will not detrimentally impact access for 27.5m long RAV vehicles entering and exiting lot 51 and lot 308.

3.2 Works Required

Demolition

A small shed and other ancillary structures at the south-west corner of lot 51 will need to be relocated or demolished to accommodate a relocated cul-de-sac.

Electrical

The existing electrical cables would need to be extended to follow the new reservation boundary as part of the works to construct a relocated cul-de-sac.

Due to the proximity of the existing residential home to the boundary line, it is expected that trenchless technique installation will be required for electrical conduits.

Communications

The existing NBN conduits/cables would need to be extended to follow the new reservation boundary as part of the works to construct a relocated cul-de-sac.

Due to the proximity of the existing residential home to the boundary line, it is expected that trenchless technique installation will be required for communication conduits.

Gas

The gas supply from the emergency accessway that serves lot 308 is expected to require adjustment to follow the new road reservation boundary whilst a residential home is still in place for lot 308.

It is unlikely that ATCO Gas will allow this gas supply to be retained for use when lot 308 is developed into an industrial development. However, this would need to be confirmed by ATCO Gas at the time of development.

Water

The existing DN150 water main would need to be extended to follow the new reservation boundary as part of the works to construct a relocated cul-de-sac.

The Water Corporation has previously advised that the water main will need to be extended to Sultana Road West (via the emergency accessway) to reinforce the water supply network in this area.

Roadworks

Redundant portions of the cul-de-sac will require demolition and a new cul-de-sac head constructed in the new location.

As the new cul-de-sac head will not be near any existing buildings, installation of crash barriers will not be required.

The new cul-de-sac head will need to tie into the existing emergency accessway.

Footpath

The 2.1m wide footpath would be extended around the new cul-de-sac head.

Emergency Accessway

Although there is currently an emergency accessway from the existing cul-de-sac to Sultana Road West, the City is seeking to formalise this accessway to 6m wide with a 6m wide gravel basecourse as shown in **Attachment 3**.

The existing width of the access is currently 5m wide and the City would need to acquire a 1m width from lot 51 to establish a 6m wide Right of Way.

The existing 3m wide asphalt surfacing will removed due to the installation of the water main from Sultana Road West. Clearing of existing vegetation to establish a 6m wide clear width will be required and the 6m gravel base course constructed to achieve the noted design levels.

By Sultana Road West there is an existing distribution board and an electrical meter box that straddles the current boundary line for the existing 5m accessway boundary line which would need to be relocated (See **Figure 3**).

Fencing

Existing fencing and gates will need to be relocated to the new reservation boundary.

At present, there is an existing 1.8m high chain mesh fence between the existing cul-de-sac kerbline and the residential home (see **Figure 3**). This fencing is within the road reservation and will need to be relocated to the boundary line. By relocating the fence to the boundary line, access to the western side of the residential home will be severely limited due to the building to effect having a near nil setback.

A provisional allowance should also be included for the possible relocation of the private internal service (i.e. drainage from downpipes).

3.3 Opinion of Probable Cost

The table below is a summary of the indicative costs to relocate the cul-de-sac. A more detailed breakdown is included in **Attachment 7**.

Item	Costs to Relocate the Cul-de-sac
Construction Costs	$223,200
Development Fees and Charges	$23,400
Subtotal	$246,600
GST	$24,660
Total including GST	$271,260

The table below is a summary of the indicative costs for the emergency access way to tie into the relocated cul-de-sac. A more detailed breakdown is included in **Attachment 8**.

Item	Costs for Emergency Accessway works
Construction Costs	$61,100
Development Fees and Charges	$7,500
Subtotal	$68,600
GST	$6,860
Total including GST	$75,460

The amounts noted exclude any costs associated with land acquisitions.

4.0 CONCLUSION

4.1 Retain the cul-de-sac

Retaining the existing cul-de-sac does not impact on access to lot 51 and lot 308 for 27.5m long Restricted Access Vehicles (RAV Category 2 and 4). Whilst the existing residential home is still present in lot 308, an interim reservation boundary would need to be established due to the proximity of the home to the kerb line.

The chain mesh fence between the existing cul-de-sac kerb line and residential home will need to be relocated to the boundary line. By relocating the fence to the boundary line, access to the western side of the residential home will be severely limited due to the building to effect having a near nil setback.

Adjustment and relocating of private internal services may be required (i.e. drainage from downpipes).

Once lot 308 is developed into an industrial lot and the home is demolished, a permanent reservation boundary would need to be established. The Opinion of Probable Cost to retain the cul-de-sac to accommodate the interim and permanent boundary works is $208,230 including GST.

The Opinion of Probable Cost for the emergency accessway works is an additional $82,610 including GST.

If this is the City's preferred option, then preliminary designs should be prepared to establish the full scope of works, land acquisition areas, updating designs to the emergency access and in particularly resolving particulars in relation to the existing residential home (ie, existing private services needing to be relocated).

The amounts noted exclude any costs associated with land acquisitions.

4.2 Relocate the cul-de-sac

Should the cul-de-sac be relocated, access to lot 51 and lot 308 for 27.5m long Restricted Access Vehicles (RAV Category 2 and 4) is not impacted. A new reservation boundary would be established for the relocated cul-de-sac without a need for an interim reservation boundary due to the greater separation from the kerbline to the home on lot 308. The Opinion of Probable Cost to relocate the cul-de-sac is $271,260 including GST.

The Opinion of Probable Cost for the emergency accessway works is an additional $75,460 including GST.

The amounts noted exclude any costs associated with land acquisitions.

If this is the City's preferred option, then preliminary designs should be prepared to establish the scope of works, land acquisition areas, and updating designs to the emergency access.

EXTENSION

CONTRACTOR TO LAY 403m OF 150P-12

CONNECTION

CONNECTIONS (1) TO BE MADE BY WATER CORPORATION

GENERAL NOTES

1. ALL WORKS SHALL BE CONSTRUCTED IN ACCORDANCE WITH WATER CORPORATION MANUALS AND STANDARDS.
2. **SERVICES, SUCH AS SEWER, WATER, GAS, TELEPHONE, ELECTRICITY, AND DRAINAGE MAY BE ENCOUNTERED DURING CONSTRUCTION OF THE WORKS. SERVICES INFORMATION SHOWN ON DRAWINGS IS INDICATIVE ONLY AND MAY NOT BE COMPLETE. BEFORE EXCAVATION COMMENCES THE LOCATION OF ALL SUCH SERVICES SHALL BE OBTAINED FROM THE RELEVANT AUTHORITIES.**
3. **CO-ORDINATE THE LOCATION OF ALL EXISTING AND PROPOSED SERVICES PRIOR TO COMMENCEMENT OF WORK. ANY CONFLICTS ARE TO BE REPORTED TO THE ENGINEER IMMEDIATELY.**
4. UNLESS OTHERWISE SHOWN ALL DIMENSIONS ARE IN METRES.
5. ALL PIPES SHALL BE INSTALLED TO WITHIN 3.5m OF EXISTING MAIN. CONNECTION TO EXISTING BY WATER CORPORATION TO BE ORGANISED BY CONTRACTOR.
6. UNLESS OTHERWISE DIRECTED BY THE ENGINEER, COVER REQUIREMENTS SHALL COMPLY WITH THE WATER CORPORATION STANDARDS.
7. MINIMUM CLEARANCE TO GAS = 300mm, MINIMUM CLEARANCE TO OTHER SERVICES = 150mm.
8. ALL WORKS SHALL BE IN DRY GROUND. GROUND WATER SHALL NOT BE PERMITTED TO ENTER PIPES.
9. UNLESS OTHERWISE SHOWN ON THIS DRAWING OR VARIED BY THE ENGINEER ALL PIPES AND FITTINGS SHALL BE LAID ON AN ALIGNMENT OF 2.1m FROM THE CENTRE OF THE PIPE TO THE ROAD RESERVE BOUNDARY.
10. FLUSHING POINTS SHALL BE INSTALLED ON ALL MAINS AT CONNECTION POINTS TO EXISTING MAINS OR WHERE SPECIFIED.
11. CONTRACTOR SHALL INSTALL FLUSHING POINTS AT ALL DEAD ENDS.
12. UNLESS DIMENSIONED OTHERWISE, MAINS SHALL EXTEND AT LEAST 8m ALONG THE FRONT OF LAST LOT SERVED.
13. ALL VALVES SHALL BE OPPOSITE BOUNDARY PEGS UNLESS DIMENSIONED OTHERWISE, ALL HYDRANTS SHALL BE POSITIONED IN THE MIDDLE OF LOTS OR OPPOSITE BOUNDARY PEGS AS SHOWN.
14. SERVICE CROSSINGS SHALL BE LOCATED AT RIGHT ANGLES TO BOUNDARY AND INSTALLED IN ACCORDANCE WITH THE REQUIREMENTS OF THE WATER CORPORATION.
15. THE CONTRACTOR SHALL ALLOW FOR ALL AS CONSTRUCTED INFORMATION (INCLUDING SURVEY) TO BE PLOTTED IN ACCORDANCE WITH THE WATER CORPORATIONS CURRENT PRACTICE AND DELIVERED TO THE ENGINEER FOR SIGNING AND PRESENTATION TO THE WATER CORPORATION.
16. IT IS DEEMED THAT THE AS CONSTRUCTED DOCUMENTS FORM PART OF THE WORKS. PRACTICAL COMPLETION CAN NOT BE AWARDED IF ACCEPTABLE AS CONSTRUCTED DOCUMENTS HAVE NOT BEEN PROVIDED TO THE ENGINEER.

ORIGINAL DRAWING SIZE	A1
FILE NAME	S:\ACTIVE PROJECTS\16-09-116\ACAD\169116-300-301.dwg

CONTRACTOR NOTES:

1. DRAWING TO BE READ IN CONJUNCTION WITH CONTRACT DRAWINGS AND SPECIFICATIONS.
2. ALL WORKS TO BE COMPLETED IN LINE WITH WESTERN POWER POLICIES INCLUDING THE UDS, WADCM, DDC, DSM, DCSH, UCIM AND EARTHING FAQ. ALL MATERIALS USED MUST BE APPROVED WESTERN POWER MATERIALS.
3. VERIFY ALL MATERIAL QUANTITIES AGAINST SITE CONDITIONS PRIOR TO QUOTATION AND ADVISE ELECTRICAL CONSULTANTS OF ANY VARIATIONS.
4. SHOW CAUTION IN PROXIMITY TO EXISTING ASSETS. ALWAYS REFER TO CURRENT DBYD DRAWINGS. POTHOLE TO LOCATE IF NECESSARY. PROTECT SERVICES AS REQUIRED. DO NOT ENCROACH MINIMUM APPROACH DISTANCES FOR UNDERGROUND OR OVERHEAD ASSETS.
5. LIAISE WITH WESTERN POWER AS REQUIRED. ORGANISE PRE-HANDOVER INSPECTION AND ENERGISATION SCHEDULE WITH WESTERN POWER PRIOR TO COMPLETION OF WORKS.
6. ARRANGE WITH 3E FOR ELECTRONIC AS CONSTRUCTED DRAWING COMPLETION AND SUBMISSION TO WESTERN POWER.
7. MAKE ALLOWANCE FOR TERRACING OF CABLES WHERE REQUIRED, INCLUDING FOR ROAD CROSSINGS.
8. CLEAN BEDDING SAND TO BE IMPORTED FOR CABLE TRENCHES WHERE EXISTING MATERIALS DO NOT MEET WP REQUIREMENTS.
9. PLAN CABLE RUNS TO LIMIT THE NUMBER OF STRAIGHT JOINTS.
10. COMMENCE LAYING CABLES FROM THE TRANSFORMER, SWITCHGEAR OR UNIVERSAL PILLAR.
11. ALL CABLES LAID NEXT TO RETAINING WALLS TO BE IN CONDUIT. EXTEND CONDUIT 2m PAST WALL ON STRAIGHT SECTIONS
12. INSTALL HEATSHRINK "END CAP" AT ALL CABLE ENDS.
13. INSTALL HEATSHRINK GLOVES ON ALL LV CABLE TERMINATION ENDS.
14. STREETLIGHT POLES MUST NOT BE INSTALLED IN FOOTPATHS. PEG POLES LOCATIONS PRIOR TO INSTALL AND NOTIFY 3E OF CLASHES IN ADVANCE.
15. ERECT LIGHT POLES ONLY AFTER NEARBY EXISTING OVERHEAD POWERLINES ARE REMOVED, WHERE NOTED.
16. BORE UNDER EXISTING ROADS.
17. CONTRACTOR TO LEAVE SUFFICIENT CABLE COILED AT ALL INTERFACE POINTS (INCLUDING JOINTS, PILLAR TERMINATIONS & POLE TERMINATIONS) TO ALLOW WP TO COMPLETE INTERFACE WORKS. INSTALL END CAPS TO PROTECT CABLE.
18. HV FEEDER CABLES TO BE INSTALLED AT DEPTHS SHOWN IN TRENCH CROSS SECTIONS TO ALLOW FOR CLEARANCES TO OTHER AND FUTURE CABLES.
19. ELECTRICAL CONTRACTOR TO INSPECT EXISTING METER BOARD AND CONSUMER SUPPLY, TO DETERMINE APPROPRIATE NEW CONSUMER MAINS ARRANGEMENT, SUPPLY, INSTALL & TERMINATE NEW UNDERGROUND CONSUMER MAINS TO NEW PILLAR, RELOCATE AND MAKE APPROPRIATE ALTERATIONS TO EXISTING METER BOARD.

WESTERN POWER SCOPE OF WORKS

SCALE	1:500	SHEET No.	1 OF 3
REV.	2		

GENERAL NOTES

1. REFER TO CIVIL ENGINEERS DRAWINGS FOR SERVICES TRENCH ALIGNMENT DETAILS
2. ALL COMMUNICATION WORKS TO BE UNDERTAKEN IN ACCORDANCE WITH NBN CO. DOCUMENT NBN-TE-CTO-194 "NEW DEVELOPMENTS: DEPLOYMENT OF THE NBN CO. CONDUIT AND PIT NETWORK - GUIDELINES FOR DEVELOPERS". NBN CO. GUIDELINES ARE AVAILABLE AT http://www.nbnco.com.au » Industry » Property Developers » Technical Guidelines
3. ON GAZETTED ROAD RESERVES NBN NETWORK CONDUIT TO BE INSTALLED ON THE 900mm ALIGNMENT WITH ALL NBN PLANT WITHIN THE 500-1300mm ALIGNMENT. IN SITUATIONS WHERE THERE ARE DUAL NETWORKS (NEW OR EXISTING, e.g. TELSTRA) THE NBN CONDUIT IS TO BE INSTALLED ON THE 1100mm ALIGNMENT. WHERE THE PRESCRIBED ALIGNMENT IS UNAVAILABLE, LIAISE WITH CIVIL CONSULTANT
4. ALL CONDUITS PIPES & LEAD-INS TO BE SEALED AND FITTED WITH DRAW ROPE
5. INSTALLATION OF AN IDENTIFICATION TAPE IS NOT REQUIRED
6. MINIMUM DEPTH OF COVER FOR CONDUITS SHOULD BE IN ACCORDANCE WITH NBN-TE-CTO-194, AS FOLLOWS
   - 450mm MINIMUM COVER IN ROAD VERGE
   - 600mm MINIMUM COVER FOR LATERAL ROAD CROSSINGS
   - 650mm MINIMUM COVER ON PRIVATE PROPERTY FOR LEAD-IN/SERVICE DROP PIPE
7. CONDUIT AND PIPE SIZES ARE TO CONFORM TO AS1477 TABLE 4.2(A):
   - P20 NOMINAL = 23.7mm MEAN ID, 26.8mm MEAN OD
   - P50 NOMINAL = 53.7mm MEAN ID, 60.4mm MEAN OD
   - P100 NOMINAL = 104.6mm MEAN ID, 114.3mm MEAN OD
8. LEAD IN/SERVICE DROP P23 NOMINAL FOR SINGLE RESIDENTIAL PROPERTIES, P50 NOMINAL FOR SMALL MDUs OR COMMERCIAL AND P100 NOMINAL FOR LARGE MDUs AND MEDIUM RISE BUILDINGS
9. CONDUIT BENDS SHOULD COMPLY WITH NBN-TE-CTO-194 BUT RADII SHOULD NOT BE LESS THAN
   - P20 (P23) LEAD-IN 300mm
   - P50 LEAD-IN 300mm
   - P50 ROAD CROSSING 500mm
   - P100 TRUNCATION/ROAD CROSSING 800mm (NO 90° BENDS PERMITTED ON P100 CONDUITS)
10. MINIMUM RADIAL CLEARANCES SHOULD BE MAINTAINED BETWEEN CONDUIT & OTHER PUBLIC UTILITIES, IN ACCORDANCE WITH NBN-TE-CTO-194 - SEE TRENCH CROSS SECTION DETAIL
11. PITS TO BE SET BACK
    - 5m FROM ANY INTERSECTION BACK OF KERB (BOK)
    - 1m FROM BOK ON ROAD VERGE WHERE PRACTICAL
    - 1m FROM STREETLIGHTS AND POWER POLES
    - 200mm FROM DRIVEWAYS MINIMUM, WITH 500mm OR GREATER SETBACK PREFERRED
    - 500mm FROM PARKING BAY BOK
    - BARRIER KERBS REQUIRED WHERE LESS THAN 1m SET BACKS FROM BOK UTILISED
12. ALL READILY ACCESSIBLE PLANT SUCH AS PITS TO BE INSTALLED OUTSIDE EPR ZONES, TO COMPLY WITH NBN-TE-CTO-194, COMMUNICATIONS ALLIANCE GUIDELINES G645:2011, C524:2013 AND AS3835.1
13. NBN CO DO NOT REQUIRE SERVICE EASEMENTS OVER ABOVE OR BELOW GROUND EQUIPMENT ON POS. SOME SHIRES OR TOWN COUNCILS MAY REQUIRE SERVICE EASEMENTS
14. PIT TO PIT DISTANCES SHOWN ARE APPROXIMATE ONLY
15. PITS ARE NOT TO BE INSTALLED ON DRIVEWAYS OR IN ROADWAYS
16. NO RISERS/COLLARS TO BE UTILISED ON PITS (e.g. A RISER CAN NOT BE USED IN CONJUCTION WITH A TYPE 6 PIT TO CREATE A TYPE 8 PIT)
17. PIT LIDS ARE TO BE LABELLED "NBN" WITH INDIVIDUAL LIDS WEIGHING NO MORE THAN 38kg AND WITH THE WEIGHT SHOWN ON THE LID IN ACCORDANCE WITH AS3996-2006 6.1.
18. THE INTEGRITY OF ALL CONDUIT/PIPE TO BE TESTED WITH AN 80% MANDREL

POP — PRIVATELY OPERATED PAYPHONES

APS — ASSISTANCE TELEPHONES (EG ELEVATOR AND ROADSIDE PHONES)

MET — APPLY TO OTHER TYPE OF METERING POINT (any service)

ATM — ATM

PRK — BANDSTAND / ROTUNDA / SPORTS FIELD STANDS / OTHER PARK BUILDING

PSD — POINT OF SALE DEVICE (vending machine, ticket machine)

TRF — Traffic Lights / Traffic Light Controller / Variable Speed Sign / Traffic Signal

PBT — Public Transport (bus stop, tram stop, railway station, taxi rank, ferry wharf)

SWT — Links / Link Pole / MV / HV Links / ABC Links / Dynamic Switch / Airbrake Switch / Isolator

WAT — Water Infrastructure (storage, pumps, valves water supply, waste water, sewerage stations)

GAS — Natural Gas Infrastructure

CAM — Camera (security / traffic)

CTL — Bridge control, swing bridge, traffic control gates, railway boom gates)

MOB — Mobile Phone Tower / radio antenna

LIT — Street Lighting Pole / street light controller

CAR — Unmanned (council) car park

PWR — Transformer / Kiosk / Pad Mount Sub-station / Pole Mount Transformer

NAP-ID (N) — Network Access Point (NAP)

MPT-ID (N) — Multiport (MPT)
n is the number of ports (eg 4,6,8,12)

Penetration

CABLE TRAY:

TJL-ID — Splice Joint on a Transit Cable (TJL)

DJL-ID — Splice Joint on a Distribution Cable (DJL)

LJL-ID — Splice Joint on a Local Cable (LJL)

MJL-ID — Splice Joint on a Tether Cable (MJL)

AJL-ID — Zone Terminal / Splice Joint (AJL)

FDH-ID — Fibre Distribution Hub-FDH Cabinet with Cabinet ID shown

PIT-ID 2 — Service Drop Access Pit (650mmX280mmX565mm)

PIT-ID 5 — Network Boundary/Local Network Pit (Single Lid) (700mmX450mmX650mm)

PIT-ID 6 — Distribution/Local Network Connection Pit (Dual Lid) (1360mmX555mmX650mm)

PIT-ID 8 — Distribution/Local Network Connection Pit (1360mmX555mmX860mm)

PIT-ID 9 — Fibre Distribution Hub (FDH) Pit (2000mmX555mmX900mm)

Shared Trench

NTD — nbn NTD

OBBU — NBN Optional Battery Backup Unit

PDH — nbn Premises Distribution Hub

CTL — nbn Cable Transition Location

FDT — nbn Fibre Distribution Terminal

FIP — nbn NTD Fire Indicator Panel

Riser — Riser

LIFT — nbn NTD LIFT

AP — Access Panel

SEC — nbn NTD Security

CET — nbn Communications Earth Terminal

DES / QTY — Example of descriptor box that will show the type of work and the quantity involved

nbn manhole

Existing Telstra manhole

FAN AAAA — Fan Access Node site (FAN)

138A RX CX — Multi Dwelling Unit (MDU)

NBN.CO

DEPTH —
ALIGN — DEPTH OVER ALIGNMENT SYMBOL TO BE USED WITH EVERY MARKER POST

Symbol to be used when replacing/removing existing network

PCD — Premise Connection Device (PCD)

POLE-ID — Pole (showing pole identity)

5 — Existing Telstra Pit (2,3,4,5,6,7,8,9)
Telstra exchange

T — Example of Telstra Major Conduit Layout with Proposed duct marked to be used by NBN

M < _ > — NBN MARKER POST
MARKER POST TO BE NUMBERED

CONDUIT CONFIGURATION

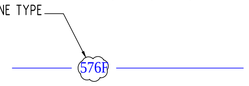
CONDUITS AND DUCTS ARE IN LAYER :
< L460 NBN Support - Underground >
AND TERMINOLOGY CATEGORIZED INTO TWO GROUPS IN THE DRAWING AS PER BELOW:
1- DUCT USED WITH LOCAL NETWORK
2-CONDUIT USED WITH LEAD-IN DROPS
ATTRIBUTES ATTACHED ARE AS SHOWN

CABLE CONFIGURATION

CABLE TYPE:
CABLES DIVIDE INTO FOLLOWING CATEGORIES AND ARE COLOUR CODED:

TRANSIT CABLES	COLOUR NO: 1	312F
DISTRIBUTION CABLES	COLOUR NO: 190	288F
LOCAL CABLES	COLOUR NO: 4	144F
TETHER CABLES	COLOUR NO: 3	12F
LEAD IN (DROP) CABLES	COLOUR NO: 5	1F

CABLE SIZE:
CABLE SIZE IS THE TOTAL NUMBER OF OPTIC FIBRES IN THE CABLE AND IS DETERMINED BY A NUMBER FOLLOWED BY F (FIBRE) OR R (RIBBON) IN THE MIDDLE OF THE LINE TYPE



CABLE LOCATION:
CABLE LOCATIONS DETERMINES WHERE THE CABLE IS USED AS PER BELOW:

IN-CONDUIT	288F
AERIAL	144F
BURIED	96F

LINE TYPES ARE CATEGORIZED INTO 3 TYPES:
1- IN-CONDUIT: (XXXF) 312F , ...
2- AERIAL: (XXXF_A) 144_A , ...
3- BURIED: (XXXF_B) 12_B , ...

EXAMPLE:

144 FIBRE AERIAL LOCAL CABLE	144F
1 FIBRE BURIED DROP CABLE	1F 1F
432 FIBRE IN-CONDUIT TRANSIT CABLE	48F

FSA Boundary
FSAM Boundary
FDA Boundary

CONTRACTOR TO NOTE:

THERE ARE EXISTING DN160MM PE HIGH PRESSURE 'LIVE' 700KPA GAS PIPELINES AND DN155mm PVC MEDIUM PRESSURE 'LIVE' GAS PIPELINES IN YOUR PROPOSED WORKS AREAS.

SCOPE OF WORKS ALLOWS FOR FINAL LEVEL TO BE AT LEAST:

(i) 1200mm DEPTH-OF-COVER OVER THE EXISTING PE HIGH PRESSURE GAS PIPELINES, AND
(ii) 750mm DEPTH-OF-COVER OVER THE EXISTING PVC MEDIUM PRESSURE GAS PIPELINES.

PRIOR TO COMMENCEMENT OF WORKS THE CONTRACTOR WILL CONTACT THE ATCO HP NOTIFICATION ISSUING OFFICER ON 1300 926 755 AND QUOTE REFERENCE NUMBER ES201805043-REV 1 AND VALID DBYD SEQUENCE NUMBER, TO OBTAIN A HP NOTIFICATION NUMBER PRIOR TO ANY WORK OR ACTIVITY COMMENCING.

DIAL BEFORE YOU DIG www.1100.com.au

WARNING
SERVICES AND CADASTRAL BOUNDARY LOCATIONS SHOWN ARE INDICATIVE ONLY AND MUST NOT BE USED FOR EXCAVATION. THE "ONE CALL 1100" SYSTEM SHALL BE USED TO OBTAIN ACCURATE SERVICE LOCATIONS.

NOTES:

1. ALL CONSTRUCTION TO BE IN ACCORDANCE WITH SPECIFICATION AND CITY OF KALAMUNDA REQUIREMENTS
2. ALL EXISTING PROPERTY SERVICE CONNECTIONS TO BE REINSTATED
3. CONTRACTOR TO POTHOLE ALL EXISTING SERVICES UNDER NEW ROAD AREAS PRIOR TO COMMENCEMENT OF WORKS
4. CONTRACTOR TO ARRANGE ALL ADJUSTMENTS, RELOCATIONS AND PROTECTIONS OF EXISTING SERVICES WITH THE RELEVANT UTILITY PROVIDERS
5. VERGE RETICULATION AND VERGE LANDSCAPING TO BE REINSTATED ON COMPLETION OF WORKS.
6. VEGETATION TO BE REMOVED AS REQUIRED.
7. TREE REMOVAL ON WESTERN VERGE OF MILNER TO BE NEGOTIATED/ARRANGED BY THE CITY OF KALAMUNDA
8. CONTRACTOR TO LIAISE WITH OWNERS/TENANTS OF AFFECTED PROPERTIES TO ACCOMMODATE ACCESS REQUIREMENTS
9. TRANSITION SEMI-MOUNTABLE KERBS TO FLUSH KERBS FOR ALL CROSSOVERS AS PER KERB TRANSITION DETAIL ON DRG No. 1807009-512

SHEET 1 OF 1

1807009-221

NOTES:

1. ALL CONSTRUCTION TO BE IN ACCORDANCE WITH SPECIFICATION AND CITY OF KALAMUNDA REQUIREMENTS
2. FOR DRAINAGE DETAILS REFER TO DRG No. 1807009-522
3. CONTRACTOR TO POTHOLE ALL EXISTING SERVICES UNDER NEW ROAD AREAS PRIOR TO COMMENCEMENT OF WORKS
4. CONTRACTOR TO ARRANGE ALL ADJUSTMENTS, RELOCATIONS AND PROTECTIONS OF EXISTING SERVICES WITH THE RELEVANT UTILITY PROVIDERS
5. REMOVAL OF VEGETATION TO BE LIMITED TO AREAS INSIDE OF NEW ROAD RESERVE BOUNDARY ALIGNMENT.
6. THE LOCATION OF UNDERGROUND SERVICES ARE APPROXIMATE ONLY AND THEIR EXACT LOCATION AND LEVEL IS TO BE CHECKED ON SITE PRIOR TO COMMENCEMENT OF WORKS

HOLDS:

1. SEAGULL ISLAND INSTALLATION SUBJECT TO FUTURE WORKS. CONTRACTOR TO PROVIDE PRICE FOR INSTALLATION OF ISLAND

- S — EXISTING SEWER
- W — EXISTING WATER
- UG — UG — EXISTING POWER (UNDERGROUND)
- OH — OH — EXISTING OVERHEAD POWER
- T — EXISTING TELSTRA
- G — EXISTING GAS
- JP — JUNCTION PIT
- SEP — SIDE ENTRY PIT
- BUP — BUBBLE UP PIT
- U/S 25.00 / 300 / 16.5(4) / 16.5 / D/S 24.00 — UPSTREAM INVERT LEVEL; PIPE DIA / GRADE (CLASS OTHER THAN 2); LENGTH; DOWNSTREAM INVERT LEVEL

NOTES

1. GENERAL
   - 1.1. THE CONTRACTOR SHALL LIMIT THE MOVEMENT OF EQUIPMENT AND MANPOWER TO THE MINIMUM AREA NECESSARY AND PROTECT ALL VEGETATION ON SITE.
   - 1.2. CONTRACTOR SHALL OBTAIN A COPY OF ALL RELEVANT COUNCIL STANDARD DRAWINGS FOR ALL SUBDIVISIONAL WORKS. ALL WORKS SHALL BE CARRIED OUT TO THE REQUIREMENTS OF THE LOCAL AUTHORITY.
   - 1.3. REFER TO THE CITY OF KALAMUNDA STANDARD DRAWINGS FOR ROAD AND DRAINAGE DETAILS.
   - 1.4. SITE TO BE CLEARED OF TOPSOIL TO A DEPTH OF 200mm AS RECOMMENDED BY GEOTECHNICAL REPORT.
   - 1.5. DESIGN LEVELS AND SETOUT INFORMATION TO BE PROVIDED DIGITALLY BY SERLING CONSULTING.
2. ROADWORKS
   - 2.1. THIS DRAWING SHALL BE READ IN CONJUNCTION WITH THE INTERSECTION DETAILS.
   - 2.2. THE CONTRACTOR SHALL MAKE ALL ALLOWANCES NECESSARY FOR REINSTATEMENT OF ANY AREAS DISTURBED BY THE WORKS TO ORIGINAL CONDITION TO THE SATISFACTION OF THE LOCAL AUTHORITY AND SITE SUPERINTENDENT.
   - 2.3. ALL ROADS TO BE CENTRALLY LOCATED UNLESS NOTED OTHERWISE ON THE DRAWINGS. ROAD CENTRELINE, KERBS AND DRAINAGE SETOUT IS ELECTRONICALLY AVAILABLE BY CONTACTING SERLING CONSULTING.
   - 2.4. ALL CORNER SWEEPS SHALL BE KEYED UNLESS OTHERWISE SHOWN
   - 2.5. ALL ROAD VERGES & DISTURBED AREAS SHALL BE STABILISED.
   - 2.6. ALL STREET NAME PLATES SHALL BE FIXED TO LIGHTING COLUMNS WHERE PRACTICAL.
   - 2.7. THE CONTRACTOR SHALL ENSURE IRRIGATION DUCTS ARE NOT TERMINATED UNDER FOOTPATHS.
   - 2.8. ALL CONNECTIONS TO EXISTING INFRASTRUCTURE (PAVEMENT, PATHS ETC.) TO BE OF CLEAN AND NEAT APPEARANCE.

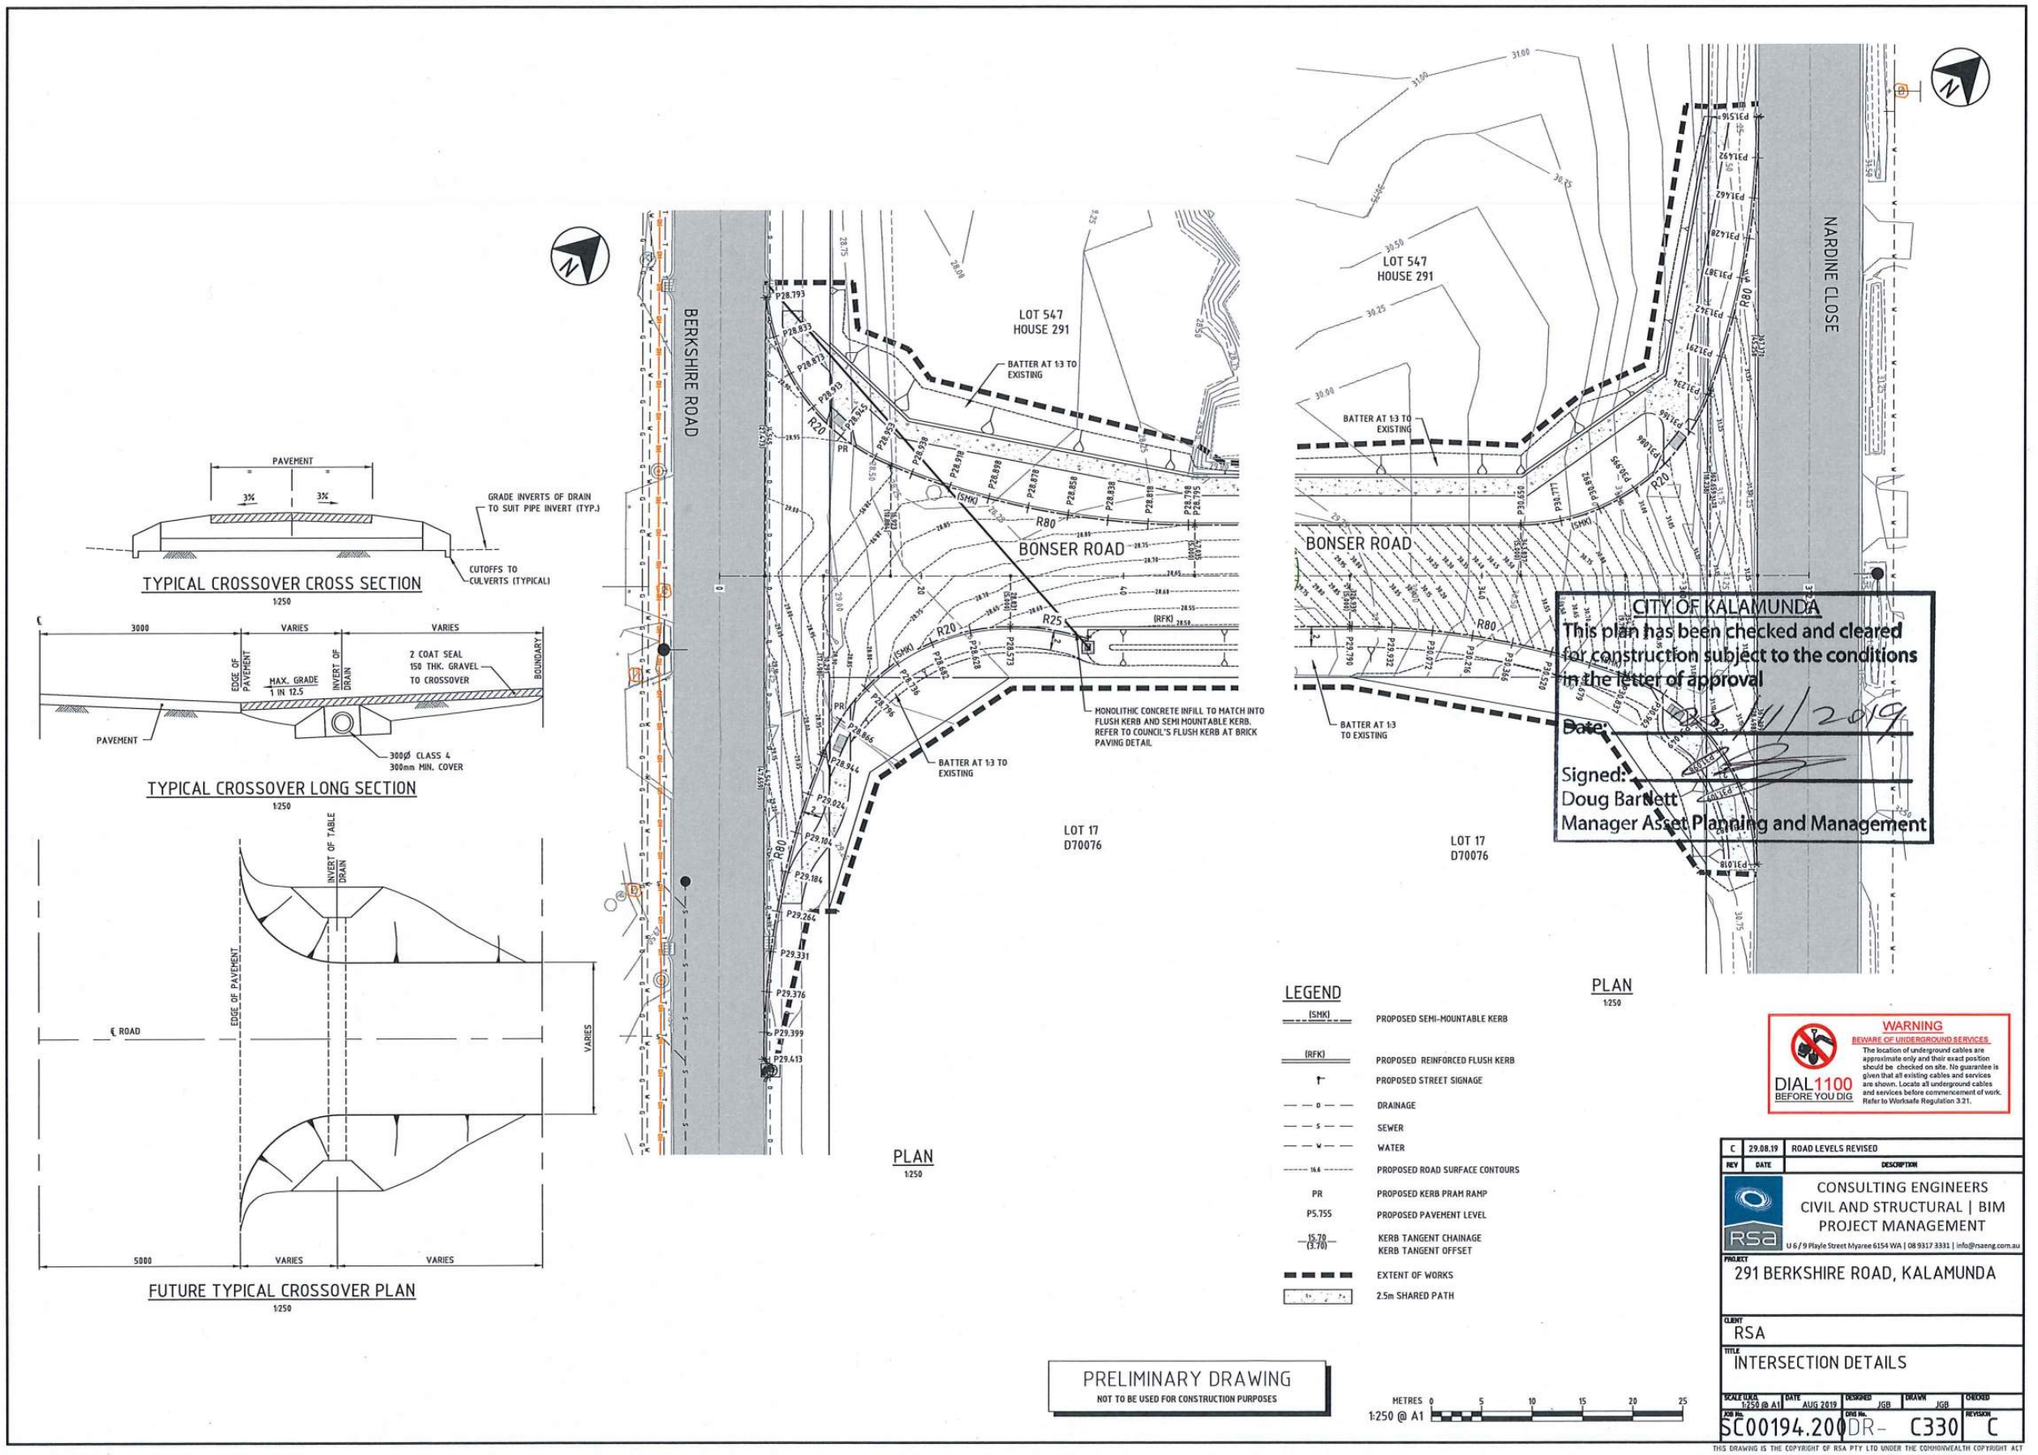
PRODUCED BY AN AUTODESK EDUCATIONAL PRODUCT



DESIGNED TO BE CONSTRUCTED DE-ENERGISED

NOTES FOR CONTRACTOR:

1. FOLLOW ALL PROCEDURES AND INSTALL EQUIPMENT AS PER THE LATEST EDITION OF WESTERN POWER'S UNDERGROUND DISTRIBUTION SCHEMES MANUAL.
2. CABLE TO BE INSTALLED AS PER WESTERN POWER'S NETWORK STANDARD NS 14.2 (UNDERGROUND CABLE INSTALLATION MANUAL).
3. VERIFY ALL MATERIAL QUANTITIES AGAINST SITE CONDITIONS PRIOR TO QUOTATION AND ADVISE ELECTRICAL CONSULTANTS OF ANY VARIATIONS.
4. ORGANISE ON SITE MEETING WITH WP PRIOR TO COMMENCEMENT OF WORK.
5. ALL AS CONSTRUCTED DRAWINGS AND RECORDS TO BE SUBMITTED TO ADMIN@APDENG.COM.AU PRIOR TO HANDOVER BEING SCHEDULED. REFER TO UDS MANUAL SECTION 6.2.2.
6. COMMENCE LAYING CABLES FROM THE TRANSFORMER OR SWITCHGEAR.
7. LOCATE AND PROTECT EXISTING SERVICES DURING CONSTRUCTION.
8. MAKE ALLOWANCE FOR TERRACING OF CABLES WHERE REQUIRED.
9. CONTRACTOR TO CONTACT WESTERN POWER CONSTRUCTION MANAGER TO CONFIRM CABLE TERMINATION DETAILS FOR WESTERN POWER INTERCONNECTION WORKS TO EXISTING NETWORK.
10. PLAN CABLE RUNS TO LIMIT THE NUMBER OF STRAIGHT JOINTS.
11. ALL WORK WITHIN ROAD RESERVE TO BE DONE IN ACCORDANCE WITH THE UTILITY PROVIDER'S CODE OF PRACTICE.
12. CABLE PROTECTOR SLABBINGS REQUIRED WHEN THE CABLE LEAVES THE STANDARD WESTERN POWER ALIGNMENT:
    A. TERMINATE AT STREETLIGHT POLE.
    B. ENTER ROAD CROSSING CONDUIT.
    C. TERMINATE AT CABLE POLE.
13. ALL CABLES LAID NEXT TO RETAINING WALLS TO BE IN CONDUIT.
14. REFER TO WP SUBDIVISION GUIDELINE NUMBER 04 FOR BEDDING SAND BACKFILL AROUND CABLES.
15. INSTALL HEATSHRINK "END CAP" AT ALL CABLE ENDS AND HEATSHRINK GLOVES ON ALL LV CABLE TERMINATION ENDS.
16. STREETLIGHT POLES MUST NOT BE INSTALLED IN FOOTPATHS. CONTACT APD IF ANY CONFLICTS ARE FOUND ON SITE PRIOR TO INSTALLATION.
17. THRUST/BORE UNDER EXISTING ROAD.
18. ALL ABOVE GROUND ASSETS INCLUDING SERVICE PILLARS, STREETLIGHTS AND LOW VOLTAGE (LV) FRAMES ARE TO BE LOCATED ON GROUND LEVEL 300mm ABOVE 100 YEAR FLOOD LEVEL AND NOT IN A PRECARIOUS POSITION. HIGH VOLTAGE EQUIPMENT AND SUBSTATIONS TO BE LOCATED 500mm ABOVE THE 100 YEAR FLOOD LEVEL.
19. ALL STREETLIGHT LOCATIONS TO BE SURVEYED BY CONTRACTOR PRIOR TO INSTALLATION TO ENSURE CORRECT LOCATIONS.
20. STREET LIGHT SL11-1 TO BE INSTALLED ON 2.7m ALIGNMENT AS SHOWN.
21. STREET LIGHTS SL11-2 AND SL9-1 TO SL9-6 TO BE INSTALLED ON 2.9m ALIGNMENT AS SHOWN TO AVOID CLASH WITH PROPOSED NEW FOOTPATH.
22. RETAINING WALLS TO HAVE DEEPER FOOTINGS FOR:
    A. CABLE ROAD CROSSINGS
    B. CABLE BENDS ON TRUNCATIONS
    C. CABLE JOINTS

WP SCOPE OF WORKS:

A. WP TO COST TO SUPPLY & INSTALL SL3 250W HPS ARTERIAL ROAD POLE-MOUNTED STREET LIGHT ONTO POLE S122686 AS SHOWN.

B. WP TO COST TO TERMINATE NEW 16SL CABLE INTO EXISTING LOT 94 (#280) UNI-PILLAR AND SUPPLY & INSTALL RED SPOT FUSE.

C. WP TO COST TO TERMINATE NEW 16SL CABLE INTO EXISTING STREET LIGHT AND SUPPLY & INSTALL RED SPOT FUSE.

MYAREE WA 6154

Dear Brendan,

Creation of Bonser Road - Acceptance of Civil Works Drawings

Thank you for submitting your revised engineering design drawings for the above development. The drawings received by the City are approved and signed accordingly.

This approval applies to the following drawings, and is subject to the requirements below:

- SC00194-200-C300 Rev D
- SC00194-200-C330 Rev D
- SC00194-200-C301 Rev D, subject to amending the road base thickness as per MRWA's road note 9.
- For Information only: ML010486-W_APD05235 and ML010486-W_APD05235-L01.

The approval of these drawings does not imply approval of any subsequent designs or revisions.

This approval does not represent or imply approval for costs associated with the work. Separate correspondence will be provided by the City in respect of the cost of work under the Agreement for the Funding and Construction of Bonser Road.

Please ensure the following requirements are met during the delivery of the works:

1. Notify in writing the business operators and residents, who are impacted by the work, advising them of the proposed works, scope of works, route of works and scheduled start and completion dates.
2. A Traffic Management Plan is required for any works in the road reserve.
3. Organize a pre-start meeting prior to start of construction with the City representative.

kalamunda.wa.gov.au
T 9257 9999 F 9293 2715 E enquiries@kalamunda.wa.gov.au
2 Railway Road KALAMUNDA WA 6076 PO Box 42, KALAMUNDA WA 6926
ABN 60 741 095 678

4. Notify the City representative for inspections as specified in the "City of Kalamunda Works inspection Requirements".
5. Control access to the site and manage safety in accordance with the OH&S Act and Regulations.
6. Manage dust and drainage during the works in accordance with the WAPC conditions and the Legal Agreement.
7. Reinstate any damaged public infrastructure to its original condition.
8. The hours of construction work shall be limited to 6.00 am to 8.00 pm. No work is to occur on Sundays and public holidays.
9. Approval is sought and received from Western Power and the Water Corporation for assets covered under their jurisdiction.

The City representative for the works is Partha Deb, Engineering Technical Officer Developments. Please contact Partha on 9257 9929 to arrange inspections.

If you have any queries regarding the above, please contact Raktim Barua, Coordinator of Development Engineering Services on 9257 9630.

Yours sincerely,

Doug Bartlett

Manager Asset Planning

5.1	Widen existing concrete footpaths (from 1.8m wide to 2.5m wide)	630	m2	$47.65	$30,019.50		Assumed existing footpath to be retained and widened to 2.5m. New footpath widening of 0.7 m for 900m assumed length. 0.7x900=630		$ 47.65	$ -		
5.2	Install new 100mm thick concrete footpath, 2m wide		m2					424	$ 47.65	$ 20,218		Remove and replace 30m of damaged path from Section 2, and 13m of 1.5m wide path from Section 3.
5.3	Supply and Install Pram Ramps	4	ea	$550.00	$2,200.00		Allowed for 2 road crossings. 2x2=4	6	$ 550.00	$ 3,300		Pram ramps only needed where crossovers have edge kerbing.
5.4	Install diagonal pavement line markings to crossovers		Width of crossover					194	$ 10.00	$ 1,941		The City specified diagonal pavement markings to delinate path through crossovers.
	Subtotal - Roadworks					**$32,220**					**$ 25,459**	
6	**Miscellaneous**											
6.1	Clean up	1	ITEM	$3,500.00	$3,500.00			1	$ 3,500.00	$ 3,500		
6.2	Adjust Telstra Pit	1	ITEM	$3,000.00	$3,000.00		Quantity based on aerial imaoery.	-	$ 3,000.00	$ -		Assessed as not required.
6.3	Adjust stay poles	1	ITEM	$5,000.00	$5,000.00		Quantity based on aerial imagery.	-	$ 5,000.00	$ -		Assessed as not required.
6.4	Adjust hydrant	1	ITEM	$3,000.00	$3,000.00		Quantity based on data from Water Corporation.	-	$ 3,000.00	$ -		Assessed as not required.
6.5	Provision for misc./unidentified service relocations	1	ITEM	$10,000.00	$10,000.00		A conservative allowance for minor works to existing services	1	$ 3,000.00	$ 3,000		Reduce the allowance from $10k to $3k for provision for unidentified servies relocation.
6.6	Crossover adjustments and reinstatements - allow $1500 per crossover.	4	ITEM	$1,500.00	$6,000.00		Although the original Mastersheet notes this $6000 amount, it is not included in the summation amount of $24,500	4	$ 1,500.00	$ 6,000		Although crossover adjustments are likely to be minimal within Section 4, consideration has been had for crossovers needing adjustment where a pram ramp is installed.
6.7	Supply and Install street lighting											City of Kalamunda has confirmed that there is no need for additional street lighting for Berkshire Rd.
	Subtotal - Miscellaneous					**$24,500**					**$ 12,500**	
7	**Conversion of overhead consumer lines to underground lines to provide RAV clearance requriements.**											
7.1	Convert overhead electrical lines (5 consumer lines) that conflict with RAV clearance requirements to underground lines							5	$ 15,000.00	$ 75,000		Refer to 3E's review of the overhead lines to Berkshire Road. (Doc: 3E19102-R01)
7.2	Ancillary works in relation to conversion to overhead to underground within the private property							5	$ 2,500.00	$ 12,500		Private cabling from the new pillars to the customer switchboards may be required.
	Subtotal - Convert overhead consumer lines					**$ -**	The Mastersheet did not allow for conversion of the overhead lines				**$ 87,500**	
8	**Subtotal**											
8.1	Construction Subtotal ex Prelims, Survey				$64,610					$ 129,053		
8.2	**Construction Subtotal**				**$71,717**					**$ 143,248**		
9	**Allowances and Charges**											
9.1	Traffic Management		5%		$3,586			5%		$ 7,162.42		
9.2	BCITF Levy		0.2%		$143			0.2%		$ 286		
9.3	Council Supervision		1.5%		$1,076			1.5%		$ 2,149		
9.4	Design and Superintendence		10%		$7,172			10.0%		$ 14,324.83		
9.5	Contingency		10%		$7,172			5%		$ 7,162.42		
	Subtotal - Allowances and Charges					**$19,148**					**$ 31,085**	
10	**TOTAL**				**$90,865**					**$ 174,333**		
Notes								**Notes**				
1. The estimates are provided as an order of magnitude of cost only and are subject to detailed design and agency approvals (Western Power, Water Corporation, etc.).								1. The estimates are provided as an order of magnitude of cost only and are subject to 100% detailed design status and agency approvals (Western Power, etc.)				
2. It is assumed that there is no requirement for imported fill.								2. All costing exclude GST.				
3. It is assumed that ground conditions do not require improvement for the construction of the footpath.												
4. It is assumed the existing footpath is generally 1800mm. Wide, and is in good condition.												
5. It is noted that communications, gas and gas services are not required consistent with Portions A & B.												
6. The estimate does not include land acquisition costs.												
7. All costing exclude GST.

	Subtotal - Survey Control and Testing						**$24,200**					**$ 35,334**		
3	**Clearing and Demolition**													
3.1	Clear Large Trees inc Grubbing	9	ea	$246.00	$2,214.00			Quantity based on aerial imagery.		$ 750.00	$ -		No large trees in the roadway. All considered to be small.	
3.2	Clear Small Trees inc Grubbing	6	ea	$179.00	$1,074.00			Quantity based on aerial imagery.	19	$ 500.00	$ 9,500.00		PCE has adopted for a higher rate due to existing services near trees to be removed & grubbed. All trees for removal considered small trees.	
3.3	Clear shrubs	5040	m2	$1.82	$9,172.80			Allowed for clearing from edge of footpath to road reserve boundary. Clearing required is approximately 4.5m on both sides for 560m assumed length. (4.5x2)x560=5040	111	$3.00	$ 333.00		Based on 85% status drawings	
3.4	Demolish and Dispose redundant footpaths (assumed width 2m)	1920	m2	$20.00	$38,400.00			Existing footpath on both sides of the road required to be removed as part of the road widening. Total length of footpath estimated as 960m with an existing width of 2m based on aerial imagery. 960x2=1920	1,494	$20.00	$ 29,874.00		Based on 85% status drawings	
3.5	Demolish and Dispose redundant kerbing	1120	m	$2.73	$3,057.60			Adopted road length 560m, estimated kerb length is double this. Excludes intersection upgrades at Dundas, Nardine and Sultana. 560x2=1120	1,220	$9.00	$ 10,981.80		Based on 85% status drawings	
3.6	Remove and Dispose redundant drainage pits	0	ea	$460.00	$0.00				8	$460.00	$ 3,680.00		Based on 85% status drawings	
3.7	Remove and Dispose redundant pavements	112	m2	$35.65	$3,992.80			100mm allowed on both side of the widening for the cut line.	-	$20.00	$ -		See item 3.8	
3.8	Remove and Dispose existing asphalt offsite. Excavate existing base and subbase for possible reuse as part of pavement reconstruction, basecourse as documented.								4,072	$20.00	$ 81,440.00		For pavements designated "Full depth pavement reconstruction with asphalt intersection mix" & "to be resurfaced"	
	Subtotal - Clearing and Demolition						**$57,911**					**$ 135,809**		
4	**Earthworks**													
4.1	Remove 100mm Topsoil to spoil	5040	m2	$3.00	$15,120.00			Allowed for topsoil stripping from edge of footpath to road reserve boundary. Area is approximately 4.5m on both sides for 560m assumed length. (4.5x2)x560=5040	2,280	$3.00	$ 6,840.00		Based on 85% drawings	
4.2	Form, Shape, Compact Subgrade	1680	m2	$4.00	$6,720.00			Existing 8m wide pavement. Widening to 10m with equal 1m widening on both side. An additional 500mm of widening has been allowed for on both sides to allow for kerbing. Total of 3m widening has been allowed for roadbase construction for estimated length of 560m. 3x560=1680	2,915	$4.00	$ 11,660.16		Based on 85% drawings	
4.4	Import Fill, Shape, Compact	0	m3	$30.00	$0.00				-	$30.00	$ -			
4.5	Cut to spoil	1100	m3	$24.64	$27,104.00			Removal of unsuitable materials based on Portion B rate. Excavate to prepare subgrade to say 600-700mm depth		$24.64	$ -		The pavement investigation did not encounter any clay or unsuitable material. That is not to say unsuitable material wont be encountered.	
4.6	Cut to spoil for boxout formation of widening.		m3						815.40	$24.64	$ 20,091.46		Spoils to be removed & disposed offsite for the widening boxout.	
4.7	Dust Control	1	ITEM	$3,000.00	$3,000.00				1	$3,000.00	$ 3,000.00			
	Subtotal - Earthworks						**$51,944**					**$ 41,592**		
5	**Roadworks**													
5.1	Rip and rework the existing base course to minimum 150mm		m2						2,312	$ 4.00	$ 9,248.00		For pavements designated "To be Resurfaced"	
5.2	Supply and Install 220mm limestone sub-base	370	m3	$50.00	$18,480.00			Sub-base has been calculated for the 3m widening for estimated length of 560m for a depth of 220mm. (3x560)x0.22=370	-	$50.00	$ -			
5.3	Supply and Install 200mm limestone sub-base		m2						2,915	$12.00	$ 34,980.48		For pavements designated "Full depth pavement reconstruction with asphalt intersection mix" & "pavement widening"	
5.4	Supply and Install 100mm road base	168	m3	$65.00	$10,920.00			Basecourse has been calculated for the 3m widening for estimated length of 560m for a depth of 100mm. (3x560)x0.1=168	-		$ -			
5.5	Supply and Install 150mm road base		m3						2,915	$ 12.00	$ 34,980.48		For pavements designated "Full depth pavement reconstruction with asphalt intersection mix" & "pavement widening"	
5.6														
5.7	Supply and Install 7mm Primer Seal	1680	m2	$2.60	$4,368.00			Primer seal has been calculated for the 3m widening for estimated length of 560m. 3x560=1680	5,227.04	$2.60	$ 13,590.30		Porter's design will result in the existing pavement and new pavement areas needing sealing.	
5.8	Supply and Install 30mm AC10 (black)	5600	m2	$12.19	$68,264.00			Allows for full resheet of 10m wide pavement for estimated 560m length. 10x560=5600	3,715	$12.19	$ 45,285.12			
5.9	Supply and Install 40mm AC10 (intersection mix)								1,704	$18.00	$ 30,673.80			
5.10	Supply and Install FK	0	m	$20.00	$0.00						$ -			
5.11	Supply and Install MK (refer note 8)	0	m	$35.00	$0.00						$ -			
5.12	Supply and Install Reinforced Mountable Kerb		m						246	$ 60.00	$ 14,751.00			
5.13	Supply and Install SMK (refer note 8)	1120	m	$20.48	$22,937.60			Semi Mountable Kerb assumed for entire job. Estimated road length of 560m. 2x560=1120	1,133	$20.48	$ 23,203.84			
5.14	Key kerbs		m						265	$17.00	$ 4,511.80			
5.15	Remove existing crossover		m2						795	$20.00	$ 15,906.00			
5.16	Reinstate existing Crossovers	640	m2	$90.00	$57,600.00			Allowing 40m2 reinstated for 16 crossovers. 16x40=640		$90.00	$ -		See below for crossovers being reinstated in varying materials	
5.17	Reinstated Concrete Crossovers for commercial/industrial properties to be: 150mm thick N32MPa concrete with SL62 mesh centrally located with a 100mm limestone basecourse.		m2						430	$110.00	$ 47,267.00		Based on 85% designs	
5.18	Reinstate Asphalt crossovers for commercial/industrial properties to be: 150mm thick rock roadbase, 7mm primer seal with 30mm asphalt wearing course.		m2						126	$18.79	$ 2,373.18		Based on 85% designs	
5.19	Reinstate concrete crossovers to residential properties to be: 100mm thick N32MPa with 150mm limestone base.		m2						93	$100.00	$ 9,320.00		Based on 85% designs	
5.20	Reinstate Asphalt crossovers to residential properties to be: 100mm thick rock roadbase, primer seal with 30mm asphalt wearing course.		m2						35	$18.79	$ 661.41		Based on 85% designs	
5.21	Reinstate Existing block paving crossovers is to have the existing bricks retained for reuse towards reinstating the crossover on a 150mm limestone base.		m2						30	$54.00	$ 1,614.60		Based on 85% designs	
5.22	Reinstate industrial and commerciallaterite gravel crossover 150mm thick		m2						93	$16.00	$ 1,494.40		Based on 85% designs	
5.23	Supply and Install new concrete shared path(2.5m wide)	1400	m2	$38.12	$53,368.00			Assumed only reinstating footpath on one side of the road with a width of 2.5m for estimated length of 560m. 2.5x560=1400	1,565	$38.12	$ 59,648.27		Based on 85% designs	
5.24	Supply and Install new concrete footpaths (1.8m wide)								1,185	$38.12	$ 45,163.05		Based on 85% designs	
5.25	Supply and Install Pram Ramps	2	ea	$550.00	$1,100.00			Allowed for one road crossing at Eureka Street.	7	$550.00	$ 3,850.00			
	Subtotal - Roadworks						**$237,038**					**$ 398,523**		
6	**Drainage**													
6.1	Supply and Install new 300dia culverts	0	ea	$2,000.00	$0.00				-	$2,000.00	$ -			
6.2	Remove and Replace existing culverts	0	ea	$1,120.00	$0.00					$500.00	$ -			
6.3	Convert Existing SEP's to Gully's	14	ea	$2,500.00	$35,000.00			Quantity based on aerial imagery.		$2,500.00	$ -			
6.4	Convert Existing SEP's to Manholes	0	ea	$2,000.00	$0.00				-	$2,000.00	$ -			
6.5	Remove existing drainage pit								7	$500.00	$ 3,500.00		Based on 85% designs	
6.6	Supply and Install new SEP or Gully pit.	0	ea	$3,000.00	$0.00				8	$3,000.00	$ 24,000.00		Based on 85% designs	
6.7	Supply and Install 300 dia. RCP	0	ea						-		$ -		Based on 85% designs	
6.8	Supply and Install 375 dia. RCP	15	m	$400.00	$6,000.00			Factor $200/m x 2 given small piecing/connections.	-	$400.00	$ -			
	Subtotal - Drainage						**$41,000**					**$ 27,500**		
7	**Miscellaneous**													
7.1	Supply and Install misc linemarking and Signage	1	ITEM	$5,000.00	$5,000.00				1	$5,000.00	$ 5,000.00		Milner Road and the intersections are currently not linemarked. But linemarking and stencils are required on the 2.5m shared path.	
7.2	Supply and Install street lighting	560	m	$110.00	$61,600.00			Based on adopted road length of 560m and Portion A & B pricing.		$110.00	$ -			
7.3	Supply and install street lighting including cabling		ea pole						5	$3,000.00	$ 15,000.00		New luminaires and outreaches on existing timber poles	
7.4	Remove light poles		ea pole						2	$2,500.00	$ 5,000.00			
7.5	Relocate gas marker post								4	$500.00	$ 2,000.00			
7.6	Supply and Install trees	0	ea	$450.00	$0.00				-	$450.00	$ -			
7.7	Maintenance of trees and verges for a 2 year period	0	Year	$11,353.75	$0.00				-	$11,353.75	$ -			
7.8	Supply and Install select fill for swales	0	m3	$30.00	$0.00				-	$30.00	$ -			
7.9	Supply and Install gravel for swales	0	m2	$33.00	$0.00				-	$33.00	$ -			
7.10	Clean up	1	ITEM	$2,500.00	$2,500.00				1	$2,500.00	$ 2,500.00			
7.11	Adjust access chamber (sewer manhole) in road	1	ea	$7,000.00	$7,000.00			Estimate based on data from Water Corporation. 1 Manhole observed.	1	$3,000.00	$ 3,000.00		The Mastersheet amount of $7k seems high.	
7.12	Adjust hydrant lids		ea						1	$750.00	$ 750.00			
7.13	Provision for misc./unidentified service relocations	1	ITEM	$20,000.00	$20,000.00				1	$10,000.00	$ 10,000.00		Provisional allowance should it arise other services need adiusting	
7.14	Provisional: High Pressure gas spotter		item						1	$ 50,000.00	$ 50,000.00		Atco Gas will require a spotter on-site when there is works occurring in the vicinity of the HP gas which is in the northern verge.	
7.15	DCVG coating survey on HP gas main (**Provisional**)		item						1	$ 5,000.00	$ 5,000.00		When working near HP Gas, ATCO has in the past required testing of the surface coating on HP gas mains. A provisional allowance has been made.	
7.16	Western Power quote for interfacing works (**Provisional**)								1	$ 5,000.00	$ 5,000.00		A nominal provisional allowance has been made for any Western Power interfacing works between the existing assets and proposed works which may arise to avoid the underground pits, and new street lighting.	
	Subtotal - Miscellaneous						**$96,100**					**$ 103,250**		
8	**Subtotal**													
8.1	Construction Subtotal ex Prelims, Survey				$483,992.80						$ 706,673			
	Construction Subtotal				**$537,232.91**						**$ 784,497**			

9	**Allowances and Charges**												
9.1	Traffic Management		5%	$26,862				5%	$	39,220		
9.2	BCITF Levy		0.2%	$1,074				0.2%	$	1,569		
9.3	Council Supervision		1.5%	$8,058				1.5%	$	11,766		
9.4	Design and Superintendence		10%	$53,723				5.0%	$	39,220		Design and superintendence fee reduced from 10% to 5% which is reflective of the likely remaining designs to achieve 100% status
9.5	Contingency		20%	$107,446			Refer Note 9 below	5.0%	$	39,220		The design development has progressed to an 85% status, supporting the contingency can be further reduced from 10% (Rev B of DCP), to ~~5%~~
	Subtotal - Allowances and Charges					$197,164					$	**130,996**	
10	**TOTAL**			**$734,396**						######## ######			
Notes								**Notes**					
1. This estimate is based on current project information and is preliminary only.								1. This estimate is based on the 85% design status drawings					
2. The estimates are provided as an order of magnitude of cost only and are subject to detailed design and agency approvals (Western Power, Water Corporation, etc.).								2. The design and estimates are subject toAuthority approvals.					
3. It is assumed that there is no requirement for imported fill.								3. The estimate does not include land acquisition costs.					
4. It is assumed that ground conditions do not require improvement for the construction of road pavement.								4. All costing exclude GST.					
5. It is assumed that communications, gas and gas services are not required as per Portions A & B.													
6. The estimate does not include land acquisition costs.													
7. All costing exclude GST.													
8. No allowance for key of kerbing (add $17 to linear rate)													
9. A contingency of 20% has been applied. The added contingency recognises the unknown condition of the pavement, and the need for a geotechnical assesssment of the pavement condition prior to the preparation of design drawings.

3.5	Demolish and Dispose redundant kerbing	0	m	$20.24	$0.00									
3.6	Remove and Dispose redundant drainage pits	0	ea	$460.00	$0.00									
3.7	Remove and Dispose redundant pavements	0	m2	$35.65	$0.00									
3.8	Existing drainage culvert to be removed & disposed		m											
	Subtotal - clearing and demolition						$ 12,180					$ -	Clearing and Demolition considered to be included in the Preliminaries section	
4	**Earthworks**													
4.1	Remove 100mm Topsoil to spoil	4725	m2	$3.00	$14,175.00			Allowed for 13.5m wide of topsoil stripping for the assumed length of 350m. 13.5x350=4725						
4.2	Form, Shape, Compact Subgrade	3850	m2	$4.00	$15,400.00			Allowed for 11m wide for the assumed length of 350m. 11x350=3850						
4.3	Form and Compact Embankment Foundation	3850	m2	$2.70	$10,395.00			Allowed for 11m wide for the assumed length of 350m. 11x350=3850						
4.4	Import Fill, Shape, Compact	0	m3	$30.00	$0.00									
4.5	Cut to spoil	385	m3	$24.64	$9,486.40			Allowed for 100mm of cut for topsoil area. (13.5x350)x0.1=385						
4.6	Dust Control	1	ITEM	$3,000.00	$3,000.00									
	Subtotal - Earthworks						$ 52,456					$ -	Earthworks included in the Roadworks section	
5	**Roadworks**													
5.1	Supply and Install 220mm limestone sub-base	847	m3	$50.00	$42,350.00			Allowed for a 220mm depth for an area of 11m wide for the assumed length of 350m. 11x350=3850. (11x350)x0.22=847						
5.2	Supply and Install 150mm limestone sub-base		m2											
5.3	Supply and Install 100mm road base	385	m3	$65.00	$25,025.00			Allowed for a 100mm depth for an area of 11m wide for the assumed length of 350m. 11x350=3850. (11x350)x0.1=847						
5.4	Supply and Install 7mm Primer Seal	3950	m2	$2.60	$10,270.00			Allowed for 11m wide for the assumed length of 350m plus 100m for contingency. 11x350+100=3950						
5.5	Supply and Install 30mm AC10	3600	m2	$12.19	$43,884.00			Allowed for 10m wide for the assumed length of 350m plus 100m for contingency. 10x350=3600						
5.6	Supply and Install FK	625	m	$55.20	$34,500.00			Flush kerbing assumed for road length minus the intersections which will have semi mountable kerbing. Estimated road length of 350m. 2x350-SMK value=2x350-75=625						
5.7	Supply and Install MK (refer note 8)	0	m	$35.00	$0.00									
5.8	Supply and Install SMK (refer note 8)	75	m	$20.48	$1,536.00			Allowed for semi mountable kerbing at the intersections. Assuming 12m radius at intersections for 4 corners approximate kerb length is the circumference of a circle with a radius of 12. 2xpi()x12=75.39 rounded down to 75.						
5.9	key kerbs													
5.10	Reinstate existing Crossovers	0	m2	$90.00	$0.00									
5.11	Supply and Install new concrete footpaths (2.5m wide)	875	m2	$38.12	$33,355.00			Assumed footpath will only be on one side of the road. Estimated lenoth of new footoath 350m with a width of 2.5m.						
5.12	Supply and Install Pram Ramps	2	ea	$550.00	$1,100.00			Allowed for one road crossing.						
	Subtotal - roadworks						$ 192,020					$ 312,248		
6	**Stormwater Drainage**													
6.1	Supply and Install new 300dia culverts	0	ea	$2,000.00	$0.00									
6.2	Remove and Replace existing culverts	0	ea	$1,120.00	$0.00									
6.3	Convert Existing SEP's to Gully's	0	ea	$2,500.00	$0.00									
6.4	Covert Existing SEP's to Manholes	0	ea	$2,000.00	$0.00									
6.5	Supply and Install new SEP's	0	ea	$3,000.00	$0.00									
	Subtotal - drainage						$ -					$ 30,792		
7	**Miscellaneous**													
7.1	Supply and Install street lighting	350	m	$110.00	$38,500.00			Based on adopted road length of 350m and Portion A & B pricing.			$ 42,822.86		From the Bonser Road schedule based on Tender Price	
7.2	Supply and Install misc linemarking and Signage	1	ITEM	$5,000.00	$5,000.00								-	
7.3	Supply and Install vegetation for swales	700	m2	$10.00	$7,000.00			Assumed swale running down one side of the road. Allowed for a width of 2m. 2x350=700.						
7.4	Supply and Install trees	24	ea	$450.00	$10,800.00			Allowed for trees at 15m spacing for the entire road length. 350/15=23.33 rounded up.						
7.5	Maintenance of trees and verges for a 2 year period	2	Year	$7,975.94	$15,951.88									
7.6	Supply and Install select fill for swales	140	m3	$30.00	$4,200.00			Assumed swale running down one side of the road. Allowed for a width of 2m and 200mm fill depth. (2x350)x0.2=140.						
7.7	Supply & install sandy loam mixed with chip mulch or red-mud for chosphorus & nitrogen absorption													
7.8	Supply and Install gravel for swales	0	m2	$33.00	$0.00									
7.9	Clean up	1	ITEM	$2,000.00	$2,000.00									
7.10	Provision for misc./unidentified service relocations	1	ITEM	$5,000.00	$5,000.00									
	Subtotal - Miscellaneous						$ 88,452					$ 42,823		
XX	For construction of truncations once land is acquired from Lots 16 and 17 Berkshire Road (Stage 2)											$ 70,038		
8	**Subtotal**													
8.1	Construction Subtotal ex Prelims, Survey				$345,108						$ 455,900			
8.2	Construction Subtotal				$383,070						$ 500,874			
9	**Allowances and Charges**													
9.1	Traffic Management		5%		$19,153.48				0.0%		$ -		Traffic management is noted to be included in the Preliminaries costs	
9.2	BCITF Levy		0.2%		$766.14						$ -		Assumed to be included in the overall costs	
9.3	Council Supervision		1.5%		$5,746.04				1.5%		$ 7,513		1.5% of subtotal 2 which includes Stage 2 separable portion	
9.4	Design and Superintendence		10%		$38,306.96				3%		$ 39,200		includes $39,200 of design costs to date	
	Superintendence								3%		$ 15,026		3% of subtotal 2	
9.5	Contingency		10%		$38,306.96				5%		$ 25,044		5% of subtotal 2	
	Subtotal - Allowances and Charges											$ 86,783		
10	**Total**				**$485,349**						$ 587,657			
	Notes								**Notes**					
	1. This estimate is based on current project information and is preliminary only.								1. Based on the Serling Consulting drawings provided.					
	2. The estimates are provided as an order of magnitude of cost only and are subject to detailed design and agency approvals (Western Power, Water Corporation, etc.).								2. The estimates are provided as an order of magnitude of cost only and are subject to detailed design and agency approvals (Western Power, Water Co					
	3. It is assumed that there is no requirement for imported fill.								3. It is assumed that ground conditions do not require improvement for the construction of road pavement.					
	4. It is assumed that ground conditions do not require improvement for the construction of road pavement.								4. Assumes there is no need for water, gas or communication installation works.					
	5. It is assumed that communications, gas and gas services are not required as per Portions A & B.								5. The estimate does not include land acquisition costs.					
	6. The estimate does not include land acquisition costs.								6. All costing exclude GST.					
	7. All costing exclude GST.													
	8. No allowance for key of kerbing (add $17 to linear rate)								Prepared by Michael Cook of Porter Consulting Engineers					

	BONSER ROAD (LOCATED BETWEEN BERKSHIRE ROAD AND NARDINE CLOSE)			
	Costs as advised by Chris Lodge (CoKalamunda), email 24 June 2020			
	Approximate Length 350m			
Item	**Description**			**Notes**
1	**Preliminaries**	**$**	**44,974**	Includes mobilisation, demobilisation, site establishment, supervision and management, survey and set out, construction water, traffic management, insurances, BCITF levy
2	**Road Construction**	**$**	**312,248**	
2.1	Clearing and Earthworks	$	21,398	Includes clearing and grubbing, topsoil removal, cut to fill, cut to spoil
2.2	Roadwworks	$	213,625	Includes subgrade preparation, subbbase 150mm limestone, basecourse roadbase, primer seal and asphalt
2.3	Kerbing and Footpath	$	71,053	Includes semi mountable kerb, flush edge beam, backifill behind kerbs, concrete footpath, pram ramps
2.4	Miscellaneous	$	6,171	includes pavement testing, kerb removal, footpath removal (Nardine), saw cut and remove asphalt
3	**Stormwater**	**$**	**30,792**	
3.1	Excavation and Pipework	$	4,460	Includes excavation and backfill
3.2	Concrete Pits	$	6,003	Includes gully pit, side entry pit over existing drainage line, replace existing pit cover with gully lid
3.3	Swale Drain	$	19,243	Includes excavation and trimming of swale, supply and install chip mulch, supply and install gravel media, plantings
3.4	Miscellaneous	$	1,085	Includes the removal of existing culvert
4	**Street Lighting**	**$**	**42,823**	
4.1	Excavation and Cabling	$	12,294	Includes excavation, supply, install and backfiull for cable
4.2	Conduit	$	552	Includes supply and install of conduit, misc caps, nuts, bolts etc.
4.3	Street Lights	$	14,677	Supply and install street light poles
4.4	Miscellaneous	$	13,325	Liaison with Western Power, transport materials, testing and commissioning, under road boring.
4.5	Additional Electrical Design Costs due to Staging	$	1,975	Refer to RSA Engineering email 7.2.2020
Subtotal 1		**$**	**430,837**	**Excludes Stage 2 separable portion**
5	**Stage 2 - Separable Portion**	**$**	**70,038**	**For construction of truncations once land is acquired from Lots 16 and 17 Berkshire Road (Stage 2)**
5.1	Preliminaries	$	12,825	Includes mobilisation and demobilisation, site establishment, supervision, management, survey and setout, construction water, traffic management
5.2	Clearing and Earthworks	$	1,737	Includes clearing and grubbing, topsoil removal.
5.3	Roadworks	$	28,840	Includes subgrade preparation, subbase limestone, basecourse roadbase, primer seal and asphalt.
5.4	Kerbing and Footpath	$	6,670	Includes semi mountable kerb, backfill behind kerbs, concrete footpath, pram ramps.
5.5	Concrete Pits	$	3,730	Includes site entry pit over existing drainage line, replace existing pit cover with gully type lid.
5.6	Power Reticulation	$	9,688	
5.7	Miscellaneous	$	5,049	Includes pavement testing, removal of kerbs, removal of existing crossover, saw cut and remove asphalt.
5.8	Additional Electrical Design Costs due to Staging	$	1,500	Refer to RSA Engineering email 7.2.2020
Subtotal 2		**$**	**500,874**	**Includes Stage 2 separable portion**
6	**Allowances and Charges**			
6.1	**Council Supervision**	$	7,513	1.5% of subtotal 2
6.2	**Design and Superintendence**	$	39,200	includes $39,200 of design costs to date
6.3	**Superintendence**	$	15,026	3% of subtotal 2
6.4	**Contingency**	$	25,044	5% of subtotal 2
Total		**$**	**587,657**	**Includes Stage 2 and allowances/charges**
Notes				
1. Costs based on tender prices and design costs incurred to date as advised by the City of Kalamunda. Refer C.Lodge email 24-6-2020				
2. The estimate does not include land acquisition costs.				
3. All costing exclude GST.				
4. Construction of Bonser Road subject to prefunding agreement witih landowner				

Forrestfield Industrial Area - August 2018 Version J

Road 2A
Revised Cost August 2018 - Based on Curnow Portion B rates
Approximate Length 440m. Refer to Porter Consulting Engineers drawings set 16-09-116 Stage 1 and Stage 2.
Section End of Portion B CH1030 - Lot 50 Sultana W Road

1	**Preliminaries**																				
1.1	All Preliminaries (Mobilisation, Supervision, Insurances, Safety etc.)			6%	$39,399										8%	$ 30,022			$ 30,021.55		
	Subtotal - Preliminaries					**$39,398.86**					**$ 97,326.03**	Based on Construction contract amounts					**$ 30,022**			**$ 127,348**	
2	**Survey Control and Testing**																				
2.1	All Survey (Setout, As-Cons, Compaction Testing etc.)			5%	$32,832										8%	$ 30,022			$ 30,021.55		
	Subtotal - Survey Control and Testing					**$32,832.39**				Included in Preliminaries		Based on Construction contract amounts					**$ 30,022**			**$ 30,022**	
3	**Clearing and Demolition**																				
3.1	Clear all vegetation and inc Grubbing of trees	1	Item	$25,000.00	$25,000									1	$15,000.00	$ 15,000			$ 15,000.00		
3.2	Demolition and Reinstatement of Garage	1	ITEM	$100,000.00	$100,000		$100,000 assumes demolition of approximately $70,000 and reinstatement of approximately $30,000.							1	$100,000.00	$ 100,000		Assumed for the removal of existing garage to the residence within lot 51 in Stage 2. The City has a quantity surveyor provide an estimate for demolition & replacement of the garage	$ 100,000.00		
3.3	Demolish and Dispose redundant footpaths	0	m2	$20.00	$0											$ -			$ -		
3.4	Demolish and Dispose redundant kerbing	0	m	$20.24	$0											$ -			$ -		
3.5	Remove and Dispose redundant drainage pits	0	ea	$460.00	$0											$ -			$ -		
3.6	Remove and Dispose redundant pavements	0	m2	$35.65	$0									654	$20.00	$ 13,080		Removal of existing tempoary turnaround constructed in Stage 1. The mastersheet notes a rate of $35.65/m2 which is towards the higher end of the range. PCE has noted a rate of $20/m2 for use.	$ 13,080.00		
3.7	Demolition works within lot 5 (shed)															$ -			$ -		
3.8	Demolition works within Lot 52 (mainly brick paving & small wall & make good)															$ -			$ -		
3.9	Remove existing garden limestone retaining wall within lot 52 (1c to 2c exposed)															$ -			$ -		
3.10	Demolition works within Lot 51 (shed, bitumen driveway, and carport to house and make good)													0	$60,000.00	$ -		included in item 3.2 above with the $100,000 allowance.	$ -		
3.11	Demolition works within Lot 51 at CH 38(sheds, slabs, lean to's)													0	$20,000.00	$ -		Recent Structure Plan modifications removes dogleg of battle axe.	$ -		
	Subtotal - Clearing and Demolition					**$125,000.00**					**$ 25,461.87**	Based on Construction contract amounts					**$ 128,080**			**$ 153,542**	
4	**Earthworks & Retaining**																				
4.1	Remove 100mm Topsoil, stockpile and respread	9200	m2	$4.00	$36,800		Area measured from design drawing							3340	$4.00	$ 13,360			$ 13,360.00		
4.2	Form, Shape, Compact Subgrade	5678	m2	$4.00	$22,712		Area measured from design drawing. Road area (measured 5150m2) + 0.6 m box out each side. 5150+(0.6x2)x450							2231	$4.00	$ 8,924			$ 8,924.00		
4.3	Form and Compact Embankment Foundation	3520	m2	$2.70	$9,504		Area measured from design drawing. Trimming of verges. Verge width 4m on both side. (4x2)x440=3520							1,109	$2.70	$ 2,994			$ 2,994.30		
4.4	Import Fill, Shape, Compact	0	m3	$30.00	$0									0	$30.00	$ -			$ -		
4.5	Cut to spoil (cart offsite)	0	m3	$24.64	$0									530	$25.00	$ 13,250		PCE assesses there is likely to be excess spoil material, based on cut/fill/balance DTM calculation available to Porter's being the design consultant	$ 13,250.00		
4.6	Cut to fill	1000	m3	$5.00	$5,000		Based on Porter's figures.							265	$5.00	$ 1,325		PCE assesses there is likely to be excess spoil material, based on cut/fill/balance DTM calculation available to Porter's being the design consultant	$ 1,325.00		
4.7	Excavate, Form and Compact Swales	375	m	$8.00	$3,000		Area measured from design drawing							422	$8.00	$ 3,376			$ 3,376.00		
4.8	Dust Control	1	ITEM	$9,000.00	$9,000									1	$4,500.00	$ 4,500			$ 4,500.00		
4.9	Post and Panel Wall 0 - 0.5m high																		$ -		
4.10	Reinstate brick paving by the home of lot 52 following completion of new retaining wall																		$ -		
	Subtotal - Earthworks & Retaining					**$86,016.00**					**$ 29,047.50**	Based on Construction contract amounts					**$ 47,729**			**$ 76,777**	
5	**Roadworks**																				
5.1	Supply and Install 200mm limestone sub-base	1136	m3	$50.00	$56,800		Road area with 200mm depth. Road area measured from design drawing. 5678x0.2=1135.6 rounded up.							446	$50.00	$ 22,310		The mastersheet notes a cubic metre rate, when usually this item is costed as a square meter rate. A rate of $50/m3 equates to $10/m2 for 200mm subbase, within the expected range	$ 22,310.00		
5.2	Supply and Install 100mm road base	568	m3	$65.00	$36,920		Road area with 100mm depth. Road area measured from design drawing. 5678x0.1=567.8 rounded up.							223	$85.00	$ 18,964		The mastersheet notes a cubic metre rate, when usually this item is costed as a square meter rate. A rate of $65/m3 equates to $6.5/m2 of 100mm of base course, which PCE consider too low. PCE suggest using a rate of $85/m3 that equates to $8.5/m2 which is the same rate used for the Berkshire/Ashby portion of the works	$ 18,963.50		
5.3	Supply and Install 7mm Primer Seal	5678	m2	$2.60	$14,763		Area measured from design drawing. Road area (measured 5150m2) + 0.6 m box out each side. 5150+(0.6x2)x450							2,231	$2.60	$ 5,801			$ 5,800.60		
5.4	Supply and Install 30mm AC10	5150	m2	$12.19	$62,779		Area measured from design drawing							2,231	$12.19	$ 27,196			$ 27,195.89		
5.5	Supply and Install FK	382	m	$55.20	$21,086		Length measured from design drawing							127	$55.20	$ 7,027			$ 7,026.96		
5.6	Supply and Install MK (refer note 8)	515	m	$35.00	$18,025		Length measured from design drawing							97	$20.00	$ 1,946			$ 1,946.00		
5.7	Supply and Install SMK (refer note 8)	123	m	$20.48	$2,519		Length measured from design drawing							119	$20.48	$ 2,445			$ 2,445.31		
5.8	Reinstate existing Crossovers	120	m2	$92.00	$11,040		Allowing 40m2 reinstated for 3 crossovers. 3x40=120							25	$92.00	$ 2,300		Although not explicitly shown on drawing 401 Rev G, a crossover will need to be provided/reinstated for lot 52 following removal of the temporary turnaround	$ 2,300.00		
5.9	Gravel driveway to lot 52		m2											60	$50.00	$ 3,000		Although not explicitly shown on drawing 401 Rev G, the gravel drivewy to lot 52 will need to be extended to the new kerbline following removal of the temporary turnaround	$ 3,000.00		
5.10	Emergency vehicle crossover to lot 50		m2											50	$90.00	$ 4,500					
	Swing gate to lot 50		item											1	$1,000.00	$ 1,000					
5.11	Supply and Install new concrete footpaths (2.5m wide)	1100	m2	$40.00	$44,000		Allowed for footpath on one side of the road with a width of 2.5m for estimated length of 440m. 2.5x440=1100							531	$40.00	$ 21,252		The mastersheet notes a 2.5m wide footpath. But Porter's drawing notes 2.1m wide path. PCE has assessed a 2.1m wide path	$ 21,252.00		
5.12	Supply and Install Pram Ramps	2	ea	$550.00	$1,100		Allowed for one road crossing.							2	$550.00	$ 1,100			$ 1,100.00		
5.13	Key kerbs		m											119	$17.00	$ 2,030			$ 2,029.80		
	Subtotal - Roadworks					**$269,031.74**					**$ 193,864.36**	Based on Construction contract amounts					**$ 120,870**			**$ 314,734**	
6	**Drainage**																				
6.1	Supply and Install Rock Pitching - Weirs	3	item	$1,000.00	$3,000		Quantity based on design drawing.							3	$1,000.00	$ 3,000		The mastersheet uses a rate of $1000 for each weir, which is considered acceptable although probably at the higher end of the expected range	$ 3,000.00		
	Stone Pitching		m2											4	$180.00	$ 720			$ 720.00		
6.2	Supply and Install new 300dia culverts	0	ea	$2,000.00	$0											$ -			$ -		
6.2	Remove and Replace existing culverts	0	ea	$1,120.00	$0											$ -			$ -		
6.4	Convert Existing SEP's to Gully's	0	ea	$2,500.00	$0											$ -			$ -		
6.5	Covert Existing SEP's to Manholes	0	ea	$2,000.00	$0											$ -			$ -		
6.6	Supply and Install new SEP's	0	ea	$3,000.00	$0											$ -			$ -		
	Subtotal - Drainage					**$3,000.00**					**$ 3,246.29**	Based on Construction contract amounts					**$ 3,720**			**$ 6,966**	
7	**Miscellaneous**																				
7.1	Supply and Install street lighting	440	m	$110.00	$48,400		Based on adopted road length of 440m and Portion A & B pricing							165	$110.00	$ 18,150			$ 18,150.00		
7.2	Supply and Install misc linemarking and Signage	1	ITEM	$2,000.00	$2,000									1	$1,000.00	$ 1,000		Although chevron signs are not shown on 16-9-116/400 Rev G, it is expected that at least one chevron is required to be installed for the culdesac	$ 1,000.00		
7.3	Supply and Install vegetation for swales	0	m2	$10.00	$0											$ -			$ -		
7.4	Supply and Install trees	0	ea	$450.00	$0											$ -			$ -		
7.5	Maintenance of trees and verges for a 2 year period	0	Year	$6,228.75	$0											$ -			$ -		
7.6	Supply and Install select fill for swales		N/A	$30.00	$0											$ -			$ -		
7.7	Supply and Install gravel for swales		N/A	$33.00	$0											$ -			$ -		
7.8	Clean up	1	ITEM	$10,000.00	$10,000									1	$5,000.00	$ 5,000			$ 5,000.00		
7.9	Provision for misc./unidentified service relocations	1	ITEM		$10,000									1	$5,000.00	$ 5,000			$ 5,000.00		
7.10	Fencing on Western Boundary of Lot 499 - Adjustments		ALLOW		$5,000											$ -		Does not appear lot 499 fencing needs adjusting within stage 2	$ -		
7.11	Relocate leach drain for home in lot 52 if encountered (Provisional)															$ -			$ -		
7.12	Adjust domestic services to lot 52 if encountered (Provisional)															$ -			$ -		
	Subtotal - Miscellaneous					**$75,400.00**					**$ 48,212.85**	Based on Construction contract amounts					**$ 29,150**			**$ 77,363**	
8	**Services**																				
8.1	Underground Power (inc. in item 7.1)	440	m	$0.00	$0		Included in item 7.1, Based on adopted road length of 440m														
8.2	Western Power Energisation Fees	1	ITEM	$50,000.00	$50,000									1	$10,000.00	$ 10,000		Estimate only. Expected to be a comparable value to MS017351	$ 10,000.00		
8.3	Communications		N/A		$0														$ -		
8.4	Gas Servicing		N/A		$0														$ -		
8.5	Landscaping		N/A		$0														$ -		
8.6	Water Reticulation (150 P-12)	720	m	$60.00	$43,200		Length measured from design drawing. Subject to Water Corporation approvals.							250	$130.00	$ 32,500		PCE's rate includes hydrants, valves, bends, fittings. The mastersheet rate of $60 would be considered simply for the pipe, and not include fittings like valves and hydrants	$ 32,500.00		
8.7	Bore watermain under Ashby Close (12m PE section)																		$ -		
8.8	Reinstate footpath along Ashby Close as part of water retic works																		$ -		
8.9	Reinstate the road pavement at Sultana Road west for the water main works		m2											7	$100.00	$ 720			$ 720.00		
8.10	Water Corporation Connection Fees	1	ITEM	$5,000.00	$5,000									1	$2,500.00	$ 2,500			$ 2,500.00		
	Subtotal - Services					**$98,200.00**					**$ 99,119.28**	Based on Construction contract amounts					**$ 45,720**			**$ 144,839**	
9	**Subtotal**																				
9.1	Construction Subtotal ex Prelims, Survey				$656,648					$ 398,952.15						$ 375,269			$ 774,221.51		
9.2	**Construction Subtotal**				**$728,879**					**$ 496,278.18**						**$ 435,312**			**$ 931,591**		
10	**Allowances and Charges**																				
10.1	Traffic Management		5%		$36,444					included				2.5%		$ 10,883		PCE is of the opinion minimal traffic management would be required as only traffic is for one property			
10.2	BCITF Levy		0.2%		$1,458					included				0.2%		$ 871					
10.3	Council Supervision		1.5%		$10,933					included				1.5%		$ 6,530					
10.4	Design and Superintendence		10%		$72,888					included				10%		$ 43,531					
10.5	Contingency		10%		$72,888					included				10%		$ 43,531					
	Subtotal - Allowances and Charges					**$194,610.69**					**$ 66,413.00**						**$ 105,346**			**$ 171,759**	
11	**TOTAL**				**$923,490**					**$ 562,691**		As of 11 June 2020				**$ 540,658**			**$ 1,103,349**		
12	**Staging**																				
12.1	Staging Contingency		20%		$184,698														0%		
13	**TOTAL with Staging**				**$1,108,188**														**$ 1,103,349**		

Notes

1. This estimate is based on current project information and is preliminary only.
2. The estimates are provided as an order of magnitude of cost only and are subject to detailed design and agency approvals (Western Power, Water Corporation, etc.).
3. It is assumed that there is no requirement for imported fill.
4. It is assumed that ground conditions do not require improvement for the construction of road pavement.
5. It is assumed that communications, gas and gas services are not required as per Portions A & B.
6. The estimate does not include land acquisition costs.
7. All costing exclude GST.
8. No allowance for key of kerbing (add $17 to linear rate)

Prepared by RM. Reviewed by WC.

Prepared by Michael Cook of Porter Consulting Engineers (Stage 1)

Prepared by Michael Cook of Porter Consulting Engineers (Stage 2)

Notes (Stage 1 & 2 Combined)

1. The estimate does not include land acquisition costs.
2. All costing exclude GST.
3. Subject to agency approvals.
4. All costing exclude GST.
5. Porter's has undertaken an assessment for each respective stage, and is of the opinion that a further 20% contingency amount is not necessary.

1	**Preliminaries**										
1.1	All Preliminaries (Mobilization, Supervision, Insurances, Safety etc.)			6%	$59,630.61			6%	$ 74,414.46		
	Subtotal - Preliminaries									**$ 74,414**	
2	**Survey Control and Testing**										
2.1	All Survey (Setout, As-Cons, Compaction Testing etc.)			5%	$49,692.18			5%	$ 62,012.05		
	Subtotal - Survey Control and Testing									**$ 62,012**	
3	**Clearing and Demolition**										
3.1	Clear Large Trees inc Grubbing	10	ea	$246.00	$2,460.00	approximate only based on aerial imagery	5	$ 500.00	$ 2,500		PCE has adopted for a higher rate due to likely presence of existing services near trees to be removed & grubbed.
3.2	Clear Small Trees inc Grubbing	27	ea	$179.00	$4,833.00	approximate only based on aerial imagery	8	$ 250.00	$ 2,000		PCE has adopted for a higher rate due to likely presence of existing services near trees to be removed & grubbed. Based on 85% designs
3.3	Clear shrubs/grass	4000	m2	$1.82	$7,280.00	Length of road taken as 800m with 4m road widening (2x 0.5m extra for topsoil stripping). 800x5=4000	0	$ 1.82	$ -		There are very few scrubs along this length. Topsoil removal accounted for in item 4.1
3.4	Trim / lop branches to shrubs.		Item				1	$ 2,000.00	$ 2,000		From a site visit, there is likely to be a need for some overhanging branches to be trimmed/lopped to facilitate the works.
3.5	Demolish and Dispose redundant footpaths	0	m2	$20.00	$0.00		0	$ 20.00	$ -		The Milner Road costings accounts for any paths that need removal by the Sultana Road intersection.
3.6	Demolish and Dispose redundant kerbing	1600	m	$2.73	$4,368.00	Quantity based on assumed length. Removal on both sides of road. 800x2=1600	1565	$ 9.00	$ 14,085		Remove existing flush kerbing along full length.
3.7	Remove and Dispose redundant drainage pits	0	ea	$460.00	$0.00		0	$ 460.00	$ -		Appears no drainage pits along the road.
3.8	Remove and Dispose existing asphalt offsite.		m2				5100	$ 9.50	$ 48,450		For works to existing pavement areas
3.9	Remove and Dispose redundant pavements	0	m2	$97.37	$0.00		480	$24.64	$ 11,827		Redundant pavement between cul-de-sac to Brand St.
	Subtotal - Clearing and Demolition									**$ 80,862**	
4	**Earthworks**										
4.1	Remove 100mm Topsoil to spoil	4000	m2	$3.00	$12,000.00	Length of road taken as 800m with 4m road widening (2x 0.5m extra for topsoil stripping). 800x5=4000	993.9	$3.00	$ 2,982		Based on 85% designs
4.2	Form, Shape, Compact Subgrade	4000	m2	$4.00	$16,000.00	Length of road taken as 800m with 4m road widening (2x 0.5m extra for topsoil stripping). 800x5=4000	8096	$4.00	$ 32,384		Length of road taken as 800m with2m wide pavement extension to both sides, plus a further 0.5m extension beyond the edge of pavement, as shown on the drawings. And the existing pavement being reconstructed.
4.3	Import Fill, Shape, Compact	0	m3	$30.00	$0.00		60	$ 30.00	$ 1,800		Minor fill batter into lot 1563 by Milner Road/Sultana Road West intersection.
4.4	Cut to spoil and disposal	400	m3	$24.64	$9,856.00	Allowed for 100mm of cut for topsoil area. (5x800)x0.1=400.	2447	$24.64	$ 60,300		Includes disposal of topsoil and boxout material.
4.5	Dust Control	1	ITEM	$10,000.00	$10,000.00	Assumed Rate	1	$10,000.00	$ 10,000		
	Subtotal - Earthworks									**$ 107,465**	
5	**Roadworks**										
5.1	Remove existing base course for possible reuse		m2				4620	$ 4.00	$ 18,480		For existing pavements to be reconstructed
5.2	Supply and Install 220mm limestone sub-base	880	m3	$50.00	$44,000.00	Road area with 220mm depth. (5x800)x0.22= 880			$ -		
5.3	Supply and instal 125mm limestone subbase		m2				8096	$10.50	$ 85,008		Based on 85% designs
5.4	Supply and Install 100mm road base	400	m3	$65.00	$26,000.00	Road area with 100mm depth. (5x800)x0.1=400	0		$ -		
5.5	Supply and instal 125mm roadbase		m2				8096	$11.25	$ 91,080		Based on 85% designs
5.6	Supply and Install 7mm Primer Seal	4000	m2	$2.60	$10,400.00	Road area. 5x800=4000.	7376	$2.60	$ 19,178		Based on 85% designs
5.7	Supply and Install 30mm AC14	3200	m2	$12.19	$39,008.00	Length of road (800m) x road widening (4m). 800x4=3200	7376	$12.19	$ 89,913		Based on 85% designs
5.8	Supply and Install 40mm AC14						879	$18.00	$ 15,822		Based on 85% designs
5.9	Supply and Install FK	1529	m	$55.20	$84,400.80	781m south side, 748m north side	1490	$60.00	$ 89,400		Based on 85% designs
5.10	Supply and Install MK (refer note 8)	0	m	$35.00	$0.00		0		$ -		Based on 85% designs
5.11	Supply and Install SMK (refer note 8)	0	m	$35.00	$0.00		157	$35.00	$ 5,495		Based on 85% designs
5.12	Reinstate existing Crossovers	1160	m2	$90.00	$104,400.00	29 crossovers at 40m2 each. 29x40=1160m2		$90.00	$ -		See below for crossovers being reinstated in varying materials
5.13	Key kerbs						157	$17.00	$ 2,669.00		
5.14	Reinstated Concrete Crossovers for commercial/industrial properties to be: 150mm thick N32MPa concrete with SL62 mesh centrally located with a 100mm limestone basecourse.		m2				261	$110.00	$ 28,710.00		Based on 85% designs
5.15	Reinstate Asphalt crossovers for commercial/industrial properties to be: 150mm thick rock roadbase, 7mm primer seal with 30mm asphalt wearing course.		m2				43	$18.79	$ 807.97		Based on 85% designs
5.16	Reinstate concrete crossovers to residential properties to be: 100mm thick N32MPa with 150mm limestone base.		m2				28	$100.00	$ 2,800.00		Based on 85% designs
5.17	Reinstate Asphalt crossovers to residential properties to be: 100mm thick rock roadbase, primer seal with 30mm asphalt wearing course.		m2				158	$18.79	$ 2,968.82		Based on 85% designs
5.18	Reinstate Existing block paving crossovers is to have the existing bricks retained for reuse towards reinstating the crossover on a 150mm limestone base.		m2				20	$54.00	$ 1,080.00		Based on 85% designs
5.19	Reinstate gravel crossover 150mm thick		m2				177	$16.00	$ 2,832.00		Based on 85% designs
5.20	Supply and Install new concrete footpaths	2000	m2	$38.12	$76,240.00	800x2.5 = 2000m2	1621	$38.12	$ 61,796		As part of Revision B to the DCA report (R34.19), the City has instructed that the path in Sultana Road West is to be reduced from 2.5m to 1.8m. Quantity based on 85% designs.
5.21	Supply and Install Pram Ramps	8	ea	$550.00	$4,400.00	6 @ Milner, 2x @ Brae	2	$550.00	$ 1,100		
	Subtotal - Roadworks									**$ 519,139**	
6	**Drainage**										
6.1	Supply and Install new 300dia(CL2) culverts	0	ea	$2,000.00	$0.00		361.4	$ 85.00	$ 30,719		drainage pipe under crossovers
6.2	Remove and Replace existing culverts OR extend existing culvert	1	ea	$5,000.00	$5,000.00	Brae Road		$ 5,000.00	$ -		See item below
6.3	Remove existing drainage pipework		m				29	$ 30.00	$ 870		Remove the pipework at the intersection with Brae Road. This is at a local high point so no need to have the drainage pipe in place.
6.4	Convert Existing SEP's to Gully's	0	ea	$2,500.00	$0.00		1	$ 2,500.00	$ 2,500		
6.5	Covert Existing SEP's to Manholes	1	ea	$2,000.00	$2,000.00	Quantity based on aerial imagery.	0	$ 2,000.00	$ -		
6.6	Supply and Install new SEP's	1	ea	$3,000.00	$3,000.00	Quantity based on aerial imagery.	0	$ 3,000.00	$ -		
6.7	Supply and install bubble in/out soakwell pits						41	$ 3,000.00	$ 123,000		pits in swales by crossovers
6.8	Supply and Install 375 dia. RCP	5	m	$400.00	$2,000.00	Quantity based on aerial imagery.	0	$ 400.00	$ -		
6.9	Headwalls						0	$ 500.00	$ -		
6.10	Form roadside swales		m				1098	$ 18.00	$ 19,764		Based on 85% designs
	Subtotal - Drainage									**$ 176,853**	

	SULTANA ROAD WEST (MILNER ROAD TO BRAND ROAD)											
	Revised Cost August 2018 - Based on Curnow Portion B rates											
	Approximate Length 800m											
Item	**Description**	**New Quantity**	**Unit**	**Rate**	**Amount**	**Notes**	**PCE Quantity**	**PCE Rate**	**PCE Amount**	**PCE Subtotal**	**PCE comment**
7	**Miscellaneous**										
7.1	Supply and Install misc linemarking and Signage	1	ITEM	$5,000.00	$5,000.00		1	$1,000.00	$ 1,000		Chevrons by Brand Rd
7.2	Supply and Install street lighting	800	m	$110.00	$88,000.00	Length of road		$110.00	$ -		
7.3	Supply and install street lighting including cabling		ea pole				9	$3,000.00	$ 27,000		
7.4	Supply and Install trees	54	ea	$450.00	$24,300.00	Allowed for trees at 15m spacing for the entire road length. 800/15=53.33 rounded up.	0	$450.00	$ -		City confirms that having street trees located in the proposed swales would be suboptimal, and therefore exclude street trees from the design and costs.
7.5	Maintenance of trees and verges for a 2 year period	2	Year	$16,948.86	$33,897.72		0	$16,948.86	$ -		City confirms that having street trees located in the proposed swales would be suboptimal, and therefore exclude street trees from the design and costs.
7.6	Supply and Install select fill for swales	0	m3	$30.00	$0.00		0	$30.00	$ -		Discussed that proposed roadside swales do not require any specific select filter media. The swales shall consist of the insitu soils which has high permeability characteristics.
7.7	Supply and Install gravel for swales	0	m2	$33.00	$0.00		0	$33.00	$ -		Discussed that proposed roadside swales do not require any specific select filter media. The swales shall consist of the insitu soils which has high permeability characteristics.
7.8	Clean up	1	ITEM	$5,000.00	$5,000.00		1	$5,000.00	$ 5,000		
7.9	Relocation of power pole at Milner Road Intersection (based on Dundas/Milner/Berkshire Quote)	1	ITEM	$350,000.00	$350,000.00		1	$270,921	$ 270,921		Refer to the Western Power feasibility Study (MF011894 / GFVSVU 22 May 2020) and design drawing (MP190326) for the removal of the power pole #132866. Costs are inclusive of all works shown on the design drawing MP190326, including the switchgear and LV kiosk.
7.10	Provision for misc./unidentified service relocations / adjustments			$20,000.00	$20,000.00		1	$ 20,000.00	$ 20,000		For unidentified services relocation. There may be a need to adjust services, in particular where services are perpendicular to proposed swales.
7.11	Adjustment of Telstra or NBN lids to suit finished levels (Provisional)						1	$ 10,000.00	$ 10,000		Although it is expected that most of the existing communication pit lids currently match proposed levels, an allowance has been made for some lids needing adjusting.
7.12	Adjustment of Water Corp lids (valves, hydrants) to suit finished levels (Provisional)						11	$ 2,000.00	$ 22,000		As the verge level of Sultana Road will be adjusted slightly, lids and spindles will need to be raised.
	Subtotal - Miscellaneous									**$ 355,921**	
8	**Subtotal**										
8.1	Construction Subtotal ex Prelims, Survey				$993,843.52				$ 1,240,241		
	Construction Subtotal				**$1,103,166.31**				**$ 1,376,668**		
9	**Allowances and Charges**										
9.1	Traffic Management		5%		$55,158.32		3%		$ 41,300		Traffic management percentage reduced from 5% to 3% to reflect cost of around $44k.
9.2	BCITF Levy		0.2%		$2,206.33		0.2%		$ 2,753		
9.3	Council Supervision		1.5%		$16,547.49		1.5%		$ 20,650		
9.4	Design and Superintendence		10%		$110,316.63		7.5%		$ 103,250		Design and superintendence fee reduced from 10% to 7.5% , includes locating/survey of services that cross swales
9.5	Contingency		20%		$220,633.26	Refer Note 12 below	5%		$ 68,833		Contingency reduced from 20% to 5% as part of preparing Revision B of the DCA report (R34.19), as instructed by the City, and is reflective the investigations and designs undertaken to date.
	Subtotal - Allowances and Charges									**$ 236,787**	
10	**Subtotal - entire width, approx 800m length**				**$1,508,028**				**$ 1,613,454**		
11	**TOTAL to Scheme (50%)**				**$754,014.17**				**$ 806,727**		
Notes							**Notes**				
1. This estimate is based on current project information and is preliminary only.							1. This estimate is based on the 85% design status drawings				
2. The estimates are provided as an order of magnitude of cost only and are subject to detailed design and agency approvals (Western Power, Water Corporation, etc.).							2. The design and estimates are subject toAuthority approvals.				
3. It is assumed that there is no requirement for imported fill.							3. It is assumed that ground conditions do not require improvement for the construction of road pavement. The pavement investigation report suggests the subgrade is suitable.				
4. It is assumed that ground conditions do not require improvement for the construction of road pavement.							4. The estimate does not include land acquisition costs.				
5. A geotechnical assessment of pavement condition has not been undertaken. It is assumed the existing pavement does not require improvement/upgrade.							5. As discussed with the City, no allowance has been made for street trees or landscaping.				
6. It is assumed that communications, gas and gas services are not required as per Portions A & B.							6. All costing exclude GST.				
7. The estimate does not include land acquisition costs.											
8. All costing exclude GST.											
9. No allowance for key of kerning (add $17 to linear rate)											
10. This item estimate is consistent with advice provided on the 24/7/17 to Jordan Koroveshi via email.											
11. The estimate is based on the length proposed under the Forrestfield North Residential Precinct (800m).											
12. A contingency of 20% has been applied. The added contingency recognises the unknown condition of the pavement, and the need for a geotechnical assessment of the pavement condition prior to the preparation of design drawings.
